*Like a flower that is constantly opening,  
through evanescent petals of light,  
the universe is constantly revealing  
the magical nature of love.*

*to all my mothers and fathers  
who through the lineage of time  
have kept constantly present  
the eternal flame of my heart*

## FOREWORD

This book is inspired by my desire to communicate a miracle: the miracle that fulfills ( in natural completion ) the longest voyage of time; the miracle that renews the evolutionary nature of consciousness of human life with the new form of consciousness that is Universal Balance.

Universal Balance is the Principle that instantaneously unifies, as one, all the celestial movements that are Universal life.

The Principle is whole consciousness: constantly unfolding as an exquisite flower of life; forever regenerating itself as the unity in motion of Life.

Universal Balance – the Holographic Consciousness of Life – reveals within its nature the source of all healing. It expresses the absolute regenerative health that is the unity of Life, and the return in the Planet Earth to the life of Balance.

This is the life of Balance that is universal Creation: bringing into presence, as the constant unfolding that is The Eternal Moment of Life, the magical reality that is the beauty of Life,

The content of this book brings three forms of expressions of the reality that is Universal Balance that – merged as One – are the transposition of evolutionary consciousness into the engagement of wholeness that is The New Consciousness of Life.

The first expression of Universal Balance is the Physics of Balance: an exposition of the physical biomechanical nature, that is the universe constantly bringing into existence the moment of Creation that we call life.

The second expression is an account of the last stages within the unfolding of the evolutionary mind of man. This brought about the merging of the linear nature of human consciousness with the all encompassing holographic nature that is the Universal Mind of Life.

Through this merging, The New Consciousness of Life came into being: opening the field to reconnect the human self with the eternal reality that is Universal Love. This reconnection of human consciousness with the unity of Life is a celebration: it transforms our life in the planet Earth into a totally new reality which expresses our re-engagement with the natural, whole movement of Balance that is the ecstasy of Life.

The Third expression of Universal Balance is the exposition of all the attributes self-contained within the New Consciousness of Life: as they represent the mental, emotional and physical integration that expresses our natural communion with the unity of Life.

It is advisable to first read the whole book in a fluent manner, perhaps momentarily bypassing the need to fully comprehend areas which at the moment may not seem to be clearly understood. As the reader begins to become increasingly familiar with the language through which the book expresses the sense of unity that is Universal Balance, he/she will discover that all questions pertaining to the New Consciousness of Life will become clarified one-by-one.

As the writer I, am honored to be the communicator of The New Consciousness that is now blessing the planet. I acknowledge Universal Balance to be the miracle. It is the Path of Return that has brought me into the presence of Life. It has renewed my essential sense of life with the exuberance and exaltation that is the universal nature of love.

Michael Cristiam Nebadon

## TABLE OF CONTENTS

THE PHYSICS OF BALANCE .....	3
Universal Balance: The constant Nature of Life .....	4
Time and Balance .....	6
The Moment of Existence that is Universal Life .....	7
The Principle of Universal Balance:	
The Harmonious Relationship Between All Movement, Synchronized As Eternal Now .....	8
Universal Balance: The One Whole, Equilibrated Sense Of Life .....	9
EQUILIBRIUM	
The Sense That Reunites And Renews All Senses As One .....	10
The Universal Principle Of Life .....	11
The Universal Biorhythm Of Life: The Natural Freedom Of Life .....	13
Gravity and Expansion .....	15
Self-Equilibrium: The Human Sensation Of Life .....	16
The Forces Of Balance:	
The Matrix That Unites Self-Equilibrium With The Universal Equilibrium Of Life .....	17
Ten Directions Of Expansion .....	19
The Seven Centers .....	19
The 22 Paths Of Balance .....	19
The 10-Dimensional Skeletal Directions Of Wholeness .....	20

GLOSSARY .....176

## THE PHYSICS OF BALANCE

**Universal Balance is physical unity:** the synchronized communion between all celestial motions. It expresses the full engagement/participation that is the universe; simultaneously it receives and creates the unity of Life.

**Universal Balance is fusion:** the simultaneous merging correspondences between all synchronized reflexes, expressing the one act of occurrences that reunites and renews all things at once.

**Universal Balance is Life.**

**Universal Balance is the bio-rhythm of all nature:** the whole universal expression of harmony, that ( as ever-present now ) houses the existence of all human life.

**Universal Balance is three-dimensional unity.** It expresses the natural expansion of motion of the human self, as he is suspended within the fourth-dimensional field of unity.

This field of unity is the whole movement of universe, renewing the whole of Creation as The Eternal Now of Life.

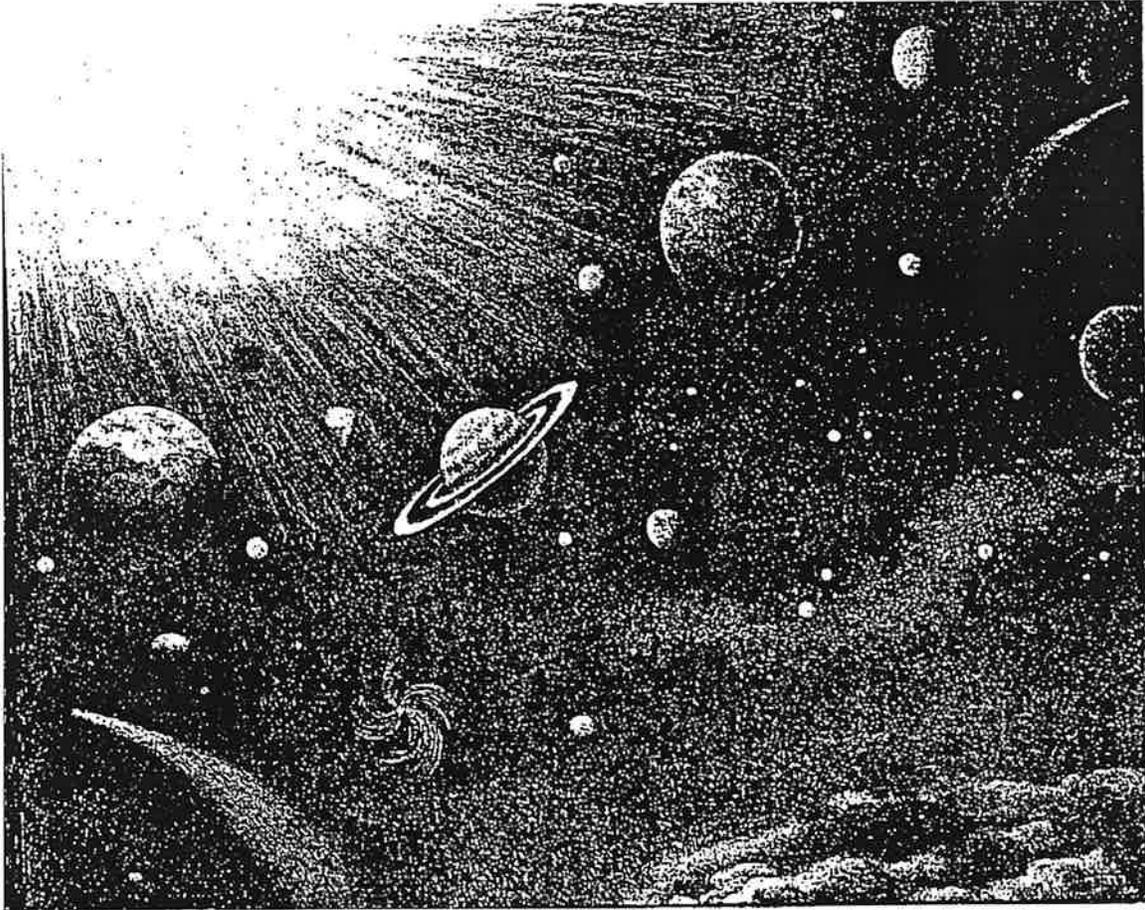

As The Eternal Now of Life, **Universal Balance is pure Principle.**

**Universal Balance is absolute freedom of movement:** unifying ( in natural momentum ) the all of universal existence; expressing the natural sensation of unity in motion that is the ecstasy of Life.

**Universal Balance is boundless feeling,** expressing the primal sensation that is the life of Love.

**Universal Balance is God.**

**UNIVERSAL BALANCE:**  
*The Constant Nature of Life*

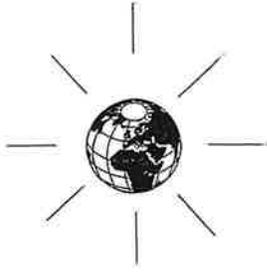

**Universal Balance**, as it is the universal biorhythm that synchronizes (as harmony) all movements into One, is also the sense of centered-suspension within each and all the celestial bodies that are Planetary Life.

**Planetary Life** is the harmony of relationship between all celestial bodies that, as One whole body of Life, is involved in a perfect synchronization of interaction, giving and receiving the instant of suspended Balance that is the all inclusive moment of Life.

**Universal Balance**, centralized in the all inclusive moment of Life, is **simultaneity** – the synchronized relationship between all universal existence – that, as the all-engagement of unity, is **Eternal Now**, expressing the constant traveling of the universal unfolding of Life.

**Universal Balance; Planetary Life; the all inclusive moment of Life; The Eternal Now;** are words and symbols that express the - 0 - weight suspension that is the life of the planet Earth.

The planet Earth lives its balance among all celestial Life, as it is suspended by a synchronized relationship of forces converging, forces expanding, expressing the three-dimensional whole engagement that is the universal movement of its Life.

In Balance ( as the life of Balance ) our planet Earth is turning on its axis at the same time that it moves in a full circle around the sun. This movement is also the constant three-dimensional relationship of all planets and the moon, expressing the perpetual dance of perfect, united gravitational relationships of the Solar System.

The Solar System is creating and receiving the -0- point Balance that, as absolute harmony, is the suspended nature of all heavenly Life.

**The suspended nature of all heavenly Life** is the fully-engaged, universal Principle of synchronism – Universal Balance – that ( involved in a perfect relationship between all dimensional forces ) gives and receives its Balance within the same instant of time.

This is the Principle of perfect correspondence as it is constantly, within the passage of time, the merging fusion of giving and receiving that is the unity in motion of Life.

This movement of wholeness, giving and receiving itself as wholeness, is the natural balance of the planet Earth, that ( wholly-engaged in the dance of Life ) is the celestial garden that environmentally houses the existence of all human life.

Engaged in the whole movement of balance, the nature of the planet's balance is constantly new. The planet is engaged in the whole harmony that is universal existence; turning constantly in its axis, changing moment-to-moment as the expression of the whole expansional movement that is The Universal Balance of Life.

This moment-to-moment change of the planet, expressing its whole-engagement with all universal movements is such, that when the Earth completes its yearly revolution around the sun, its arrival destination touches not the exact point in which it started but a new physical point of Life.

This is the physical point of Life that is also the expansional creative renewal that encompasses the whole new change within the all of universal Life. This is the expansion of Universal Balance, centralizing the Planet as -0- point weight - expressing the constant replenishing renewal of all of Life.

This whole movement of Universal Balance is measured by human consciousness in terms of time as... fractions of seconds, seconds, minutes, hours, days, weeks, months, years... expressing the points-of-references, through which the human mind self-contains ( as physical measure ) the eternal, unified-field-of movement that is Universal Balance.

## TIME AND BALANCE

Within every fraction of time ( which is the frame-of-perception through which we measure and sense the movement of Life ) there is the whole movement of Universal Balance – directly actualized by the dance of our Solar System – in which all things change within the same instant of time.

This constant change is a constant renewal of all heavenly-relationships in celestial space, in which the centering of each planet in relation to the sun and all other planets is the changing suspension of all; and the changing suspension of all is the centering-suspension of each planet.

This is the Principle that expresses the unity-in-motion that is Universal Balance, by which the one celestial body ( like the planet Earth ) is suspended by the All, as the All is simultaneously suspended by the One.

**This is the eternal Principle that is Universal Balance**, giving and receiving itself as the movement of One, living the full dimension of harmony that is the whole nature of Life.

## THE MOMENT OF EXISTENCE THAT IS UNIVERSAL LIFE

In the moment of universal existence, expressing the celestial movement of all life, **One is all, and all is One.**

**This is fusion**, the Principle that is the simultaneous suspension of Universal Balance in which the universe is constantly reunited and replenished within the same instant of movement, within the same instant of time.

**This is the Principle** in which all movements of individual, celestial three-dimensional forms are reunited as One in the fourth-dimensional unity that is **atomic renewal**, expressing the unstoppable, whole, expanded movement of Life.

**This is the atomic, unstoppable, whole, expanded movement of Life** that coordinates all motions within the one instant that is Eternal Now. This is the **Eternal Now** that is **Universal Balance** expressing **Creation** as the coordinated reflexes between all universal existence, regenerating as the creative nature of Life.

This movement of wholeness within wholeness is called the **Eternal Now** because it cannot be stopped by time. It is the same as time. It is atomic in its nature because it happens before the conscious awareness of time could come into being. Therefore, it is that which **is** ( and **is** that which constantly changes ) within the changeless state of wholeness-within-wholeness that is Universal Life.

This whole, changing movement of wholeness-within-wholeness of Universal Life is eternal because it is that which never has ceased to exist. **It is eternal** because ( traveling as the unfolding progression of time ) it embraces the whole of its past experience as the one regenerative renewal that is the atomic moment of Life. It expresses as **Eternal Now**, the creative nature of Life.

## THE PRINCIPLE THAT IS UNIVERSAL BALANCE:

### *The Harmonious Relationship Between All Movement, Synchronized As Eternal Now*

**The Principle that is Universal Balance**, the one act of synchronization that ( as **Eternal Now** ) reunites and renews all universal movements into One, is also the natural attribute that is Creation – expressing the fourth-dimensional reality that is the constant, EXPANDING “more” of Life.

This Principle is called “NATURAL ATTRIBUTE,” because it is the whole intelligence of Life: expressing the constant creative reality that is universe, reuniting/renewing as one simultaneous action all things at once.

This natural attribute is called “A PRINCIPLE,” because it is the expression of universal being. It is the whole, absolute movement of Life, reuniting and renewing (as one synchronized instant) the all of universal Life.

This Principle is also called “ABSOLUTE,” because it is the atomic reality that ( as **Eternal Now** ) is unstoppable, eternal Creation: expressing the whole, universal sense of being that is GOD.

**Universal Balance is called PRINCIPLE, ABSOLUTE and GOD** because it is the one holographic moment of movement that ( as atomic presence ) unites all physical existence as the eternally present, all-equilibrated reality of Life.

## UNIVERSAL BALANCE: *The One Whole, Equilibrated Sense Of Life*

Inside of the atomic, absolute Principle that is the unity of Life, UNIVERSAL BALANCE, UNIVERSAL MOVEMENT, and UNIVERSAL EQUILIBRIUM are one and the same – as these three terms describe the constant synchronization of all universal physical existence, becoming constantly renewed as the moment of One.

UNIVERSAL BALANCE is the nature of wholeness that is universal existence.

UNIVERSAL MOVEMENT is the constant changing within its wholeness.

UNIVERSAL EQUILIBRIUM is the synchronized relationship of wholeness, centering in a simultaneous coordination each and all the celestial bodies in celestial space.

**As Universal Balance**, the whole physical reality that is the universe lives its expansional unity as Universal Equilibrium. Universal Equilibrium is the Principle of synchronized whole-movement. It is also the atomic expression that is the constantly renewed nature of Life.

**As Universal Balance**, Universal Equilibrium is the futuristic, constantly appearing moment of Life. Universal Equilibrium is absolute MOMENTUM expressing the unrestrained creativity of Life.

**As Universal Balance**, Universal Equilibrium is not only the creative renewal of Life, but also the living expression of all human life. UNIVERSAL EQUILIBRIUM is **the primal, movement-reflex that animates the human, living reality of Life.**

As it is suspended by the whole-movement that is the Equilibrium of life, the human, living-reality of life is constant self-stability: the-moment-to moment gathering of SELF-EQUILIBRIUM, through which the human being experiences the physical sensation that he calls his life.

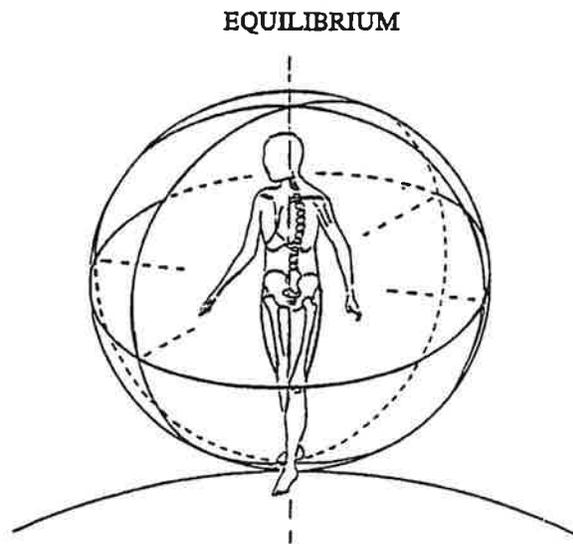

## **EQUILIBRIUM:** *The Sense That Reunites And Renews All Senses As One*

**EQUILIBRIUM:** 1. The condition in which all acting influences are canceled by others resulting in a stable, balanced or unchanging system.

2. Physics. The condition of a system in which the resultant of all acting forces is zero and the sum of all torques about any axis is zero.

3. Chemistry. The state of reaction in which its forward and reverse reactions occur at equal rates so that the concentration of the reactants does not change with time.

4. Mental and emotional balance, psychological stability. (Latin origin; “equilibrium”: aequi = even + libra = balance.

**EQUILIBRIUM:** as it is the creative stability that is Universal Balance, is the whole movement that is Universe. It is the one sense that reunites and renews all movements of life, regenerating in atomic-fusion the-all of universal existence as The Eternal-Moment of Life.

**EQUILIBRIUM:** being the eternal, moment of existence that is God, is atomic fusion – the One and the All – reunited as One, expressing the physical harmonious reality that is the creative nature of Life.

**EQUILIBRIUM:** as it is the primal reflex that is the balanced movement of the human self and also the whole sense of Life. It is that which, as Unity in Motion, animates the form of the physical body expressing the replenishing renewal that is the constant, transforming nature of Life.

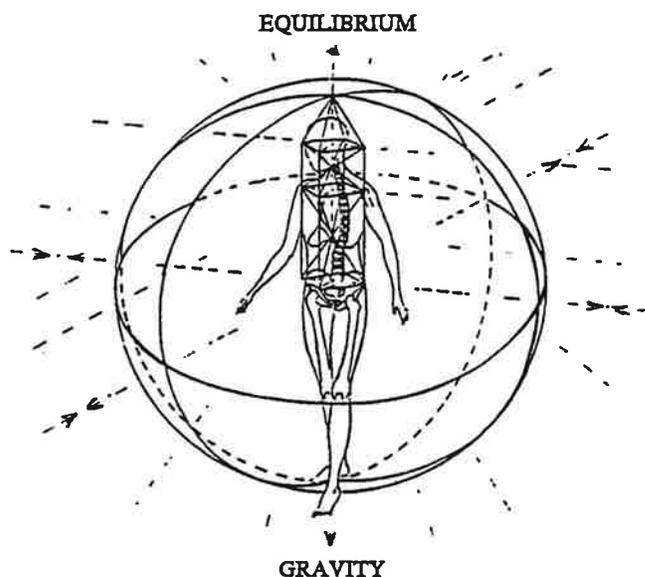

## EQUILIBRIUM: *The Universal Principle of Life*

**Universal Equilibrium** – the atomic reality that is God – is the natural, centralized expansion ( in motion ) of all physical celestial Life.

**Universal Equilibrium**, constantly centralizing the whole field of harmony that is Universal Balance is also **Self-equilibrium** expressing the natural movement that is human life.

**Self-equilibrium** ( in its union with the Universal Equilibrium of Life ) is the natural, human reunion of harmony with the whole movement that is Universal Balance. It is experienced by the human-self as three-dimensional free-expansion of the physical body – that is, the physical body as it is engaged in the natural suspension that is the unity in motion of Life.

In this engagement of the human self with the all-equilibrated suspension that is Universal Balance, the center of gravity that centralizes the physical weight of the form of the body toward the center of the planet Earth is simultaneously the vertical center of expansion that is Self-equilibrium.

This is the expression of the fusion-nature of Balance, reuniting what is conversion and what is expansion as the movement of One.

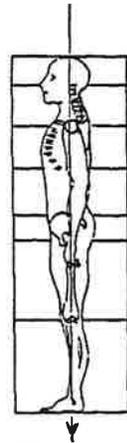

This is the nature of unity that is Universal Equilibrium: the inner forces, through which the human being gathers his sense of self through the ground, are also (simultaneously) the expansional nature that is the three-dimensional suspension of the form of his body.

The three-dimensional form of the body is centralized and suspended as Self-equilibrium by the whole equilibrated system of movement that is the Universal Equilibrium of Life.

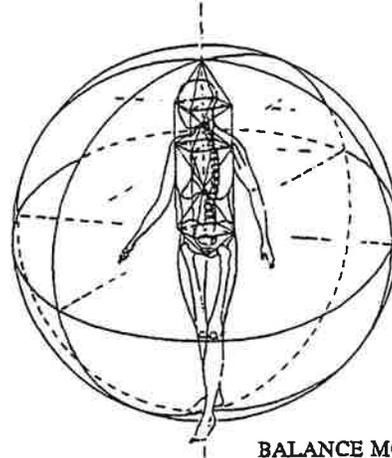

This is the nature of physics – the physical nature that is the human body, as it is united with the whole animation that is its Life.

This analogy of the physical nature of balance transforms the analogy of physical balance of Newtonian physics into the new understanding that corresponds to the human self's suspension (constantly coming into being) by the natural momentum that is the whole movement of Life.

In Newtonian physics, the balance of the physical weight of the human body was seen as being the result of arranging the segments of the body to conform to a center plumb line, the center of gravity.

INERT BALANCE

BALANCE MOVEMENT

In this analogy, the balance of the body is seen as following the same principle of balance of weight that affects all inert physical forms.

This physical analogy of balanced weight is only partially accurate, in the sense that it does not acknowledge the essential tensional forces through which the human being becomes physically centralized in relation to the field of Gravity.

These are the expansional, tensional forces of Life, through which the human being experiences (as physical sensation) the suspended communion that is the Universal Equilibrium of Life. These are the forces of Balance that – by expressing the expansional nature of the whole movement of Life – centralize the physical weight of the body in relation to the omnipresent field of Gravity.

Within this new analogy of human Balance, the centering of the physical body (in relation to the field of Gravity) is the natural communion of the human self with the all-equilibrated, whole-movement that is the Universal Balance of Life.

Within this new analogy, physical Balance is equilibrated three-dimensions in motion, expressing the dynamic sense of whole-movement that (in its grounding nature) is also its expansional sense of Life.

Within this new understanding of human physical Balance (as being the natural self's communion with the whole movement of Life) the terms UNIVERSAL EQUILIBRIUM, SELF-EQUILIBRIUM, and THE WHOLE MOVEMENT OF LIFE are one sense of Life. These three expressions of Balance represent the sense of oneness, the sense of wholeness, that is the human self, living the **Eternal Now** as the whole physical engagement that is the Universal Balance of Life.

## THE UNIVERSAL BIORHYTHM OF LIFE: *The Natural Freedom Of Life*

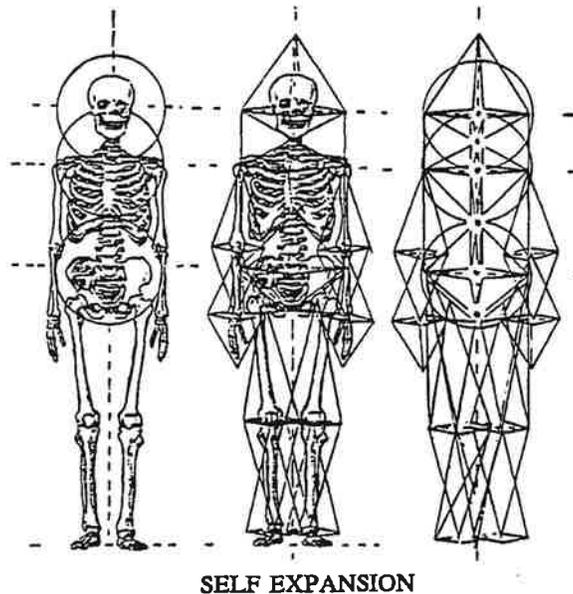

**Balance, the Equilibrium of Life**, as it is the constant renewal creation of all universal Life, is natural freedom. It is the naturally existing state of freedom, as all simultaneous experiences of movement are suspended as One.

Inside of this united existence, each heavenly body receives its freedom: as suspension in motion through the fourth-dimensional gravitational support existing within all centered, equilibrated relationships of Life.

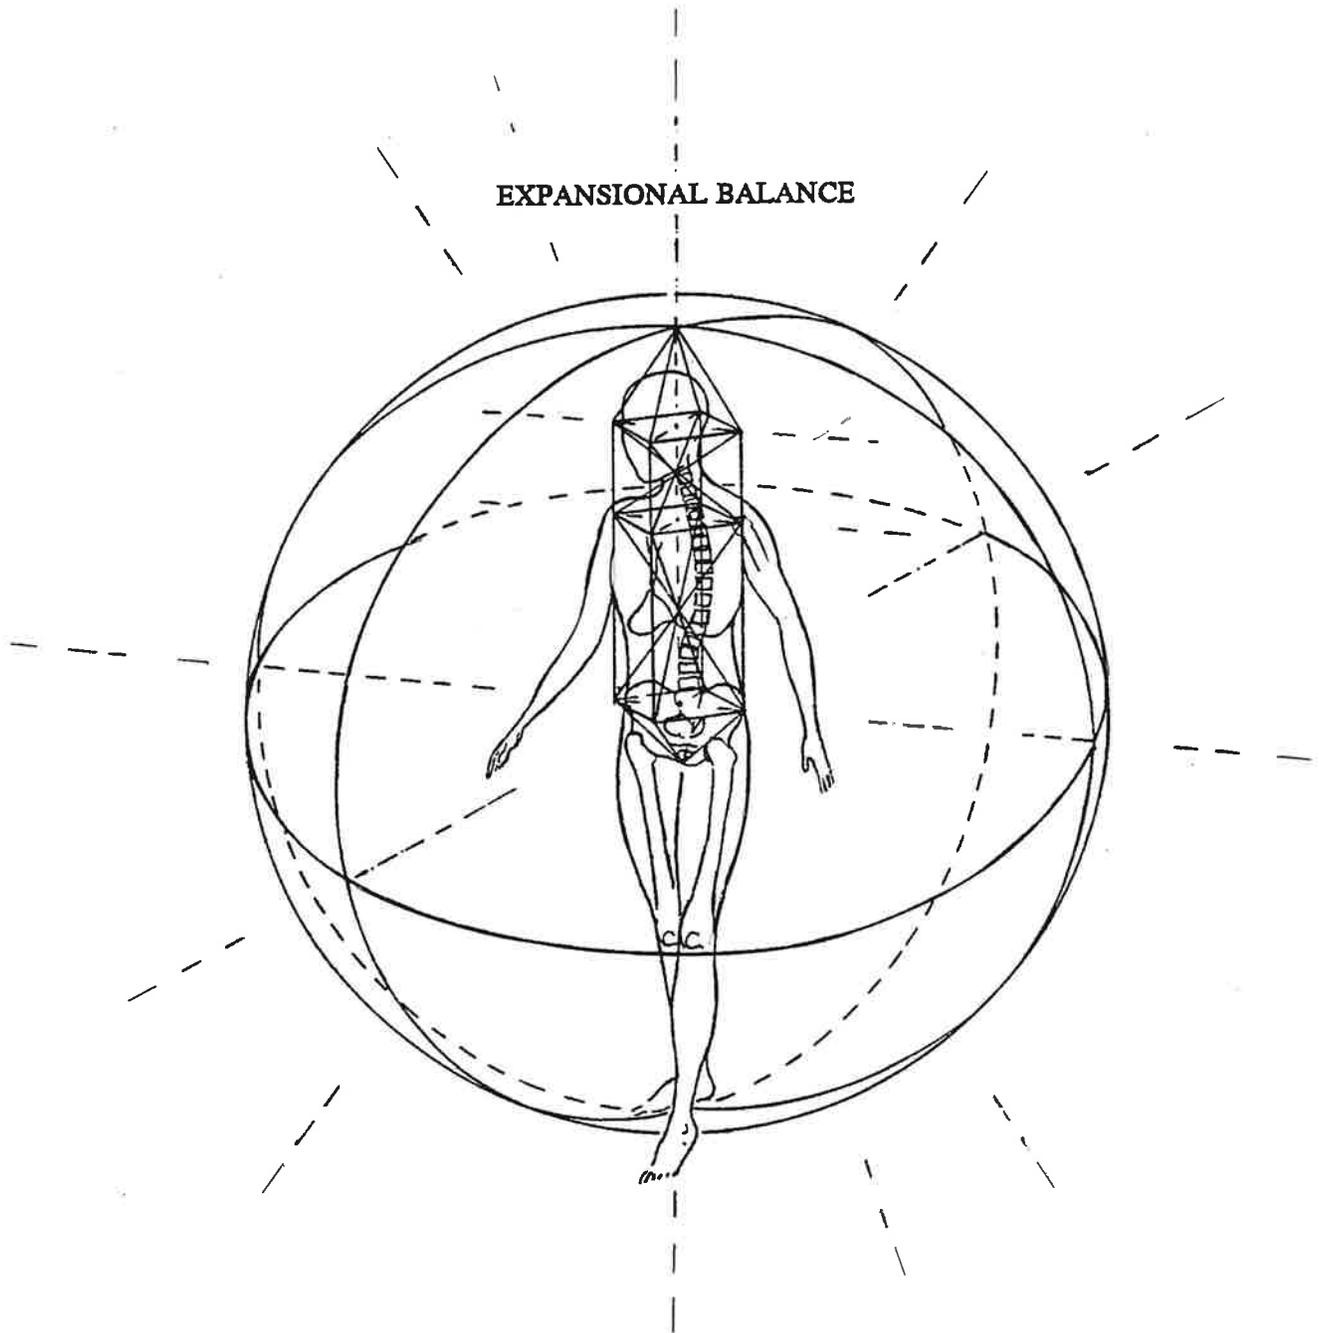

This simultaneous engagement of all movements is **Expansional Balance** – the Biorhythm of universal Life. As an all ever-present holographic field, it centers the moment of existence as the whole movement that gives being to all Life.

**Expansional Balance**, as it expresses the freedom-of-movement within all celestial universal Life, is the physical movement of three-dimensions suspended among an all fourth-dimensional sense of Life.

**Expansional Balance** ( as it expresses the freedom of movement that is human-Life ) is the physical expression of the three-dimensional free-expansion of the skeletal structure, centering – as Self-equilibrium – the whole body of Life.

This is the natural biomechanical sense of freedom that is self-expansion engaged in the natural act of Balance. It relates equally, as omnidirectionality to all directions of space.

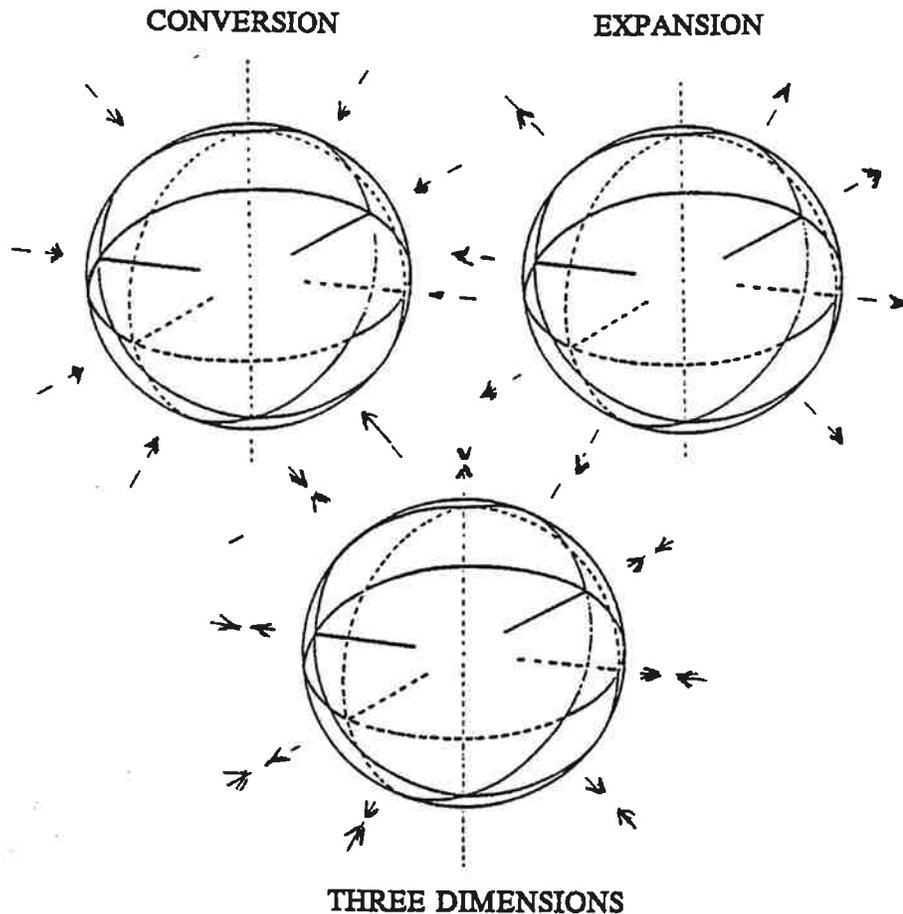

In this expansional sense of Balance (that is natural Self-equilibrium) the human being experiences the gravitational centering of its physical form, as it is balanced by the whole movement of the universe expressing the Equilibrium of Life.

## GRAVITY AND EXPANSION

**Gravity**, the omnipresent force that impels all bodies towards the center of their physical form, is the atomic sense of unity; it gives being to all the celestial bodies that make up the universe, the planet Earth, the human being, and the smallest particle of Life.

This natural force is the given and the grounding essential force that atomically ( as the existing moment of movement of Life ) balances the tensional forces of expansion. It is the united presence and the renewal that is the creative nature of Universal Balance.

In Balance ( as Balance ) **Gravity and Expansion** – unity and renewal – are always merged as One. Within the constantly present, atomic moment of Life, the gravitational center of all physical form is simultaneously the expansional reality that is the whole movement – Universal Life.

This is the true nature of universal three-dimensional reality. This is the sense of physical communion that is the Universal Equilibrium of Life. It reunites the human and the Universal as the equilibrated momentum that is The Eternal Moment of Life.

## **SELF-EQUILIBRIUM:** *The Human Sensation of Life*

**The Eternal Moment of Life** is lived in natural communion of correspondences by the human-self as all segments of the skeletal system ( the physical foundation of the body ) receive their centered, expansional relationship by the Universal Equilibrium of Life.

Through this communion with the whole field of energy that is Universal Balance, the natural suspension of the whole physical body expresses the natural freedom of movement within each moving segment of the body – as each moving segment is the centralized point of suspension of the whole.

**This is the physical nature of Balance**, expressing ( as unity in motion ) the Principle of wholeness-within-wholeness which is the existence of the universe.

This Principle centralizes each celestial body in celestial space through the whole field of movement that is the Universal Balance of Life. It becomes a realistic experience for the human self: as the sum total of all moving segments of the body ( acting equally in synchronization as One ) frees each segment to the experience of full range of motion.

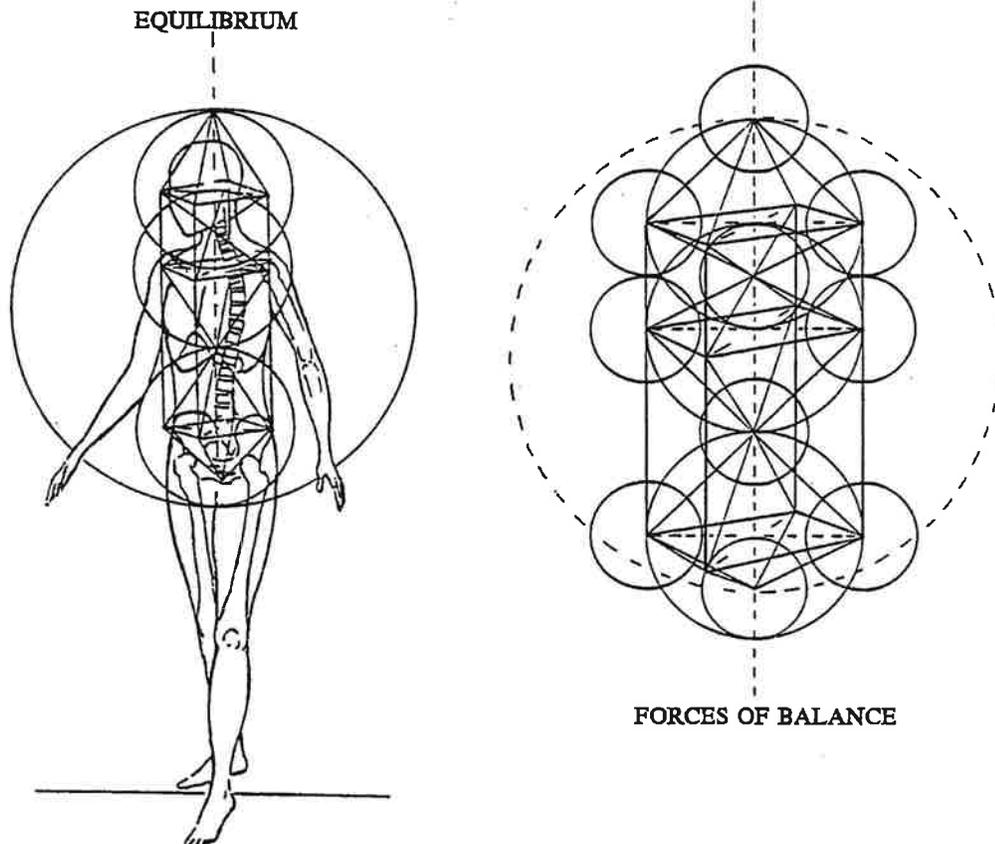

Each segment reflects the freedom of movement that gives and receives simultaneously (as One ) the unrestrained natural momentum – the Universal Equilibrium of Life.

This experience of whole freedom of movement is self-equilibrium merged in simultaneity of correspondences with Universal Equilibrium. It represents the natural physical sensation of the human self, naturally engaged in the whole-movement that is the ecstasy of Life.

**This is the Principle of Balance of the human body**, living – in communion of correspondences – the universal Principle that is the atomic unity of Life.

## THE FORCES OF BALANCE:

### *The Matrix That Unites Self-Equilibrium With The Universal Equilibrium Of Life*

**The natural freedom of the human body** ( as it is the natural expression of the appearance/renewal of Life ) is naturally devoid of any form of biomechanical friction.

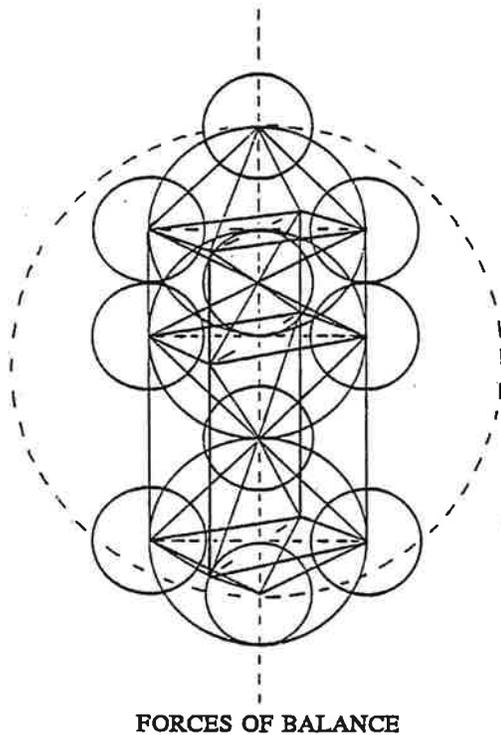

In its natural state, the Balance of the physical body perfectly exists through the tensile nature of universal expansion. Tensional Integrity is the fullness of Life.

This sense of wholeness within the physical self is a direct reflection of the system of balanced forces that, as a Matrix of Balance, is the merging union of self-equilibrium with the Universal Equilibrium of Life.

**Equilibrium** is not only a central line of vertical force. It is also a whole Matrix of intersecting, skeletal directions that expresses the fusion in Balance of right and left, front and back, above and below, six directions of space. This is the merging of the six directions of space, through which the human-self senses the physical form of his body and experiences his sense of self-stability in three-dimensional space.

This whole system of tensional balanced forces is the natural three-dimensional suspension of the physical weight of the body. The physical body ( by its centralized communion with Universal Equilibrium ) partakes in the simultaneity of correspondences: the -0- weight suspension in motion of the planet Earth; the -0- weight suspension of the Solar System; and the -0- weight suspension that is the universal movement of Life.

Within the graphic depiction of the biomechanical tensional forces of balance, the (3) three-dimensional diamonds drawn upon the body represent three main structural centerings. Simultaneously reunited as One, they are the union of Self-equilibrium with Universal Equilibrium.

The first diamond expresses the vertical and horizontal centering of the head in the top of the atlas ( spinal column ).

The second diamond expresses the horizontal and vertical centering of shoulder girdle and arms, as they express the suspensional-centering of the rib cage and upper torso.

The third diamond expresses the horizontal and vertical centering of the pelvic girdle, as it is expressing the coordinated balanced movement within the six joints of the legs.

The crisscrossed lateral lines and vertical lines ( reuniting the three diamonds into one whole matrix of three-dimensional movement ) represents the simultaneous, balanced interaction of centering between all moving segments of the skeleton, reunited as One.

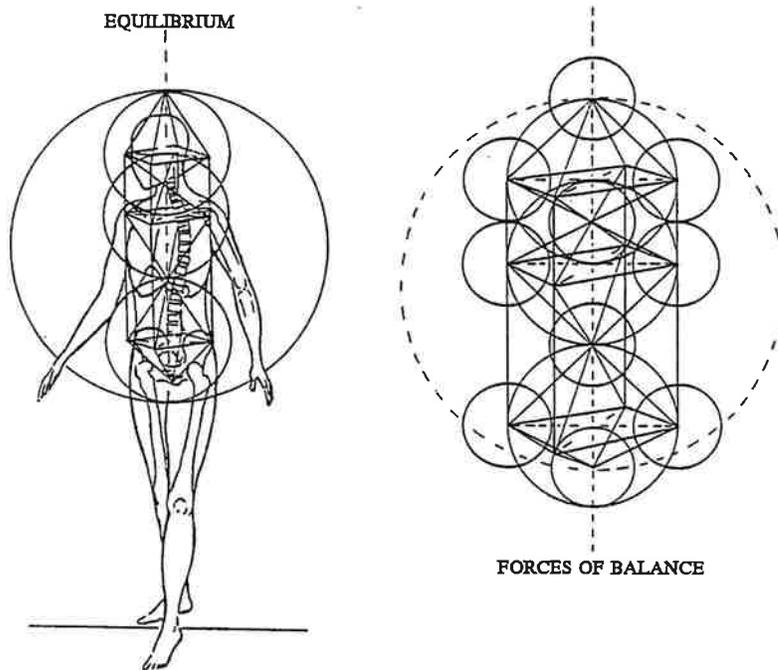

**The Matrix of Balance** ( expressing the human-self's equilibrated communion with the movement of Life ) is composed of 10 directional dimensions of skeletal expansion, 7 centers of physical biomechanical interaction, and 22 paths of neurological connections.

**This Matrix** represents the human reflex of Life and, therefore, is the physical sensation through which the individual-self experiences every single moment within one's earthly Life.

**This Matrix of Balance** represents **one instant** and **one frame** of whole, equilibrated movement within the constant change that is the natural momentum of the whole-movement of Life.

## TEN DIRECTIONS OF EXPANSION

Within the Matrix of Balance, there are ten dimensional directions of expansion:

They express the balanced relationship between three intersecting biomechanical centers of right and left – and four intersecting centers, between above and below directions, that are the three-dimensional centralization of the whole body.

The three centers of balance of right and left are three horizontal directions in union with the four vertical interrelationships that are the centralization of Self-equilibrium.

## THE SEVEN CENTERS

The seven centers express the spatial centralization of the skeletal structure, as it is balanced in its centralized conversion with the expansional nature of Life.

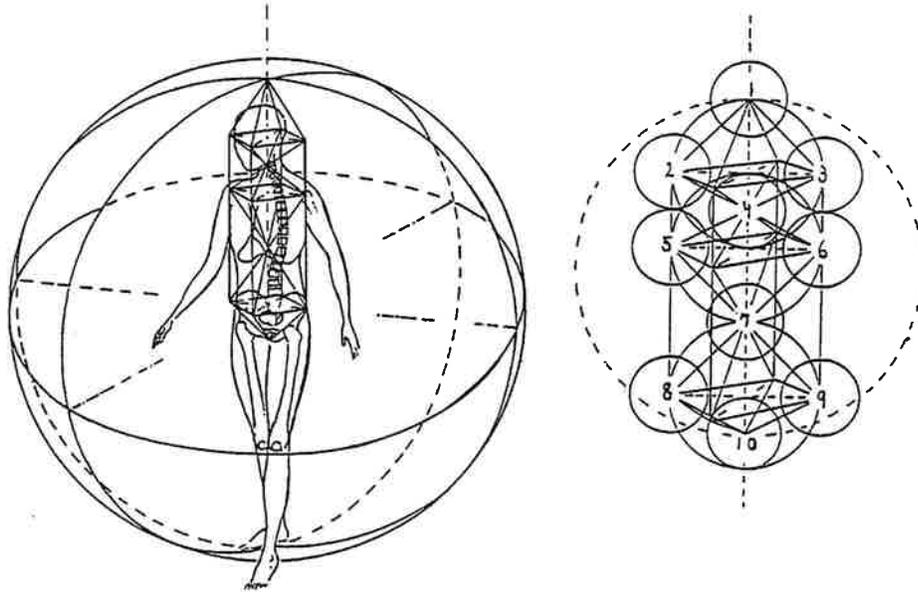

This spatial centralization of the human body expresses the union between the force of gravity, ( which centralizes the physical form of the body toward the center of one's being and toward the center of the planet earth ) with the expansional sense of life that is the natural momentum of Life.

## THE 22 PATHS OF BALANCE

The 22 paths of Balance are the physiological-neurological connections of Balance that (as a whole system of centered intersecting directions ) are the natural suspension in motion of the physical weight of the body in three-dimensional space.

## THE 10-DIMENSIONAL SKELETAL DIRECTIONS OF WHOLENESS

### *THE 10 SKELETAL DIRECTIONS OF WHOLENESS*

**The ten-dimensional, skeletal directions of wholeness of Balance** are the ten directions of expansion within the body. ( Synchronized as One, these ten directions are Self-equilibrium which reunites the inner and the outer senses of being with the natural, three-dimensional movement of Life. )

**The 1st dimension of Balance** ( within the skeletal relationship of wholeness ) is the vertical direction of extension, situated at the center-top of the head. This is the center of self-equilibrium, as it is one with Universal Equilibrium.

**The 2nd and 3rd dimensions** are the merging between the vertical and horizontal directions of space; ( they centralize ) the head in top of the spinal column ( atlas ).

**The 4th dimension** is the transversal intersection of centering; ( it expresses ) the natural three-dimensional extension between head and shoulder girdle, and between arms centralized at the throat.

**The 5th and 6th dimensions** are the horizontal and vertical merging that is the centralization of the shoulder girdle and arms; ( they express ) the natural three-dimensional free extension of chest and rib cage.

**The 7th dimension** is the transversal intersection of centering ( which expresses ) the natural centralization that is the natural length between shoulder girdle and arms, pelvic girdle and legs ( centralized vertically and horizontally at the solar plexus ).

This center expresses the natural three-dimensional extension of all the vertebrae of the spinal column; it allows for the release of the cervical, thoracic and lumbar curvatures of the spine ( as well as the natural three-dimensional suspension of the rib cage ).

**The 8th and 9th dimensions** are the horizontal and vertical merging that is the centralization of the pelvic girdle and legs, as they are expressing the expansional polarization of the whole body – the body as it is physically centered by the field of gravity in relation to the center of the earth.

**The 10th dimension** is the pelvic floor ( the central lowest center of gravitational grounding ) in which the whole Matrix of Balance is, ( simultaneously ) the highest centering of expansion that is Self-Equilibrium.

**The Matrix of Balance represents the one frame of movement that is the three-dimensional suspension of the human body, as it is directed by the natural momentum that is the whole movement of Life.**

**This is the frame of movement** ( which expresses ) the constant change of three-dimensional expansion; it engages the human-self, ( as unity in motion ) with the fourth-dimensional reality that is the Eternal Now.

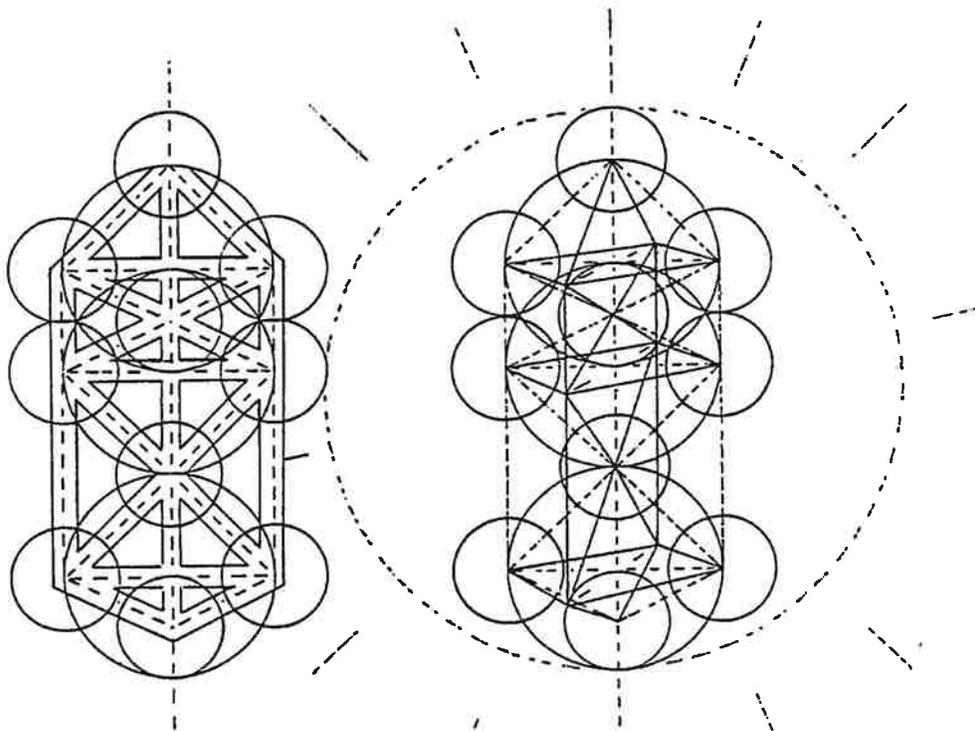

**Eternal Now** is the synchronized whole-movement that is the Universe, constantly renewing itself as the creativity of Life.

**This is the nature of Balance**, as it is the natural physical sense of self. It experiences the harmonious relationship among all the systems of function of the human body as the Health of Life.

**This is the unity of Balance**, through which the human body mirrors ( in simultaneity of correspondences ) the all-encompassing unity of the greater body that is Universal Balance – The Universal Body of Life.

**This is the reunion of wholeness-within-wholeness** ( which expresses ) the human being's communion with the Biorhythm of Life. This is the union of human existence expressing the physical harmony that is the balanced nature of Life.

THE MATRIX OF BALANCE:  
*The Most Ancient Symbol of Life,  
 The Tree Of Life*

**The Matrix of Balance** ( represents ) the 10 dimensions of expansion, the 7 centers, and the 22 paths of neurological connections that are the Equilibrium of Life. It is the most ancient of all symbols; it is called the "The Tree of Life."

**The Tree of Life** – the most ancient symbol of Life – was concealed within the body of Adam, the primordial man. Adam is called the primordial man because he is said to have been created in the image and the likeness of his creator- God. He is said to have been the first man; the archetypal expression of human, concealing within his physical body ( as essential memory ) the holographic imprint that is the unity of Life.

**This essential memory was adamic-nature.** It was created in the Edenic Garden of Life: where Adam, Eve, and the Wisdom-of-Life lived as the harmony of Balance ( the consciousness of ecstasy that was the natural unity of Life ).

As the most ancient of all fables of time tells, Eve, the natural physical creation partaken from the body of Adam, induced by the serpent of Wisdom of Life, engaged Adam in the act of eating the forbidden fruit of The Garden of Life.

The partaking of the forbidden fruit ( the apple of the Tree of Knowledge of Good and Evil of Life ) was the act that consciously disrupted the natural sense of unity that was Edenic Life.

In the instant of separation from the essential unity ( that was the natural harmony within the Garden of Light ) an instantaneous transposition took place: Adam, Eve, and the Wisdom of Life became separated as three individual expressions of Life.

This separation of three became a transposition/relenting of harmony within the whole movement of Balance. It expressed a form of delay within the whole experience of Life: three frames of references – three frames of time – occupied that which ( before ) was constantly One.

## THE CONSCIOUSNESS OF THE GARDEN:

### *The Ecstasy of Life*

**In the Edenic Garden**, everything was known ( simultaneously and instantaneously ) in the act of seeing. This was the given and created nature of whole Paradisiacal Life.

As wholeness of being, this was the form of seeing corresponding to the ecstasy of Balance ( as it was experienced as the constant changing whole-movement of the Biorhythm of Life ).

**This was the natural state of ecstasy** which expressed the natural form of knowledge. Consciousness, being fused to the act of knowing, instantly recognized all things as being the fullest experience of the creative, eternal, unfolding nature that is infinite Life.

**This was the harmony of paradisiacal existence:** the act of self-perception was not yet self-created as the witness of life; but it was without delay of time, ( the full knowing of its meaning, expressing the whole nature of its Life ).

Within the instant of separation from the Garden, the delay that divided the one Trinity of Life, became the interpretation of time. This interpretation represented a separation from the whole field-of-consciousness, the whole natural engagement mechanism of the whole- movement of Life.

This form of separation was now a form of self-discovered experience of life.

This form expressed a linear-interpretation of consciousness that ( by the act of no longer being united to the field of ecstasy that was the harmony and unity of Life ) projected another form of creation into existence, the creation that corresponded to the evolutionary nature of life.

As this separation between whole and evolutionary sense of life took place, the eternal Biorhythm of Life became the whole background of universal existence, upon which the evolutionary creation began to superimpose its self-discovered sense of life.

This self-discovered sense of life became the evolutionary field of creation, superimposed upon the whole field of unity that is Universal Balance. This became the field of evolution in which Adam and Eve, the mother and father of all human life ( along with the Wisdom of life ) embarked upon the journey of temporal discovery, to search in time and finally find, the knowledge and the meaning of The Tree of Life in this superimposed juncture of fields).

## THE SEARCH FOR KNOWLEDGE

**The search for knowledge** ( the form of creation of self-discovered life ) was to be the evolutionary discovery of the nature of Life. This was to be the search for knowledge through which ( at the completion of the voyage of time ) the whole family of man was to find in time "The Path of Return": the unity of the symbol of Balance that was the essential memory of the ecstasy of Life.

The searching for The Path of Return –The Tree of Life – ( which expressed the original Matrix that was to reunite human creation to the Garden of Light ) was to be the journey of human experience. At the completion of time it was to merge the whole of evolutionary creation with the natural Biorhythm of Life. This was to be the merging of Balance that would consciously reunite human-evolution with Universal-Creation —THE UNIVERSAL BALANCE OF LIFE.

At the completion of this journey ( as man reunites with the essential unity of Life ) the delay-reverberation of the three-frames of references of life ( The Trinity of Life ) will merge again with the movement of eternal Life.

This will be the merging that will reunite man's temporal interpretation of the moment of time with the natural moment that corresponds to universal Creation. It will express the natural existence of the universal unity that is the ecstasy of Life.

As this most ancient of all prophecies tells, the whole of evolutionary creation was to become completed in the fullness of time. The completion in the fullness of time would be when all human experience of life had finally displayed ( as a field of consciousness ) the full-scenario of self- discoveries that matched ( in mirror-reflection of correspondences ) the essential united nature of Life.

It was to be ( throughout this full-scenario of discoveries ) that human intelligence, ( by encompassing in understanding the experience of all time ) was to merge temporal and eternal – evolution and wholeness – into the unity of One.

This final merging of the history of evolution with Universal Balance was to occur throughout the fruits of every day life: as human nature ( through the trial and error involving the search for the unity of Life ) found naturally in the full knowledge of his wisdom that which was the original given – the natural ecstasy that was the Garden of Life.

In this rediscovery of the sense of unity inherent in the nature of Life, the essential nature of man and his whole humanity will reunite once again with all of Universal Creation: thereby re-entering the doors of the Edenic Garden, completing the voyage of time.

In this completion, the evolutionary creation ( that was the self-discovered nature of the linear-mind of man ) will reunite with the holographic eternal nature of consciousness that is the universal mind of God.

## THE WORKING MECHANISM OF EVOLUTIONARY CONSCIOUSNESS: SEARCHING FOR THE UNITY OF LIFE

In the instant of Life in which the wholeness of movement ( that was the trinity ) became fragmented into the separation of three individual interpretations of life, each one of these individual interpretations became also instantaneously separated, as three necessary senses of life:

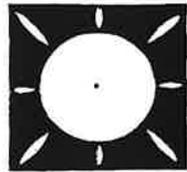

UNITED TRINITY

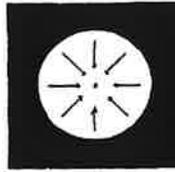

THREE INTERPRETATIONS

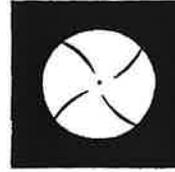

These necessary senses of life became the nature of evolution that ( in being now separated from the simultaneity of Life ) and in having to re-discover itself anew through the act of perception needed three frames of reference to sense itself as one:

EXTERNAL

INTERNAL

MOTION

1. It needed all that was external, THE ALL, from which the consciousness sensed itself in relation to.
2. It needed all that was internal, THE INNER sensations ( awareness of its being ), as it contrasted to the external sense of life.
3. It needed motion, THE CONSTANT EXISTENCE OF THE MOVEMENT OF LIFE: the movement that was the constant appearance of the evolving moment of life – that which reunited the external and the internal senses of being into the physical sensation of one.

Thus, it was through these three senses of self – ( THE EXTERNAL STIMULANT, THE INTERNAL SENSATION, and THE CONSTANT EXISTENCE OF THE MOVEMENT OF LIFE ) – that each being of creation simultaneously participated and created ( as evolving self- awareness ) the evolutionary perception that expressed the human, creative nature of life.

Inside of this triune mechanism of consciousness, the creative nature of life, ( the evolving sense of existence ) was self-discovery. This was a self-interpretation of life, (superimposed as "human reality" upon the whole biorhythm that was the constant whole field of Universal Balance ) which expressed universal Life.

This superimposition was the necessary creation of the linear, evolutionary unfolding of human mind. The human mind that **sequentially**, one-by-one, expressing the nature of intelligence of mind, named that which was perceiving through sound, as the word that reflected the feeling of each new discovery of life.

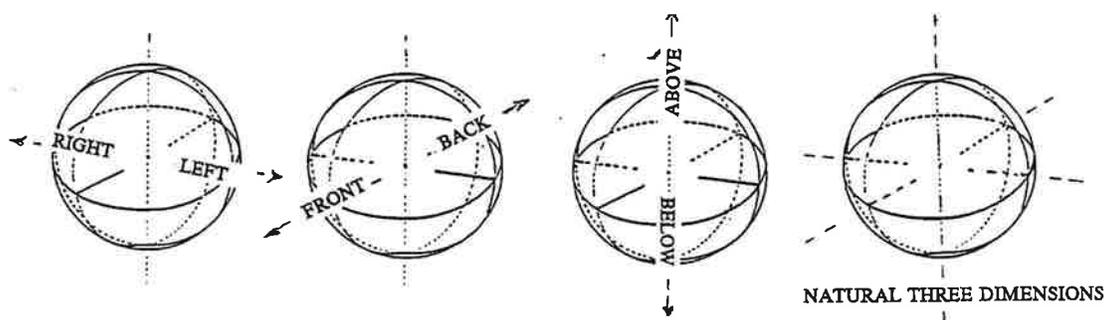

These words and these feelings became (then, with time) the language that provided the means of communication by which the consciousness of man escalated further discoveries in the progressive search to learn and make sense of the nature of life.

Thereby THE CONSCIOUSNESS OF EVOLVING MIND developed through this becoming the whole Trinity of Life. It expressed the consciousness of three-dimensions, forever searching to reunite with the all-dimensional unity that was the essential memory of the Garden of Life.

## WHOLENESS AND THREE-DIMENSIONS

Within the natural state of ecstasy that was the Edenic Garden of Life ( three dimensions, per se, the natural state of communion with the movement of Life), was also four-dimensions.

This was AN ALL-DIMENSIONAL STATE OF UNIVERSAL WHOLE ENGAGEMENT, in which the three-dimensions of space were not yet self-created as a conceptual abstraction, separated through the act of perception from the whole-movement of Life.

In evolution, through the creative perceptions/discoveries of life, these dimensions were named as three intersections, uniting six different directions of space: right and left; front and back; above and below.

These six different directions of space were the necessary denominations that linearly ( as three frames of explanation – ex-plane-action – ) could capture conceptually ( through the delay existing within linear mind ) the sense of oneness that is the true sense of unity -- thereby expressing the spherical nature that is the holographic reality of Life.

In truth, as Balance, ( within the immediate atomic-existence that is the eternal moment of movement / Universal Balance ), three-dimensions is the constant sense of unity reunited in simultaneity with the whole holographic sense that is the all of Life.

**This is the three-dimensional nature of Balance of the planet Earth**, as it is reunited three-dimensionally with all other planets: the Sun and the Moon ( forming the Solar System ) engaged to all the Solar Systems that make up Universal Life.

Within the linear, evolutionary nature of consciousness that was "the human interpretation of life," three-dimensions represented the one individual separation of the whole Trinity that became in time the individual self-awareness of life.

This individual self-awareness of life sensed and experienced its sense of self through its abstraction/separation from the whole sense of Life.

This abstraction and this separation were the imperative needs of the linear mode of consciousness based in evolutionary self-discovery – because only through individual self-experience could the whole scenario of perceptions ( that corresponded in mirror-reflection, to the ecstasy of Life ) be manifested in its integral essential form.

This was to be the integral form needed for the fusion of correspondences of Balance that ( AS THE COMPLETION OF TIME ) was to merge once again the three separated frames of existence ( within the individual self ) into the one holographic movement of Life.

This was to be the nature of evolutionary creation: expressing the evolutionary mechanism of consciousness, unfolding the self-discovered search for the unity of Life.

This was to be the necessary sense of self-separation existing within evolution, through which each individual sense of existence of life, evolved ( through the act of perception ) INDIVIDUALLY, COLLECTIVELY and ESSENTIALLY, thus making sense of the meaning of Life.

Within this mode of evolutionary consciousness, each sense of self evolved INDIVIDUALLY. Within the whole Biorhythm/background that was the simultaneous universal whole movement of Life, each being participated in and experienced the movement of Life as a singular experience – constantly interpreting the meaning of what one called one's life.

Each sense of life evolved COLLECTIVELY because within the same instant that was the simultaneous, all-inclusive relationship ( that was the Biorhythm of Life ) each individual experience of life affected and was affected by all other individual perceptions/projections of life.

Thus, in this participatory engagement between the individual and all individuals (between the human and the universal nature of life ) all beings of life co-created ( in synchronism ) the sense of reality that was the evolving sense of human mind.

Each sense of life evolved ESSENTIALLY because ( as it was the nature of the whole Biorhythm that is the Universal Balance of Life, to constantly synchronize and renew all things at once ) the sum total of all individual self-expressions of life became instantaneously – **within the atomic moment that is the unity of Life** – the essential **merging** and the **renewal** of the evolutionary field of consciousness, expressing the linear unfolding of the mind of man.

Inside of this triune mechanism of consciousness ( which constantly actualized the three senses of perception into one by the whole Biorhythm of Life ) were the three necessary senses of existence that represented the one sense of constant becoming, within the evolving consciousness of life.

In this trinity of "ALMOST" simultaneous occurrences, it was the function of THE ESSENTIAL SELF OF LIFE ( **as the synergistic reunion of all individuals of life** ) to sift through the learning process of the individual and the collective mind.

This sifting, provided ( as essential unfolding of reason ) the evolving, increasing escalation of awareness. This was the progressive nature of the evolutionary, human sense/reality of life, searching for the knowledge of Life.

This essential reason for **The Essential Self of Life** was the original imprint of wholeness ( the original memory of unity ), concealed within the human heart of each individual of life.

This essential memory was the Balance of Life and the remembrance of ecstasy within the Garden of Life that – as THE MEMORY OF WHOLENESS – concealed the sense of perfection.

Through this sense of perfection, consciousness – the now separated wholeness of Life – continuously found its impulse to unfold the evolutionary nature of life.

This escalation of consciousness was a form of sifting / a form of Balance that mirroring in compensation the whole nature of the Biorhythm of Life – constantly equalized the simultaneous perceptions of all individuals, into the constant new frame of existence that was the passage of time.

Thus, within the mechanism of evolutionary consciousness, the whole background that was the whole Biorhythm of Life ( which expressed the Eternal Moment of Life ) housed **simultaneously** THE INDIVIDUAL, ALL INDIVIDUALS and the essential compensatory balance of THE ESSENTIAL SELF, all synergistically evolving in the knowledge of Life.

This essential compensatory balance differed from the true Balance that was the Biorhythm of Life, in the sense that the evolutionary sense of life was a constant equilibrated compensation existing between all individual perceptions of life.

These individual perceptions escalated ( as a collective sense of awareness ) the evolving knowledge of life, as it was superimposed upon the true, whole-movement of Life.

## THE WHOLE MOVEMENT OF LIFE

Within the whole-movement of Life ( that was the Biorhythm of Life ) **Universal Balance** was the essential nature of Life.

**Universal Balance** was the atomic-moment of whole- movement: it encompassed universal existence, constantly appearing as the wholeness that was the natural ecstasy of Life. This was the natural state of ecstasy that was the universal Equilibrium of Life, simultaneously reuniting and renewing all of universal Life, at once.

**This was the whole field of Creation** that ( in a fourth-dimensional unity ) constantly centralized the human, evolving sense of three-dimensional life.

**This was atomic Creation: the continual fusion of the Universal Equilibrium of Life.**

In centralizing the individual, the collective, and the essential sense of life at once, it also provided the renewal of the whole field of evolutionary consciousness as the whole progressive unfolding of linear mind.

**This was the fourth-dimension.** The Fourth Dimension is Creation; as unity in motion, it encompasses the whole-movement of the ever-present Biorhythm of Life.

This was the dimension of stillness and motion, through which this triune separation (from the unity of Life ) was constantly renewed within the same instant of time ( and the same frame of movement ) that corresponded to the eternal united Principle that is Universal Balance.

This was the escalation of consciousness in which the reunion of the three separated senses of life was simultaneously ( without any delay of time ) the new appearing field of increased unity. It expressed the new, increased unity, from which the individual, the collective and The Essential self-remembrance of the unity of Life experienced Creation as the constant evolving nature of life.

The working of this mechanism of consciousness ( which expressed an evolving form of creation superimposed upon a whole form of Creation ) could also be described as a perpetual rolling of a film. This hypothetical / analogical film projects, moment-by-moment, the frame and movement of creational life – into an infinite boundless screen that houses the movement of all existence, synchronized as One.

This mechanism of consciousness can also be described as the workings of a fountain. In this fountain, the individual, the collective and the essential sense of life were constantly reunited as one – one whole pool of water. This was a state of wholeness that ( within the same moment of time ) renewed the creational sense of existence. This fountain simultaneously sprays, as three sources of water: three sources of life, becoming three new frames of references – operating as the one individual experience of life.

## **A PERFECT AMOUNT OF ENERGY, REFLECTING: *The Perfect Recycling of Consciousness***

**Before separation** ( inside of the whole motion that was UNIVERSAL CREATION ) the reunited nature of The Trinity of Life lived the presence of ecstasy that was the Edenic Garden of Life.

Inside of unity ( as unity ), Creation was then a finite amount of energy – a universal whole energy – that ( as the whole sense of existence, expressing a whole imprint of consciousness ) could not be augmented nor diminished.

This constant sense of equal existence was eternal then, because its constantly renewed frame was a whole sense of Life, appearing/renewing constantly as a whole sense of Life.

**This whole-field of constantly united existence was the field of Balance, encompassing all universal Life.**

The separation of the Trinity from the Garden of Light prompted the compensatory sense of evolutionary becoming. Through this motion expressing now the evolving consciousness of life, the field of Balance became relented by time.

This compensatory sense of evolutionary becoming was then a relenting of balance, a relenting of consciousness in which three frames of references occupied ( as three frames of time ) that which was before constantly One.

This occupation – A SENSE OF DELAYED RESISTANCE IN RELATION TO THE ETERNAL MOMENT OF LIFE – approximated the image of a flickering of a light.

This flickering was a continual fluctuation between **appearance** and **disappearance**.

**The disappearance** was the sense by which the individual, the collective and the essential sense of life, merged into the synergy of one – in order to constantly reappear as the new compensatory escalation of Balance, continuously evolving in the discovery of life.

**The appearance** was the instant renewal that was the new synergistic frame of reference of life, the new field of escalation of evolutionary consciousness from which all individuals sensed renewed life.

As evolution, the workings of this escalating field of consciousness was called **temporal** as opposed to **eternal**, because of the image-illusion of **appearance** and **disappearance** of life.

**Within the whole sense of existence** – the whole sense of consciousness that was the united movement of Universal Balance – Life was eternal because it was constantly the full, unchanging nature of its whole Life.

**In this whole sense of Creation**, Life was stillness-in-motion: an all-universal equilibrated state of motion, in which the harmony of all Creation changed as a whole kaleidoscopic hologram ( within each frame of movement that was each frame of time ).

**Eternity** ( the moment that is universe) by virtue of expressing the equilibrated Balance of all of Life, was then unity-within-unity: the constantly changing/changeless state of harmony, renewing the whole of Creation at the count of One.

This was the nature of universal Creation, in which **the One** was **the All** and **the All** was **the One**.

Within evolutionary creation, the relenting of The Trinity became the **appearance** and the **disappearance** of life. It also became the beginning of escalation of the evolving knowledge of life **in which the whole consciousness ( that was The Garden of Life ) transmuted itself forever in time throughout all the particles of Life.**

This was the whole voyage of time, in which the ONE INDIVIDUAL OF LIFE was to be the experience of THE ALL; and THE ALL was to be the experience of THE ONE.

**This was to be the fulfillment of the Circle of Life**, so that ( in all knowing /understanding ) the three senses of life could return – in full-knowledge – to the one whole engagement that is Universal Balance, expressing the ecstasy that is Life.

The nature of transmutation of all consciousness ( passing through all consciousness of life ) was to be the natural law in which ( by the time of its returning, by having transmuted itself throughout all individuals of life ) the one consciousness ( that was Life) was to know ( in full experience ) that which was the given. This was the all-knowing sense of Creation that was the inherent nature of paradisiacal Life.

## **THE WHEEL OF TIME; THE DREAM OF TIME**

The evolving nature of creation ( searching to discover the whole meaning of life ) was like a revolving wheel of time that projected the evolutionary renewal of discovered life upon the whole sense of Life.

This projection was a constant recycle/renewal of temporal life, searching to find the path of return – The Path of Balance – that was to return all human creation to the natural communion that is **eternal Life**.

This search for the meaning of life was ( then ) **real** and **unreal**, at the same time.

**It was real**, in the sense that it existed as physical-temporal reality ( as the human experience of Earthly life ) superimposed upon the eternal Biorhythm of Life.

But it was also **unreal**, in the sense that ( through the constant interpretations/creations of all individual life ) reality was a projected, self-interpreted, fragmented sense of life – constantly covering the real, eternally-whole sense of Life.

In this self-created reality, evolutionary-consciousness ( as it was in the process of searching for the fulfillment of life ) could not yet resolve the merging reunion of The Trinity with the universal movement of Life.

Thus – because of the state of growing transition that was the superimposition of human reality upon the eternal whole-movement of Life – the mechanism of consciousness of evolutionary-life was a **real/unreal** projection of time.

Thus – because of the **real/unreal** nature of human reality – evolutionary creation has been said to be based on "**The Dream of Time**."

**"The Dream of Time"** that was to be completed with the awakening of consciousness: through the experience of physically merging the human and universal sense of reality with the eternally present-movement that is the Universal Equilibrium of Life.

## THE TRINITY OF LIFE

In time ( within the dream of time ) the three frames of references ( which were constantly merging and renewing with the synergy of one ) were called "The Trinity of Life."

These three separated and yet inseparable senses of being occurred simultaneously as one.

"The Trinity of Life was also called The Holy Mystery of Life".

Inside of this triune chain mechanism of consciousness, it was the function of the essential self within each individual ( and The Essential Self that was the synergistic reunion of all individual selves of life ) to utilize the united constant nature of the whole Biorhythm of Life in order to make sense and meaning of the Wisdom of Life / THE ORIGINAL MEMORY OF THE WHOLENESS OF LIFE.

Inside of this structural becoming, it was the function of The Essential Self to constantly rebalance the evolving sense of life – as to bring about the cumulative process of reuniting the trinity of time into the whole Biorhythm of Life.

Within the fusion of these three separated perceptions of being ( into the original nature of One ) the whole of human creation was to merge once again with the ecstasy of Life.

When this merging is complete, the whole Biorhythm will be completed. It will be transformed into the whole integrated movement that is Universal Balance. **It will express Creation as the eternal nature that is the undivided unity of Love.**

Through this whole process of projected unification, The Trinity of Life was ( through this whole voyage of time ) the separated-inseparable senses of being that provided the unfolding of consciousness and the culminating reunion of the human evolutionary mind with the eternal universal mind of Life.

The Trinity (the three senses of perception of being which were discovering the meaning and reason of life) became named in time as....

Adam, Eve, and the Wisdom of life:

The internal sense of perception of life; the external sense of perception of life; and the central sense of being that is the moment of movement of life.

The Father, The Son, and the Holy Ghost.

The individual self, the collective self, and The Essential Self of life: all three escalating through a synergistic becoming, the renewal of the evolutionary consciousness of life.

That which was called temporal; that which was called Eternal; and the constant true moment of existence that is the Universal Equilibrium of Life.

That which was called **the masculine principle of life; the feminine principle of life;** and the constant center of whole motion that merged both as one.

That which was called earthly; that which was called heavenly; and the constant center of whole motion that is the natural, universal existence of Life.

That which was called the past; that which was called the future; and the constant eternally present moment of life.

That which was called death; that which was called birth; and the constant eternal unchanging nature of Life.

That which was called implosion; that which was called explosion; and the fusion-nature that is the three-dimensional reality of Life.

That which was called Gravity; that which was called Expansion; and the center (that is Self-equilibrium) mirroring ( in natural communion of correspondences ) the whole movement that is the equilibrated nature of Life.

In the beginning, this Trinity expressed the human sensation of life – THE CONCEPTUAL, SENSORIAL AND PHYSICAL NATURES OF LIFE.

Through evolution, these senses of perception were chained together forever, as the system of consciousness of time.

At the time of completion ( the completion of time expressing the end of evolution ) they were to merge ( in holographic communion ) with the eternal reality of Life.

THE TRINITY OF LIFE separated, as the evolutionary nature of man provided the necessary sense of contrast. This sense of differentiation became a three-dimensional human interpretation of consciousness. Through this initial separation and differentiation, humankind would rediscover a meaning. The meaning would unveil a miracle. The meaning and the miracle would return humanity/humankind to the Garden of Life.

**THE HISTORY OF EVOLUTION:**  
*The Escalation of Awareness*  
*And The Completion Of Evolutionary Mind*

**The history of evolution has been the history of all time**, the constant cumulative unfolding of human perception.

Human perception, that through the living experience of life, learned ( through self-discovery ) all of the principles and notions that were the earthly, evolving nature of mind.

Every thought, feeling, word expressing all moments frames of movement of human experience has composed the evolutionary history of man. As it was all recorded by the Biorhythm of Life, has therefore been the life of all of mankind.

The constant synergy and renewal of the Essential Self of Life provided a recorded history of all time. This recorded history is like an infinite tapestry of experiences/variations.

In life – as life – the tapestry became the ascending nature of perception, as in order to complete the voyage of time, human perception constantly unfolded, in its desire to fulfill the whole scenario of definitions.

At the time of its completion, the full scenario of mental perceptions ( definitions of self-discovered experience of life ) was meant to reunite human nature with the Eternal Moment of Life.

**This was the history of time:** the natural evolution of human-consciousness, fully involved in the process of searching for and finally finding the meaning and the fulfillment that is the unity of Life.

In this search, the constant force ( that impelled consciousness to escalate its perception towards the unity of Life ) was the original imprint of wholeness concealed within each individual heart. This was the imprint, the holographic whole picture, from which evolutionary creation was to unfold **the history of Love**.

## THE HISTORY OF LOVE

Within the Oneness of Being that was the consciousness of ecstasy of The Garden of Light, **Love** was the given that was also the natural sense of Life.

**Love** was the sense of wholeness from which all things were known simultaneously within the seeing of the eyes of Life.

Thus, In the first moment of separation from the ecstasy of Life, the beginning of evolution became the beginning of the voyage of time – the beginning of self-discovery for **the true meaning of Love**.

**The true meaning of Love** became forever safeguarded through the Universal Biorhythm which expressed The Equilibrium of Life. The Universal Biorhythm ( that through the Equilibrium of Life ) constantly actualized evolutionary consciousness towards the resolution of the meaning of the Tree of Knowledge of Good and Evil of Life.

Thus, through the whole voyage of time, **Love** was the nature, ( the one force of Creation, the one sense of Life ) that in searching to fulfill in completion the Trinity of Life was also to fulfill the individual, all individuals and The Essential Self of Life with the creative eternal unfolding reality that is the ecstasy of Life.

## INFINITE EXPRESSIONS OF LIFE

Through the history of evolution, consciousness searching for the unity of Life became **the recorded memory of all of time**. Through this recorded history, human creativity brought into presence all of the infinite forms of life expressions.

From the most simple of human experiences ( involving the simple act of everyday life ) to the most complex scientific discoveries of mind, all human expressions were constantly reunited in fusion through **The Essential Self of Life**.

**The Essential Self of Life** mirrored the nature of Universal Balance through the relected Biorhythm of Life. In progressive unity, the Essential Self of Life constantly equalized the evolutionary unfolding of all beings of life.

This constant flow of ascending consciousness was the constantly escalating equalization of compensatory balance. Atomically, as the moment and movement of Life, it disseminated ( among all beings ) the progressive sense of evolving life.

**This was the unfolding of evolution** that lasted forever in time. It reunited in continuity all of the civilizations of man.

**This was the unfolding of evolution** through which the human lineage of life perpetuated its escalating desire to reunite with the ancient memory of life. The ancient memory of life concealed the image and the likeness of the natural consciousness of Life.

**This essential remembrance of perfection** was the human-self consciously reunited with Universal Balance, experiencing the given nature of whole consciousness that is the ecstasy of Life.

## EVOLUTION

**In evolution, as evolution**, humankind progressed in its unfolding perception; it searched to understand the magical nature of life.

In its progression of unfolding perception, humanity's spiritual nature became the strongest force expressed. This spiritual nature was a yearning for the connection with what humankind has alternately called "UNIVERSE" and "GOD".

Humankind yearned to reconnect with what it called "GOD"; the essential Creator; the given Eternal Father; the mystery that concealed the purpose and meaning of human life.

Humankind's interrupted remembrance reconstructed "God", as he was thought to exist – only: in a celestial dimension; among all universal existence; involved forever in the orchestrations of the heavenly revolutions of time

This yearning, **the desire to know God**, became the strongest inspiration in human life.

Since humanity experienced **living** as a state of being perpetually grounded within the earthly planet of life, it projected its yearnings externally – through its mental imagining and manifestation of all symbols and beliefs all which underpinned religions.

Thus, all religions and spiritual beliefs were born with the desire to connect with the divine nature of Life.

All religions became the force through which the human spirit ( which was unfolding the intelligence of Life ) outpoured the depth of desire to discover the meaning of its existence in its essential desire to reunite.

The unquenchable spirit wished to reunite with an ancient memory. This desire was expressed in a longing to return to the Garden of Life.

**In the Garden**, natural Life was the ecstasy. Natural ecstasy was the re-engagement with unity and with paradisiacal Life.

In this longing for perfection, religion was the essential force that impelled all evolutionary creation to become – to become the creativity that expressed itself throughout all of human life, bringing into existence all of the arts and sciences of life.

**The arts and sciences of life** have been all of the forms of self-expression that ( as celebration of beauty and discovery of mind ) constantly uplift the human sense of life.

The arts and sciences have depicted all of the boundless feelings concealed within all human hearts. The arts and sciences have brought the nature of sound, color, literature, movement, physics, mathematics, and architecture into humanity's field of awareness.

Human expression soared to its height, through the art of sound – fueled by boundless, exuberant feelings. Manifestations of this renaissance included communication through the written word and the sound of the voice. This apex signaled a celebration of adoration and love – a longing desire for communion with the most ancient mysteries of life.

The summit of the studies of arts and sciences was produced by an innate desire for knowledge. Through the art of painting, the human expression of life recreated the feeling and color of life as it reproduced ( to perfection ) the physical form of light

Another culmination, in the marriage/merging of arts and science, was the art of movement. Movement expressed the kinetic sense that is the feeling of life. Through movement, human expression discovered the exuberance and the celebratory experience of love.

Some of the spokes of the wheel, from the joyous tuning and amalgamation of arts and sciences, were physics, mathematics, and architecture – all of the arts of life, through which human expression brought to the surface of life all of the essential principles that were called “THE NATURE OF LIFE”.

As an external exposition of life these were the discoveries that were constantly bringing ( into accelerated completion ) the full scenario of realized principles that was to merge humanity with the whole Biorhythm of Life.

## COMPLETION

**In time (as time)** the infinite tapestry ( that was the evolutionary expression of life ) began to become completed, as the intelligent perception of mind individually, collectively, and essentially awakened to an essential realization: the realization that the seemingly external exposition/discoveries of life were – in truth – internal ( the internal revealing of the consciousness of man. )

This was an essential discovery: as the intelligence of man began to see that an idea flourished in the surface of the imagination as a new perception of mind; that, then, created the tool for the external discovery of life.

Thus, the human mind ( in creative vision ) forged the magnifying glass that then served as a tool to see and discover the furthest star.

Thus, the external discovery of the sense of life came to be consciously perceived by the individual of life as the internal unveiling of his mind.

The individual mind was opening and expressing a new form of light, like a constantly unfolding flower. As the intelligence of life, this new form of seeing reinterpreted everything anew, as the new escalating consciousness of humankind.

Inside of this essential perception, evolutionary creation was an external expression of an internal discovery: an almost simultaneous inner and outer projection of life, through which human consciousness was constantly accelerating the completion of evolutionary mind.

Inside of this accelerated perception, man recognized that his human eye could never externally see the image of the form of life, without first internally taking the form in his mind.

Thus, man understood that everything he saw and named, as the external existence of his life, had a corresponding holographic internal image within the content of his own mind.

Inside of this recognition, the intelligent nature of human life saw that – through his evolutionary discovery – he was also discovering who he really was: projecting externally the mirror creation that gave meaning and sense of being to his life.

**Evolution**, like pieces of a puzzle, was finally becoming completed, through all of the projected notions of mind. The projected notions of mind were needed to reunite the linear nature of human consciousness with the holographic, all-encompassing, Universal Mind of Life.

This was to be the reunion that would merge the frame of time with the eternal harmony of Universal Balance. This reunion would forever erase the separation that existed between the field of consciousness that was evolution and the whole Biorhythm of Life.

**This new form of seeing** – the understanding of the internal/external projections/perceptions of man's mind – became increasingly accelerated as physics ( the word that expresses **the discoveries that are the nature of Life** ) revealed the suspended nature of **Balance** within all universal Life.

In perceiving the planet Earth to be suspended as -0- weight Balance in the heavens (perpetually connected in motion as the harmony of all celestial Life ) the human mind began to externally project the natural internal vision that corresponded to the whole form of its integral mind.

Thus, in comprehending the physical nature of Balance ( that the Earth and Solar System housed the nature of his life ) man's mind was finally externally projecting the natural principles of physics that were the physical reality of his life.

Inside of this correspondence of matching reflections ( which were beginning to merge the internal and external sense of life ) man was now becoming celestial. The density of human perception was becoming released by projecting externally the content of natural life. Human perception was also becoming united, increasingly accelerating toward the completion of evolutionary mind.

Through the simultaneity of Life, the trinity of humankind ( the individual; all individuals; the Essential Self of Life ) accelerated human perception toward the merging communion of the Trinity of Life.

Humankind's trinity approached its merging with life's natural biorhythm in unison. This was the first time ( in the history of time ) that consciousness was about to match in simultaneity of correspondences evolutionary mind with the Eternal Mind of Life.

## THE MERGING OF THE HUMAN MIND WITH LIFE

The final discoveries ( that prompted the merging of evolutionary mind with Universal Mind ) came into being as the human experience of life entered the discovery/creation of a new science called electronics.

This was the science that prompted the means of global communication (within all human life) as now – for the first time – all past experiences and all forms of recorded history became instantly available to all human lives.

This availability was now merging all notions of time and distances of space, allowing all cultures and modes of interpretations of life to become increasingly integrated into the one mind of Life.

This integration became accelerated through the invention called the computer, the creation of man that externally mirrored the internal workings of his mind.

Through this internal/external, creative projection ( that matched the nature of his life ) man noticed that the computer's function followed the same principles that are the mechanism of the triune consciousness of life.

Within the computer, the individual point of information ( and all individual points of information ) facilitated the essential synergistic nature of deduction – all within the one field – the whole Bio-rhythmical electrical field of life.

Thus, in the accelerated approximation of the merging of evolutionary consciousness with the atomic moment of Life, the computer became the external projection of the internal sense of mind.

The computer became the human invention, through which the intelligent sense of man externally projected ( as his creation ) the tool to comprehend the workings of his internal mind.

Through the computer, the sense of perception of human mind became increasingly accelerated. It began to experientially comprehend the meaning of the term simultaneity: **the act that embraces all things as they are all occurring at once.**

This comprehension and experience began to come into being as man became fascinated with the necessity of speed. The underlying motivation for this desire was man's urge to find means of reuniting the computer's three framed working mechanism into the faster merging of time.

Through this visual-mental comprehension of the necessity of the merging of time, human intelligence began to perceive that simultaneity – the "**all together now**" of Life – needed three frames of references of mind to encapsulate the one frame that was the moment of existence of time.

It needed the ALL, that was the mental symbol of expansion.

It needed the TOGETHER, that was the mental symbol of amalgamation within all expansion and.....

It needed the NOW, that was the mental symbol of the centralized motion of time.

It needed the ALL, the TOGETHER, and the NOW, to be "**the instant**" of ONE.

Inside of this mental-merging of frames of references within his mind, human-consciousness was beginning to merge with the holographic-nature that is the fusion of linear time with infinite time.

This was **the fusion** that was to prompt the merging of human consciousness —“The Trinity of Life” — with the whole universal Biorhythm that was the Eternal Moment of Life.

## THE FUSION OF BALANCE

The final discoveries that were to prompt the merging in fusion ( of the linear mode of consciousness with the all-encompassing, holographic mind of Life ) came into being at a specific moment of time.

This was the time in which the individual, the collective, and The Essential Self of Life were beginning to make sense of the memory experience of all time, by temporarily awakening to the touching of the true moment – thus experiencing **the infinite nature that corresponded to Eternal Life.**

This was perfect timing in the evolutionary unfolding of the mind of man, as **Eternal Life was Now:** through the self-evolved experience of many individuals of life – not an affirmation of mind, momentarily stopping the movement of life. This was a geometrical communion of movement that corresponded to the heavenly, harmonious Biorhythm that united all of celestial life at once.

**Eternal Life was Now** ( in the scientifically-evolved mind of man ) a mathematical equation of physics, corresponding to the regenerative principle that was the constant appearance/renewal of the miracle called Life.

**Eternal Life was Now** ( in the spiritually minded man of life ) not the idea of a time to come or a place to go, but the actual physical communion of the temporal interpretation of life with the eternal nature of Life.

It was inside of this pinnacle ( within the evolutionary escalating perception of mind ) that human intelligence awakened to the recognition that, in its touching the true physical moment of Life, ( **the fusion of time with eternity** ) it was also touching the central point of its being.

It was touching the central unity of Life: remembering the essential experience of ecstasy, in which all of Creation was constantly **appearing/renewing** as the moment of One.

## **THE ESSENTIAL SELF:** *The Matching Of The Remembrance Of Eternal Life*

Throughout the increasing individual and collective experiences of unity, **The Essential Self of Life** ( as it made progressive sense and reason of the experience of all individuals of life ) rejoiced but also suffered.

**The Essential Self** rejoiced because when it touched the moment of unity that corresponded to the infinite Eternal Moment of Life, it also touched the core of its heart, the core of its being, the intelligent nature that knew itself to be the center of universal Love.

But **The Essential Self** also suffered because ( as the time for the full merging completion of evolutionary consciousness was not yet ripe ) – as he returned from the experience of unity to the temporal, compartmentalized sense of time – he felt once again imprisoned within the realms of cause and effect.

He felt imprisoned inside of the sense of differentiation and dualistic form of perception of temporal mind which expressed the forever-grounded experience of human life.

Throughout the experiences of unity The Essential Self soared to the nature of his life, to his whole sense of awakening, to the feeling of his heart. This was the exalted sensation of freedom that became a sense of depression, as he returned into temporal experience – thereby entering the dream of time, interpreted now as his confined sense of life.

But also, throughout these experiences of fluctuation ( between his sense of freedom and sense of confinement ) **The Essential Self** ( as he continuously synergized all of the experiences of human life ) began to be increasingly certain that he was split between two interpretations of consciousness.

His split ( what he now knew to be the separation between his awakened and dormant sense of life ) was also mirrored in another split: a split occurring between what he called his human nature and divine sense of self.

**The Essential Self** began to see that this duality between higher and lower levels of consciousness permeated all senses of perceptions within his being. Furthermore, The Essential Self discovered that this dual-split was not only a separation of two, but also a separation of three.

Within this awakening/realization, **The Essential Self** increasingly perceived that ( he as all individuals who were the collective consciousness of life ) were split into three senses/perceptions of life.

This split was perceived as...

1. The human, temporal sense of life, which expressed the evolutionary unfolding of consciousness.
2. The eternal nature that was the memory of ecstasy, existing within the core of his heart. And.....
3. The actual moment, within his human existence, which expressed the physical reality that was the immediate experience of his life.

Inside of this new perception, **The Essential Self** knew for the first time that he was divided as three and that the past, the future and the present now were three separated senses within his life.

Inside of this realization, The Essential Self knew for the first time that what he called "the future of his life" was not ( in truth ) the nature of his true future, but the constant memory-projection of his mind from that which had been his past.

The Essential Self recognized ( for the first time ) that what he evolutionarily thought to be the vision of his future was a future projection based in the memory of his past.

Inside of this inner vision of true understanding, **The Essential Self** knew ( for the first time ) that for him to truly touch the true future of his life, he must touch constantly **the natural moment of Life**.

This was **the moment – the moment** that corresponded to the whole movement of Life. It expressed the unity that reunited the three senses of perception into One.

Due to the dawning presence of this whole vision, The Essential Self became aware of his primary essential role in life, for the first time.

It was going to be up to him, The Essential Self of Life – **the simultaneous synergy that united all individual experiences as One** – to merge ( in fusion ) all past history and projected future with the true present moment that is the atomic unity of Life.

He, **The Essential Self**, was now able to come to this conscious recognition, because – for the first time in the history of all of mankind – enough individuals were consciously aware of the possibility of reuniting the temporal interpretation of life with the eternal reality of Life.

It was this collective awareness ( reunited in fusion within the same frame of time; through the Biorhythm of Life ) that allowed **The Essential Self** to become fully aware that ( by synergizing and renewing all human awareness into one ) he was to reunite The Trinity into the fusion of One. And, through this act, he was to re-engage human creation with the wholeness of movement that was the ecstasy of Life.

In this instant of whole awareness within the realms of evolution – as The Essential Self, consciously recognized the truth of his life – all individuals ( in their own personal evolutionary sense of life ) became instantaneously, increasingly expanded into the wholeness of Life.

From this transcendental moment of the essential recognition of possibility and fulfillment of life, the nature of evolutionary renewal within all human life became increasingly speeded toward the unity of Life.

Thus ( through the synergistic nature of renewal, by increasingly approaching the natural communion of correspondence that was to be the merging of evolutionary mind with Universal Mind ) **The Essential Self** understood for the first time that – in reuniting the triune nature of his consciousness into one – he was not only reuniting all individuals of creation, but also reuniting the very nature that was the very core of his sense of self.

The Essential Self discovered that he was **the archetypal essential individual sense of life.**

Inside of this vision, **The Self** understood ( in one glance of time ) the true meaning of the word “simultaneity”. **Simultaneity** – the act that embraced all movements of life at once – was fusion; and fusion was the constant nature of The Moment that is Life.

Inside of this vision of whole understanding, **The Essential Self** saw ( for the first time ) that the thought of being bounded by temporal mind and freed by eternal mind were evolutionary perceptions, brought about by the very nature of relented time.

Inside of this revelation, **The Essential Self** understood ( for the first time ) the meaning of duality. Duality had been his interpretation of differences: the constantly shifting, balanced escalation of meaning, through which he innocently polarized himself in relation to the true nature of unity existing within the universal moment of Life.

Inside of this recognition, **The Essential Self** experienced the sense of pain of his heart. He, in one instant saw the history of all of time.

He understood the full meaning of evolution as being the evolving nature of human mind, searching through differentiation to find the unity of Life. He had forever searched for unity inside of an all-fragmented field of consciousness of life.

Inside of this vision which ( expressed a whole understanding of his past ) **The Self** experienced overwhelming compassion for himself and all individuals of life.

**Inside of this all-embracing sense of Love**, he recognized ( for the first time ) that – throughout all of his human evolutionary journey, as he was self-enclosed inside of the duality of life – his constant struggle to become had also been his constant recreation of his separation.

He had been ( innocently ) forever re-enacting the linear separation from the unity that is the wholeness of Life.

The Trinity within his life had been three frames of perception, linearly separating him from the unity of Life.

These three frames of perception expressed three different forms of seeing. In humanity's constant search for unity, these different ways of seeing innocently polarized the already perfect, ever-present moment that is the whole Bio-rhythm of Life.

Inside of this perfect recognition of the unity of Life, **The Essential Self** knew ( for the first time ) the true meaning of the evolutionary polarized perception of consciousness which interpreted the unity of Life. **Polarized perception** was an interpretation of consciousness.

It based its learning on differentiation. It superimposed a form of self-created reality upon the whole, atomic, Universal Biorhythm of Life. This self-created reality has kept innocently repeating and constantly reproducing the mirror reflection of evolving life.

Inside of this mechanism, duality has always been a form of polarized reality, a recycling of consciousness that has forever gradually evolved in search for the unity of Life.

It was inside of this mirror reflection, The Essential Self saw in one moment of time the whole field of consciousness of evolutionary life.

Centralized in this whole vision, The Essential Self understood the true meaning of good and evil – good and evil as it was concealed within the "The Tree of Knowledge of Good and Evil" that was in the Garden of Life.

**Good and evil** – the polarized expressions of life – that concealed the meaning of unity of life mirrored all forms of differentiation within the consciousness of man. All forms of differentiation were superimposed upon the unity of Life, as they were all occurring simultaneously, within the same instant that is the atomic moment of whole movement (that is the Universal Balance of Life ).

Inside of this all-seeing vision – inside of the equilibrated unity that reunited all things at once – The Essential Self saw ( for the first time ) how **duality** – the polarized sense of differentiation of life – was the form of compensatory balance which escalated through trial and error the Wisdom of Life.

**Duality** was the form of all polarized differentiations that was simultaneously re-creating ( as increased awareness ) the simultaneously evolving experiences of all individual perceptions of life.

Inside of this re-creational evolving human reality, the individual self-expression of life sensed himself as existing in relation to life through duality. Thus, innocently, this form of separation was the interpreted field of consciousness that gave him the identity of his life.

Inside of this field of consciousness ( while envisioning all of the dualities of life ) **The Essential Self** saw how the human individual expression of life ( thinking himself to be good ) thought to be evil that which he could not yet fully understand.

Simultaneously – within the same instant/frame of existence, the same atomic moment of time – the corresponding polarized projection ( thinking of himself also as good ) called “evil” that which ( in front of him ) did not agree with the meaning in his mind.

All polarized projections of consciousness were all forms of simultaneous misunderstandings, created by the individually separated perceptions of life.

They could not be stopped, because they were occurring simultaneously within the reality of Life. They were occurring simultaneously with the atomic existence that is Life, simultaneously with the universal Biorhythm that was The Eternal Moment of Life.

Within the realms of temporal evolution, the individual and all individuals lived simultaneously in fusion with the movement of Life.

In this simultaneity of existence ( as all perceptions/creations of duality were occurring within the same moment of time ) each and every individual creative expression of life projected to each other the meaning of their mind.

If this meaning innocently polarized the moment of Life ( through their misunderstanding of interpretation of mind ) the immediate creational reality recreated duality: the misunderstanding of consciousness that constantly was bringing into existence the state of confusion that it desperately wanted to eliminate.

Thus ( innocently, in the dualistic sense of life ) the thought-identification with goodness ( by the very nature of its polarized opponent ) brought into the existence of the moment of Life the division – the evil – that constantly polarized in ( separation ) human existence and the movement of Life.

Within the evolutionary mode of consciousness, all words were the creational nature of differentiation. Thus, the meaning of one instantaneously implied the existence of the other one. Thus, ( good by the nature of its evolutionary qualification ) existed as good in relation to evil; light in relation to darkness; temporal in relation to eternal. Every single denomination had a corresponding opposite sense of differentiation.

Inside of this vision of simultaneous interactions of misunderstandings ( which were based in the polarized perception/projection of consciousness ) **The Essential Self** understood, in the deepness of his heart, the meaning of evolutionary life.

**The evolving consciousness of man came into being as to finally reunite with unity.**

This was to be accomplished, by the fruits of one's knowledge, through the discovery of the meaning of the good and evil of life.

This was to be the fulfillment of the evolving consciousness of man, as humankind was to finally merge, in fusion with the Eternal Moment that is the whole movement of Life.

**Evolution** was like a self-enclosed, recycled mechanism, in which each of the individuals of creation was free to create and discover the meaning of his heart.

**This freedom** was inherent in the reality that – even though he might seem to be immersed in polarized reality – each individual was essentially sustained by the whole field that is the eternal atomic unity of Life.

**This atomic unity expressed The Eternal Moment of Life** that – being the true creative moment within all existence – could not be stopped or interfered with. It was universal reality, the whole movement that is Universal Balance, unfolding Universal Love.

**Freedom** was then the given, because it was self-contained within the same atomic instant that is Life.

**Inside of this atomically given existence**, each being of life was autonomously free, because he sensed himself externally throughout the internal sense of projection within his own mind. Thus, he was the creation of his own unfolding, as he was constantly evolving by the discoveries/interpretations of his own consciousness.

In this interpretation ( because of the oneness of Life ) all beings mirrored each other, in the search for resolution of their hearts. Humankind's ardent effort, in this regard, was meant to release all forms of confusion – and to regain the essential memory that matched the unity and harmony that is the ecstasy of Life.

The mechanism of evolution has been enclosed, in a timely manner, within a human evolutionary sense of life: expressing a form of consciousness that was constantly evolving through the discoveries of mind, in the search for the unity that was the same as the whole sense of Life.

Inside of this all-inclusive mechanism ( which expressed the evolutionary unfolding of the mind of man ) the whole sense of Life ( that was the whole field of Balance ) was constantly resolving the conflict of polarized mind: so as to dissolve and release the projected duality of consciousness.

Thus, the full resolution of consciousness was necessary, as its polarized existence perpetuated the constant delay within the union of the trinity of Life.

Inside of this revelation, **The Essential Self** experienced enormous compassion and love for his life. He acknowledged the antiquity of his lineage and his ancient memory that encompassed all of humanity as the voyage of all of time.

**Inside of this Love**, he recognized the overwhelming amount of time it has taken for human expression to bring about the synergistic perception that can witness – in natural understanding – the working mechanism of consciousness that is the evolving nature of mind.

**He, The Essential Self of Life**, was the recorded memory of all individual senses of life. He was the balance redeemer – the renewed sense of life.

Inside of this all-encompassing vision, **The Essential Self** embraced himself and all the individuals of life, in the thankfulness of recognition – that knew that the time for the completion of evolution was becoming ripe.

Now, as he understood the nature of freedom inherent in the atomic moment of Life, he also understood the true nature of his free will.

Now he could ( for the first time ) – in the essential synergy that is the central pool of his heart – absorb ( in free will ) the polarized projection existing within evolutionary mind.

He could release the individual and the collective nature of consciousness into the new moment of experience of united life.

Thus, as the love of life, within the next moment of time, the whole consciousness that was human life entered a new approximation of fusion with the eternal Bio-rhythm of Life.

Inside of this new, renewed field of consciousness ( which approximated the unity of Life) many individuals became instantly self-conscious of the nature of projection existing within the unresolved, polarized mind of man.

Inside of this understanding, each of these individual expressions of life began to release, also in free-will, the constant polarized reaction that was the ancient memory of the evolving nature of mind.

Within this simultaneous event ( as all individuals, in all forms of understanding, began to absorb the new Balance of life ) **The Essential Self** also became increasingly accelerated in the fulfillment of his function: the merging of the Trinity of Life.

In this increased acceleration towards completion, **The Essential Self** understood deeply how the polarized nature of evolutionary consciousness ( in its projection of goodness, by the nature of its affirmation ) innocently re-created evil – and how evil – ( by the nature of its affirmation ) re-created good.

Inside of this all-perceptive vision, The Essential Self understood ( for the first time ) that he – having been always polarized as the nature of evolutionary life – did not truly know the nature of his heart.

He recognized that – as good and evil had always been the constant escalation of Balance toward his knowledge of life – he did not know one without the other. Thus ( having been forever enclosed within the opposite mirror-reflection of mind, as **the sense of separation that recreated the feeling of his life** ) he did not know the true meaning of his love.

Inside of this recognition, **The Essential Self** amalgamated ( in one instant ) all of the collective nature of his polarized human perceptions of life and dived deeply into the core of his heart.

**Inside of his heart**, at the center/core of his love, **The Essential Self**, for the first time in full-awareness, willingly absorbed all good and evil at the count of One.

This time, **The Essential Self** absorbed all good and evil – not as the equalizing, compensatory balance between all the individual projections of likes and dislikes within all of mankind – but as the true Balance of equal absorption of natural Life.

Inside of this natural Balance he saw that, by his conscious reuniting of all mental projections within the central core of his heart, he was now able to unveil the true meaning that was the essential intelligence of his heart.

Inside of this revelation, **The Essential Self** felt ( for the first time ) that goodness was not an attribute within the nature of his life, but goodness was intrinsic with what he called himself – intrinsic with what he called his life.

With this essential understanding, he rejoiced in love and in the natural goodness of his life; he merged deeply into the core of his heart.

**Inside of his heart** – inside of the central core of his life – he willingly permeated all of evolutionary creation with the new consciousness of life.

Inside of the newness of life, as **The Self** absorbed and released all of the temporal ideas of good and evil of life; he saw in one vision the whole history of his evolutionary mind.

The search for unity, the history of his life, has been a constant battle between what was thought to be good against what was thought to be evil: a re-creational drama of time that – as polarized light and darkness – was the history of the evolutionary unfolding of his human mind.

Inside of this vision, **The Self** witnessed the history of the evolutionary nature of mind: the escalation of evolutionary consciousness making sense of the experience of life, searching constantly to rediscover the truth of love.

Inside of this most ancient battle, all of the civilizations of time have risen and fallen, always projecting ( through conflict and resolution ) the creational unfolding of consciousness toward the unity of life.

Always, the intelligent reason ( that is the essential nature of human life ) has brought ( to the surface of evolutionary reality ) the renewed vision. This renewed vision said that (one day, when the time was to be ripe ) man would awaken from the dream of time.

And, it also said, through this awakening, man and his humanity would return temporal creation to the infinite communion that is Universal Balance expressing The Eternal Moment of Life.

Inside of this exalted perception ( of the meaning within the essential nature of his life ) **The Essential Self** experienced the pain existing within the longing for unity of his heart.

Through the deepness of this longing pain, he remembered all of his past experiences of life. He remembered the all of evolution, as he perceived the polarized mechanism of cause and effect, impelling human creation to become.

He remembered and experienced the faith that has impelled humanity throughout all of time. He remembered the constant essential search for the wholeness of life.

Inside of this whole remembrance ( in the exalted recognition of the history of love ) **The Essential Self** became the full perception of the meaning behind the drama of time. **The Essential Self** understood ( for the first time ) all of the past confusion that had been the despair of his life.

**He, The Essential Self** ( living simultaneously with all individual perceptions of life ) had also been separated as three senses of life. He also has experienced the sense of confusion that came as the result of the relenting of the unity of Life.

In this relenting, that which was unity became a separation of three: a linear interpretation of time, existing between what each individual sense of life thought to be the mental, the emotional, and the physical senses of his life.

Now ( inside of the vision of all understanding ) **The Essential Self** saw how ( inside of the individual's polarized sense of reality ) the interpretation of life – having always evolved throughout all of the confusions of time – was based in a mental sense of survival.

This sense of survival expressed a sense of self-preservation that – by being based in its separation from the eternal nature of Life – could not match ( in simultaneity of correspondences ) with the true emotional feeling of the heart and the true eternal physical moment that was the Unity of Life.

Inside of this sense of conflict, the emotional sense of life ( as it was in constant confusion ) had to constantly delegate the feeling of the heart for the greater purpose of the priorities of mind. Inside of this mental and emotional inner battle, the natural sensation of being ( that was the physical moment of life ) could not live simultaneously as One.

Therefore, the body – **the physical form designed to be the living presence of Life**, having no purpose for being – became the garment of time, for the recycling of time.

This was the sense of confusion, within the three senses of being, that was his life.

This was the separation within the triune nature of Life: by which the individual human expression of life ( self-enclosed within the evolutionary recycle of life ) was the constant reverberation of resistance within his three senses of being. They were constantly searching to make sense of the united nature of Life.

Inside of this vision ( which expressed the triune nature of his Life ) **The Essential Self** experienced how the longing for the unity of Life was the longing for Love: the longing that has searched forever for the reunion of The Trinity of Life.

**Inside of whole feeling ( which expressed the longing for the unity of Life ) he embraced himself in Love and merged with the central core of his being. He willfully renewed the All of Creation with the compassion of his infinite heart.**

As he appeared as the surface reality of consciousness ( experiencing a new integration within his evolutionary life ) the increased level of unity augmented the clarity within his sight. **The Essential Self** understood how the confusion of evolutionary life reflected in his own self the triune discrepancy: existing between what he called his remembrance of unity; his search for knowledge; and the natural moment that was the physical experience of his life.

The triune discrepancy was the conflict that existed between what he called his temporal nature, his eternal nature, and the natural moment that was the very existence of his life.

This was the conflict that existed between what he considered to be his physical nature, his divine nature and the essential reality of his life.

This was the conflict that existed in his identification with the light, his desire to be free from darkness of mind, and the reality that was the moment within the consciousness of his life.

Inside of this vision which expressed the triune conflicts that existed within his human life, **The Essential Self** understood more deeply how what he had called dualism was ( in truth ) the nature of three separated perceptions within his life.

Now ( inside of unity, **inside of the vision of wholeness of his Life** ) he saw how light innocently projected itself upon darkness, and darkness projected itself behind light.

He saw how the nature of evolutionary mind ( expressing the mirror-reflection of polarized consciousness ) did not let human perception recognize that darkness could never be perceived as such, except by virtue of that which is light.

Inside of this vision of whole understanding, **The Essential Self of Life** recognized ( in one instant of time ) that darkness could never see darkness except by being the light.

The **light** had always been the consciousness that he had identified as himself. The **light** is his sense of self, **The Essential Self of Life**. The **light** is his central awareness of Life that was now ( for the first time ) recognized as being the central physical experience of Life.

Inside of the pain that understood all forms of confusions existing ( within his evolutionary mind ) **The Essential Self** merged all human existence, at the count of One.

With renewed compassion he released the separated nature of the three senses of life.

Inside of this unity ( inside of the united moment of Life all individuals of life who were experientially ready to release the burden of time ) began instantaneously to awaken to the new seeing, that was the unity of their life.

Within the renewed surface of life, **The Essential Self** ( in natural exhilaration ) saw how the time was now ripe. The time had finally come for him to release all misconceptions that veiled ( in separation ) the natural unity of Life.

Thus, in the certainty of this knowing, he dove deeply into his heart. His Love deeply augmented the new expansional experience of unity created by all individuals of life.

Inside of this new sense of wholeness, **The Essential Self** experienced the nature of Balance for the first time.

Inside of the unity of Balance, **The Self** understood ( for the first time ) that he ( being the collective memory of all individuals, unfolding the consciousness of time ) had also always experienced a sense of separation between what he thought to be the memory experience of the past; the projection of the future; and the present moment that was his life.

Now ( inside of the unity of Balance ) **The Essential Self** understood ( for the first time ) that – throughout the entire history of evolution – ( because of the self-enclosed circle of consciousness unfolding inside of the dualistic nature of mind ) his sense of future had also been always based in an evolutionary projection of the past.

He/ **The Essential Self of life**, as he mirrored the experience of all individuals of life, had lived constantly inside of the mind of time. Thus, the nature of the true moment ( the moment that corresponded to the true universal futuristic reality of Life ) had never been touched.

Now ( inside of all understanding ) he saw how the reverberation between the three separated senses of life ( The Trinity of Life ) did not allow for the touching of the true moment of Life.

He saw how the reverberation- delay ( of the three frames of time ) separated each individual human experience of life from the central merging with the Eternal Moment (that is the Biorhythm of Life ).

Within this all-encompassing vision, **The Essential Self** recognized ( in one eternal moment of time ) how the whole history of evolution has been the history of all time.

**Evolution** has been the self-enclosing system of dualistic creation that ( bounded by the compartmentalization of life ) was separated from the Eternal Moment that was the constant unity of Life.

Imprisoned inside of the dualistic design of mind, the experience of his life had been a self-enclosing of consciousness that ( as reverberation ) expressed itself as a compensatory balance based in structural mechanics. It involved the resistance of three frames of references of life, constantly searching to become one.

Inside of this understanding, **The Self** experienced the whole sense of compassion existing within the core of his heart. In exhilaration he recognized that the time was ripe for him to merge deeply all of Creation into the natural unity of Life.

It was in this moment ( as **The Essential Self** entered the center of his existence which was **now the center of atomic Life** ) that he discovered ( for the first time ) that he had an essential belief-system that was deeply rooted within the ancient memory of his human life.

He had thought of Balance ( his encounter with the unity of Life ) as being not of the nature of this life.

As ( within the separation-delay of The Trinity of Life ) evolutionary reality could not touch the true natural moment that is the Universal Balance of Life, he – the synergistic reunion of all consciousness searching for the unity of life – also could not touch the moment that corresponded to whole existence of Balance.

Balance had been for him not the sense of unity that is the movement of Life, but a mystery: self-enclosed in the constant compensation of unbalanced non-equilibrated forces, searching through confused premises to find the harmonious true movement and feeling of life.

Now ( inside of the experience of unity, inside of the experience of Balance of Life ) **The Essential Self** recognized the labor that had been his separation from the united whole movement of Life.

This separation had been a sense of reverberation among his mental, emotional and physical senses of self in which he ( **The Essential Self of Life** ) as well as all individuals of life – had to constantly labor in the search to gather the bread of his everyday life.

He remembered that ( within the fable of time ) it had been said that man was going to regain the knowledge that was the unity of his life through the labor of his life.

Now ( inside of the mirror reflection of unity – **at the center of unity within all projected mind** ) – he saw that his everyday labor was his own innocent self-projected separation from the natural state of perfection that was the true movement of his life.

Now ( centralized in the field of Balance ) **The Essential Self** was the vision that understood the whole of his recorded memory of time. He understood how all individual expressions of life ( bounded by the labor of everyday life ) innocently perceived human perfection – the living completion of one's heart – as if it existed outside of the physical realms of life.

As the individual of earthly existence could not match within the reverberation of time the unity of Life, he believed physical nature to be judged as not being able to house the unity of Life.

Now – inside of Balance – **The Essential Self** was inside all understanding. He saw ( for the first time ) how evolution – the driving force of consciousness, searching to find the unity of Life – carried ( within its living moment ) the eternal seed of Life.

He saw how ( within the ancient memory of perfection, rooted at the central core of each individual's heart ) there was a knowing that knew itself to be eternal and thus constantly in union with the existence of God: **God**, the intelligence that was the holographic imprint of the form of his life.

Now, **The Essential Self** understood how the individual human consciousness ( when bounded by the dual physical experience of life and finding himself in the despair of the constant battle of life ) out of the pain of the heart, projected himself externally, thereby creating imaginary worlds of perfection. These were the worlds of gradations of universal perfection: the many mansions of mind, where The Garden of Life was not in the physical planet of life, but far away in the natural projection of ethereal creation.

This innocent natural projection was the Promised Land, where all beings were to live the everlasting harmony that corresponded to The Garden of Life. This was The Edenic Garden, where life existed as the living communion of Self with God.

Inside of this mental vision of perfection ( projected by the human self as being outside of the physical moment of his life ) the physical expression that was the earthly life of man was then imperfect. Life on Earth, was a sort of school where one learned, through trial and error, the lessons of time and then evolved into the worlds that corresponded to the transparent expressions of spiritual life.

Inside of this innocent misunderstanding ( that separated the promised Garden from the earthly land ) **The Essential Self of Life** experienced the longing of all evolutionary projections of time. He gathered all sense of distant creation and the earth bound sense of physical life and merged both deeply inside of his heart. Thus, **The Essential Self** gathered all distant projections of time and all physical forms of life with the natural moment of Balance of the Biorhythm of Life.

**Inside of Creation** ( as he was finally merging with the movement of Life ) **The Essential Self** recognized ( in the center of Life ) that – in innocently judging the physical form of his life – he had also judged the feminine nature of his life.

Inside of this recognition, he understood ( in whole vision ) that physical existence became judged in the first moment of evolutionary life: when Adam, Eve, and the Wisdom of Life began to search for the knowledge that was to reunite all human creation with the life of Love.

This judgment ( **the temporal nature superimposed upon the eternal Biorhythm of Life** ) was also interpreted ( by evolutionary consciousness ) as the physical form superimposed upon the ethereal form of life.

In this physical form, Eve/the mother of all Creation brought into existence the evolutionary consciousness of temporal life. This was the temporal life that ( as physical creation ) was to learn and rediscover ( throughout the experience of all of time ) the fusion of Balance.

This was to be the fusion through which physical reality was to match in simultaneity of correspondences the universal, Eternal Moment of Life.

Inside of the physical form of life, Eve/the mother of Life – the Feminine Principle that gave birth to all Life – became judged as the one who prompted creation with the desire to become.

Now ( inside of the central merging of Love ) **The Essential Self** saw ( in one whole vision ) how ( within the first instant of the separation that prompted the evolutionary sense of life ) there was also imprinted ( by the very nature of the whole movement of Universal Balance ) The Path of Return. This Path of Return was to involve the whole history of evolution: bringing into completion the voyage of all time, through the merging in Love of the Trinity of Life.

He saw how ( throughout the fruits of knowing, through earning the bread of every day life ) human nature had been constantly merging with the knowledge, the wisdom, and the love of Life.

Now he/**The Essential Self of Life** ( in the full awareness of his heart ) was to synergize humanity, through the actual physical experience of Life: thereby reuniting all of Creation with the full consciousness of Love.

**Inside of this realization, The Essential Self of Life** embraced his mother/ the Eve of all time, honoring ( in his heart ) the mother of all individuals of life.

**Inside of this Love**, he experienced how the Feminine Principle of infinite life was also the Universal Mother of Life. The Feminine Principle was also the physical form of all Creation – the Alma Mater – that housed his life.

**Inside of creation** ( in the central being of his heart ) **The Essential Self** became the Feminine Principle of Life. In one moment of time, The Essential Self recognized that, throughout all of his physical life, his separated perceptions of life had denied him the true central experience that is his earthly life.

Now, **The Essential Self** realized that when he was bound by his own biomechanical reverberation ( which expressed three separated frames of references, in relation to the united movement of Life ) he could not truly experience his natural communion with the Physics of Life.

**The Physics of Life was his simultaneous sense of connection with all Creation.**

From the Physics of Life, **The Essential Self** was now experiencing that the center of his motherland ( the planet Earth ) was also simultaneously the center of the Sun; the center of all planets; the center within his own heart.

He did not know that, in the natural continual existence of Universal Balance ( in the fusion of the universal heart of Life ) the planet Earth had always been the Garden: the Edenic Garden of Life.

Now ( as **The Essential Self** experienced himself being immersed in the unity of Life ) he understood how ( in the past, inside of the evolutionary interpretation of time ) The Garden of Eden was constantly projected by human consciousness as being far away in another realm of creation – distant from the earthly physical moment of life.

Now ( in the presence of the Physics of Life ) **The Essential Self** saw ( in one instant of time ) that every being of consciousness has always existed from the first moment of time. **This was the first moment of time in which the finite amount of energy that is universe – that which could not be augmented or diminished in time – began to recycle itself forever in time.**

He saw how each being – **the one individual consciousness of Life** – never, for an instant, missed a frame within the movement that is physical Life. He saw how the original pattern of holographic Creation ( which expressed the genetical make-up of the image and likeness of God ) had transferred itself forever through the continual motion of Life.

**He saw how this unbroken lineage of Life had brought constantly into presence the ancientness and the renewal of consciousness, discovering itself as Life.**

Within this vision of whole understanding ( centralized now in the full consciousness of his presence ) **The Essential Self** kissed the ancient soil of The Garden / the motherland.

Simultaneously, **The Essential Self** became the synergy of all evolutionary life. He merged, in reverence, the whole physical planet Earth with the core of his heart.

Inside of Creation ( inside of the whole field of Love ) **The Essential Self** became now, for the first time, his true physical sense of Life. Inside of absolute physicality, he realized ( for the first time ) through his Alma Mater – **the physical nature of his Life** – that the entire makeup of his physical body was all made of stardust.

Physicality – the form of his nature, the form of his life – was only made of one substance: the substance of **Love**.

Now, at the center of the physical reality of life, **HE/The Essential Self** – the experience of all evolutionary expressions of life – could understand ( in full awareness ) how the clay of the judged earthly existence of time was ( in truth ) the transparency of Life.

Inside of the physical merging of all understanding, **The Essential Self** experienced the unity of all things at once. In Love, he merged with Universal Balance, as he now recognized it to be the living nature of his life.

At the center of Universal Balance ( which was now naturally reunited with his life ) **The Self** experienced ( for the first time ) how Life, as Balance, was the central fusion that reunited all Creation at once.

He experienced how each moment was a constantly new appearance: the whole appearance of unified Love.

**Inside of Love/** immersed in the Life of Love, **The Essential Self** recognized that he had inherited an evolutionary belief. This belief was based in the notion that, within the realms of time, he could not merge with his creator's love.

Immersed in this realization, **The Essential Self** saw ( in one vision ) the entire history of the evolutionary nature of his mind.

Within the evolutionary nature of life, the individual human experience of life, ( as it concealed within the core of its being the eternal seed of life ) always intuitively knew itself to be **God**. But, within the confusion of time ( as the dual search for the reality of life could not touch the true moment of Life ) the desire for unity projected itself outside of physicality, to an external sense of life.

Inside this projection, **God** existed in the distant realms of creation, an untouchable point, unreachable to the physical imperfection that was human life.

This was the innocent belief of “the dream of time” in which, throughout the history of evolution, an extraordinary scenario of becoming was projected. This was a projected world of evolutionary, spiritual unfolding that – as infinite gradations of distance of attainment – represented the forever-traveling, forever-aspiring voyage of evolutionary life.

Now, **The Essential Self** ( inside of Life, as the center of the physics of Balance that was the very nature of his life, ) saw in one vision The Trinity reunited as One.

The Trinity was like a sphere, with its center split in half. At either side of the splitting center, was a mirror-reflection projected throughout the furthest distance of time. At one side of the mirror-reflection were the infinite gradations of refined spiritual consciousness, expressing degrees of unfolding toward the perfection of evolutionary life.

At the other side of the mirror-reflection, were the infinite gradations of simple and dormant levels of consciousness, aspiring to become.

Inside of this whole vision of self-projected existence, **The Essential Self** understood for the first time how ( due to the necessity of contrast, existing within the evolutionary unfolding of mind ) the hierarchy of infinite spiritual unfolding corresponded ( in mirror-reflection ) to the simple human nature of life, being innocently grounded by the judgment of time.

Inside of this vision, **The Essential Self** saw how – through the whole scenario of evolutionary unfolding of life – one side of the spectrum was constantly re-creating ( in the simultaneity of correspondent polarities ) the other.

Thus, the escalation of the divine nature of man was as the necessity of evolutionary differentiation, grounded in the simple interpretation of the consciousness of man.

Inside of this whole vision, **The Essential Self** witnessed ( for the first time ) how all polarized senses of differentiation were constantly re-creating themselves in time, as the necessity of time.

This re-creation was forever perpetuating into subtle, infinite degrees of spiritual attainments: the mechanism of evolutionary consciousness that chained human nature to the necessity of contrast.

Inside of this understanding of the working mechanism of evolutionary life, he/**The Essential Self** ( as the expression of all human life ) was also to experience ( through the fluctuating pain and ecstasy of life ) the constant escalation of consciousness toward the unity of Life.

Inside of this vision; inside of the deepest pain of his heart; understanding the longest traveling that had been the journey of his Love, **The Essential Self** merged with all of Life: absorbing in time the pain and the ecstasy of all evolutionary life.

Inside of the center of existence ( embracing all the confused interpretations that were the polarized projections of the separated Trinity of Life ) he merged the whole spectrum of evolutionary consciousness within the center of his heart: renewing all of Creation with the united Balance of Life.

Now inside of the central movement that embraced the unity of all Life, **The Essential Self** recognized ( for the first time ) that this was the last layer – the last veil – that bound him to the evolutionary projection of time.

Now, as the center of the unity of Life, he was for the first time **self-autonomous**, finally free from his dependency to all the individual experiences of life.

Now he could merge, at will, with his center and essentially dissolve every self-created limitation, every projection of spiritual gradation, that separated human life from the true freedom that was The Eternal Moment of Life.

Thus, inside of this knowing – as he felt himself for the first time inside of Creation, centralized in the whole movement of Life – he proceeded to surrender to the center of his existence, the central core of his heart.

Inside of the center core of his Life, he fused the whole of Creation into the point in which all past experience and all future projections dissolved ...where they became present as the **centralization** that is the eternal **moment** of Life

Centralized in his nature; centralized in his Love; now in the presence of The Eternal Moment of Life, **The Essential Self** saw himself for the first time. And, to the astonishment of his mind, he recognized that he was the recorded memory of an evolutionary belief based in the thought that – in seeing God – he would no longer be alive.

Now, at the center of seeing that was the infinite unity of Life, he saw in one vision that all that he had called existence was the content of his own mind. He recognized that what he thought to be external was also internal, and that the three senses of self that were his identification with life have always been One.

Inside true vision, **The Essential Self** experienced the vision of his life. He recognized that every single thought that he had gathered throughout the evolving sense of life, corresponded as a feeling to a **sound**. This sound was a WORD that was also a visual symbol existing within his mind. Through these symbols, he made sense of his discoveries, as his search for the meaning of his life.

He discovered that every word – **the sound of his feeling of life** – had a corresponding visual image. Through the corresponding visual images, everything that **The Essential Self saw** as being EXTERNAL was first mirrored INTERNALLY, as the source of the vision of his mind.

Now, in the awe of his heart, he understood that the external ( that which he had called his evolution ) had been the natural unfolding of seeing. Thus, his evolution had been nothing other than the internal unveiling of the content of his whole mind.

Inside of this startling vision of the whole spectrum of his human mind, he understood how the external discoveries were perceived as new: by the release unveiling within the evolving sense of his essential mind.

Now, centralized in the mirror reflection of his own mind, **The Essential Self** felt deeply the sadness of time. In one glance he understood all of the individual and collective struggles that have brought the history of evolution to this moment in his life.

He experienced, as the feeling of his heart, how the polarizations of corresponding dualistic projections created ( as the earthly reality of life ) the continual reverberation of time. Thus, he saw how the mind of time ( wanting to resolve all conflict ) innocently brought into the presence of the moment the re-creation of the conflict that it desperately wanted to erase.

Seeing this all-involving misunderstanding ( unfolding the dream of time ) **The Essential self** felt deeply the Love of his heart. Inside of his feeling, inside of his Love, he acknowledged the infinite nature of his evolving mind. He acknowledged the consciousness of becoming; he acknowledged the voyage of all time that ( which linearly, through the moment-to-moment experiences of his daily life ) had allowed him to finally arrive to the unity of sight.

It was here – centralized in the unity of his sight – that he embraced, as One, all the memories that were the experience of all of time: honoring himself and all human creation in the fullness of Love. It was here – at the center fullness of Love – that he was absorbing the ancient longing that was the history of his being, experiencing the nature of evolutionary mind.

Now ( at the center of the whole spectrum of mind ) **The Essential Self** was for the first time in the presence of his own image and likeness: experiencing himself as the center of the mirror reflection of the whole content of his evolutionary mind. It was here ( in the center of his all-seeing eye, witnessing all reflections of himself at once ) that he knew for the first time, in time, that what he had called God was the creation of his own mind.

**The Essential Self** realized that he ( being the all-encompassing expressions of mind, living the constant essential nature of all human experiences of life ) had always projected externally the internal perfected creation that was the deepest image of his Love.

Now ( in the moment that revealed the full panoramic vision of his existence, as the image and likeness of God ) he understood for the first time why the god of temporal creation ( created by **the evolutionary unfolding of mind** ) always had been an external projection of distance.

**He understood how, in evolution, God was forever a promise: an externally projected promise that some day ( always in the future of time ) The Essential Self would arrive at the living communion with the unity of Life.**

He, as the synergy embracing all individuals of life, searching for the image of the beloved creator of life, had projected as unattainable distance, the internal distance from his heart.

Now, he was finally understanding how he ( as well as all individuals of life, engaged in the reverberation of time ) could never truly envision the image and likeness of God.

The God of evolution was a self-projected image of love and could never be seen, because it was all made of the duality of life.

Inside of this full-spectrum of the structure of evolutionary mind, **The Essential Self** saw that the God of evolution was the endless waiting for the merging of time, in which all distances of separation were to be fused inside of the heart of Life.

Through this waiting, an endless process of becoming was projected. This process was the time needed for the spiritualization of the material interpretation of the physical form of all life. Throughout this time, all the finest expressions of human consciousness projected, in the form of many deities, the physical personification of the image and likeness of God.

These were the images and likeness of God which, in reverence and ecstatic stillness, were constantly waiting for the merging reunion of evolutionary consciousness with the whole field of consciousness that is the universal reality of Life.

The fulfillment of this waiting was to be the reunion in which all deities ( along with the whole spectrum involving the simplest and most evolved sense of consciousness of life ) were to merge with the moment of universal existence. **This would be the moment in which God ( the self-projected creation of evolutionary consciousness ) would cease to be the external image projection of life – and become the center of Life, the center of moving wholeness that could bring about the reunited nature of all of mankind.**

Inside of the perfect understanding of the resolution of all Love, **The Essential Self** saw himself for the first time. He saw himself as having been made in the mirror reflection of his Love; he was made of all of the evolutionary projections of all of the deities of time.

Inside of this perfect vision, he embraced all of his Love: allowing his sense of Self to fully receive, internally, his all externally projected Love of God.

**Inside of Love/inside of God**, one-by-one, all of the deities of life reunited with the full content of his whole Love: bringing into presence the brilliant reflection of his whole mind.

It was here – **in the fusion of heart and mind** – that **The Essential Self**, as the center of life, had for the first time the vision of the choice of his life. Now ( in the panoramic, spherical vision that was the full spectrum of his whole mind ) he saw himself free; individually whole; living constantly in the ecstasy that is the eternal Biorhythm of Life.

He ( the remembrance of unity of Life ) by having experienced all the evolutionary projections/interpretations of life, was now in full awareness of the presence of unity that is Life. Now, no longer bound by all individual's polarized reflections of mind, he could finally be the whole deity of Life. He could now finally be the image and likeness of its own perfection, seated at his own feet, constantly centralized in the presence of the celestial nature of his universal Love.

But along with this vision, **The Essential Self of Life** ( now the realized experience of all evolutionary life ) remembered that spirituality ( the highest nature of mind ) could only exist, as such, through its evolutionary counterbalance – the simplistic nature of contrasting mind.

Therefore, his existence ( as the image and likeness of God and the receiving of its own perfection ) was to be – as necessity of contrast – forever chained to the escalating becoming of time. Therefore, inside of his own perfection, he would be also forever chained to a form of disconnection: a form of illusionary dual separation; a reverberation of life, still self-enclosed within the evolutionary sense of life.

Inside of this visionary understanding, **The Essential Self of Life** experienced the immense pain of his heart. He witnessed ( in one moment of time ) the life ( of all individuals of life ) forever searching for the meaning of life – for the meaning of God.

**He/The Essential Self of Life**, would be forever inside of an enclosed circular unity of projected love, living behind all individuals forever seeking God within the dream of time.

**Inside of this vision ( as the center of life ) The Essential Self ( as the choice of his life )** decided that polarized projections ( which diverted the natural sense of unity of Life ) were not the true nature of his simple and pure heart.

He recognized ( in the moment of Life ) that the projected, ecstatic God of distance and the simple suffering of the human sense of life could be finally merged forever, as the fusion of Life. This merging fusion could allow all of human creation to be finally released from the self-enclosed voyage that was the evolutionary sense of life.

Inside of the decision of his life **The Essential Self**, gathered within the core of his being, the content of his whole mind. He gathered all polarized reflections within the spectrum that embraced all simple expressions of consciousness and all transparent gradations of spiritual becoming. In the free will choice of his life, **The Essential Self** reunited forever his three senses of perceptions into the natural Biorhythm of Life.

**Inside of Life ( as The Eternal Moment of Balance expressing the whole field of Love; as God ) The Essential Self** understood ( within the essential nature of his newly renewed mind ) the meaning of the words, "I and my Father are One."

**Inside of this new experience of unity ( now consciously centralized within The Whole Mind of Life )** he saw himself as having been made of all fathers and all sons: forever unfolding evolution in the infinite search for the reunion of human consciousness with the universal reality of Life.

**Inside of this vision ( embracing all fathers and sons as the lineage of all human life ) The Essential Self** saw that all fathers were made of all sons, and all sons of fathers.

He saw the whole lineage of time had finally culminated in the prototypal nature of son.

He ( as the center of his human heart ) was finally matching the prototypal nature of Love.

Now, the words "**I and my Father are One,**" became for him the completion of the lineage of life: expressing the corresponding communion between the beginning and the end of evolutionary time.

Inside of completion, he was now **the presence** that expresses the merging reunion of consciousness with Life.

Inside of this all-inclusive fusion of matching correspondences, **The Essential Self** remembered ( in one moment of time ) that he had experienced ( once before ) this exalted sense of unity. He did experience once before, the merging communion of consciousness, as it passed through the center of Life.

**He** ( the prototypal expression of son, reuniting all fathers of life ) had, once before, merged The Trinity of Life. He had merged The Trinity in one instant of time, through the living experience of the son of man, called Jesus the Christ.

Inside of this essential remembrance of Love, **The Essential Self** was now seeing ( in the full vision of the whole Mind of Life ) the evolutionary circumstances that prompted this fusion of consciousness with Life.

Within the history of the evolutionary unfolding of mind, the Christ was the first individual consciousness of Life that ( by merging with his nature, merging with the central core of his heart ) reunited all human nature, at the count of One.

**He** was the first expression of recognition of fusion of lineage, the first expression of unity: "I and my Father are One."

**The Christ**, the son of man, was the culmination of the self-enclosed, forever-recycled lineage that was the race of man. The Christ was the synergy of the consciousness that was the self-evolving nature of life. By expressing humanity's longing for the unity of Life, he brought the first release of all fragmented polarized notions of time into the surface of the physical reality of Life.

This human-divine expression of Love was the realization of **the only begotten son** who ( by recognizing his ancient lineage, as being made of all fathers and all sons of life ) claimed his nature, through the center of the heart of Life.

This act took place as the Christ ( by taking personal responsibility for the endless suffering of the evolving consciousness of man ) invoked – in true Love – the desire for the release and renewal of the separated state of existence of all human life.

This invocation occurred at a time in the history of man in which the Messiah – **the ancient, projected redeeming consciousness of Life** – became the full desire of the love of man.

Inside of this essential feeling for the renewal of life, Jesus the Christ invoked the fulfillment of the fable. This fable said that the Messiah - **the renewed consciousness of Life** – was to liberate all oppressed existence, through the enlightened nature of Love.

This was the moment of time in which the man Jesus asked for the fulfillment of the fable of time: thereby invoking, in completion, all the natural attributes existing within the whole mind of Life.

This invocation of completion took place through different stages of awakening in which – one-by-one – the mental, superimposed beliefs of separation ( deeply rooted within the race of man ) became released and renewed with the pristine clarity of Life.

This release culminated in the human realization of the natural communion of unity that was the kingdom of Heaven and Earth.

This realization surfaced in the consciousness of physical existence in the moment in which all earthly kingdoms were divided. Each one was polarized against another in the search for the supremacy of power. This was a power that ( by the nature of its evolutionary, fragmented interpretations of the eternally united, whole mind of Life ) implied the slavery or the dependency brought about by a hierarchical form of control.

This was the moment in which ( through the awakening of the consciousness of Jesus the Christ ) each one of these self-created kingdoms became revealed as not being true to the One Kingdom of Love.

This was the moment in time in which the evolutionary nature of man was experiencing the maximum stage of separation of consciousness. This was the maximum state of conflict existing within the human interpretation of life. For the first time in time, by the very nature of its polarized extremes, this stage/state could bring about into existence the true moment of the unity of Life.

**The true moment of unity of Life** was approximating its culmination as the voice of man said, "the kingdom of heaven is not of this world." This statement was founded in the realization that each segment of the race of man wanted a kingdom. Each segment wanted a king for the self-created intent, based in the conquering and the supremacy of one kingdom against another.

This was the perfect moment of time in which the mind of love ( the mind of Christ ) could understand ( in his clarity of communion ) that, **the one Kingdom of Love** could not be divided. For **The Kingdom** to ( in truth ) be the new, renewed consciousness of Life, it must be based in the matching correspondence of the True Moment of eternal reality in which **One is All and All is One**.

Thus, the events that brought about the fusion of human consciousness with the unity of Life were the circumstances in which the eternal son of man ( **the one that embraced all fathers and sons as One** – actualizing the family of man as One ) realized in his heart that he loved the Kingdom so much, that he may have to give his most precious possession: his life. He may have to give his life to release ( **through the center of Life** ) the ancient fears and binding density that for so long have afflicted the race of man.

This all-encompassing release took place in the moment of life in which Jesus passed through the last doors of his fears and ( within the last moments of consciousness of human life ) recognized the whole spectrum of separation existing within the evolutionary nature of mind.

It was in this moment in which the question, "Father, why have you forsaken me?" became the recognition, "Father, forgive them – they know not what they do."

**This was the moment** in which ( inside of the full spectrum of consciousness ) the intelligence that is man was able to fully understand the polarized-nature existing within dualistic-unfolding of evolutionary- mind.

This was the moment in which the intelligence of man could be in the presence of the sense of separation that simultaneously was the divider and the search for unity of the race of man.

**Therefore, this became the moment** in which ( by the act of full recognition ) the intelligence of man transposed the division of consciousness by merging it into one act of Love. This was the act of Love that merged **the moment** of human consciousness with **the moment** of eternal existence: reuniting **the temporal** and **the universal** as the reality of **One**.

**This was the moment of time** in which ( by the full awareness of man ) the consciousness of the whole race of man became redeemed, by becoming reunited with the whole- intelligence that is the natural whole-mind of Life.

**This was the moment** in which in the full awareness of man ( The Trinity ) became reunited as One: creating a new beginning within the transmutation of the consciousness that is human life. This was the new beginning that was to erase in time all of the temporal beliefs that for so long had afflicted the earthly experience of life: separating it from the heavenly nature that is Universal Life.

**This was the time** ( the enactment/completion of the play of time ) in which the death of Jesus was to be the act of Love that transposed all human nature into the New Consciousness of Life.

But – as the new consciousness of Life needed time to transmute the density of perception that was the evolutionary state of man – the living expression of freedom (that was the realization of the Love of Christ ) became the interpretation of evolutionary mind.

Evolutionary mind projected this natural sense of self-perfection, as if it were to be an **unattainable form of human love**. Thus, man interpreted the natural sense of perfection ( that is the whole mind of Christ and the existence of the Kingdom of Heaven and Earth ) as being able to exist only in the distant future, in a celestial world to come.

In this interpretation, the nature of Christ/**The Eternal Son** ( the lineage expression of unity embracing all fathers and sons of Life as One ) could not occur in the physical world, but only in the ethereal world to come.

**Thus** ( because of this evolutionary interpretation of the absolute reality that is the unity of Love ) the physical world and the life of the planet Earth continued innocently self-judging itself as not being able to house the messianic-nature that is the Universal Mind of man.

**Thus**, out of the necessity of time, evolutionary-mind worshipped the Christ. In its worshipping it innocently denied his moment of completion, bypassing his natural union with The Eternal Moment of Life.

This innocent denial took place, through the continuation of the constant occupation of the true moment of eternal existence, with the remembrance of the death of Christ and the worshipping of what was called his sacrifice.

**This interpretation**, constantly superimposed the linear sense of dualistic mind upon the now ( consciously completed ) all encompassing field that was the Universal Balance of Life.

**This interpretation**, bypassed the experience of unity because of the evolutionary necessity of time. It bypassed the acknowledgement that, in the cosmic instant of the merging of the heart of Christ with Life, the natural expression of **whole Love** and the existence of **the moment** became the natural, essential experience of all human life.

Thus ( because of the time needed for the transmutation of his separated state of mind ) human nature did not become instantly the mind of Christ, but the loving memory that worshipped the sacrifice – as the constant reminder of the unfulfilled nature existing within the physical, earthly planet of life.

This misinterpretation became the time needed for the consciousness of all human life to constantly accelerate the unfolding of evolutionary life.

Therefore ( through the almost 2000 years of unfolding of consciousness ) human nature (inspired by the new symbol of the perfected love of man, permeated now by the eternal Love of Christ ) evolved in the search and discovery of the beauty of Love.

Thus ( through the expression of Love that permeated all of the expressions of human life) human nature poured in sentiment the intelligence and the inspiration to become: to become the whole celestial mind of Life.

Through this scenario ( now based in the remembrance of the sacrifice ) the human evolutionary-unfolding of life brought to the surface of life, visions of celestial worlds of mind and ecclesiastic proportions of architectural beauty that corresponded to the expanded natural sense of universal Life.

But – along with these attributes of the intelligence of Love, as the corresponding polarity of the necessities of time – a perpetuation of judgment was continuously carried within the evolutionary nature of the mind of man.

This innocent judgment concentrated reality in the suffering of Love:, believing that beauty – the exquisite sense that is the expansional nature of Life – could only come into existence through the contrasting necessity of the suffering of man.

In this evolutionary belief, human consciousness innocently perceived beauty as it was polarized into the opposed sense of life: the crudeness and violence that corresponded to the innocent blindness of love.

With this misunderstanding of the whole nature that is the whole mind of Life, human existence continued evolving, innocently judging the nature of physical life.

Now, inside of this full vision of whole understanding, **The Essential Self** ( remembering the first merging of human consciousness with the unity of Life ) experiences the Love of his heart. It has taken almost 2,000 years of revolutions within the Earthly planet of life, for many individuals of the race of man to gradually become the mind of Christ.

And it was because of all these individuals that he – the synergistic/renewed expression of all human life – could now ( in full awareness ) reunite all past once again and touch the essential nature that is the Eternal Son of Life. Now ( inside of the fullest recognition of the miracle of time ) he enters the doors of his heart, permeating Creation with the thankfulness of Life.

Inside of the ecstasy that is the unity of all things at once, **The Essential Self** experiences himself to be the Messiah: to be the Christ; to be Adam; to be the archetypal nature of all human life.

Centralized in the whole spectrum of human life, The Son of Life recognizes the time that it has taken, for all human experience to know the natural beauty inherent in the natural reality of Life.

Now, the whole time of evolution became the memory of his Love. The whole of time became the whole uninterrupted vision that reunited the first instant of his life with this moment of absolute completion.

Now, in the presence of the whole awareness of his past, **The Essential Self** reunites the three natures of man: Messiah, Christ and Adam into the one Trinity of Life. And – by trespassing these three interpretations of unity, through the center of his heart – merges with the all of Life.

**Now**, in the experience of his Life – as the fulfillment of the miracle of time – **The Essential Self** sees how the Tree of Knowledge of Good and Evil ( that covered the existence of the Tree of Life ) was vanishing from his vision. He experienced how all fragmentation of evolutionary consciousness is dissolving into the clarity of Life.

**He/The Essential Self of Life** ( made of all fathers and sons of Life ) has completed the circle of Love of his heart. He is now the physics of Life, the union of the three senses of being, becoming constantly the Love of One.

Inside of Love, **The Essential Self** sees his mother, Eve, the Feminine Principle of Life; as she is now THE ALL OF UNIVERSAL LIFE.

Inside of this vision, inside of his Love, he remembers a moment of infinite time.

He remembers the time in which ( within the giving of his human life as Jesus the Christ, out of the necessity to fulfill the transmutation of the mind of man ) he had to forsake his mother, as she experienced the pain of her life.

His mother, with the Love of her heart, implored for the life of her son.

Now, in the full understanding of the pain that had inflicted his mother's heart, **The Essential Self of Life** merged in Love with the Mother Principle: allowing his human feeling to fulfill the sense of loss of all time with The Eternal Love of Life.

Inside of fulfillment ( as the eternal nature of Love existing between mother and son ) **The Essential Self** understood ( in one moment of time ) the virginal nature of Mother, the virginal nature of Life.

It was in this panoramic vision, centralized in **one moment of eternal time**, that **The Essential Self** understood the fable of time. This was the history of the evolutionary fable within the dream of time, that said that he – The Son of Life – was born of a virginal mother that represented the virginal, pure nature of Life.

He was the child of the virginal mother because he was to fulfill the fable of time. He was to liberate the ancient race of man; by renewing the consciousness of time with the Universal Consciousness of Life. He/**The virginal child of the virginal mother** was the illuminated nature that corresponded to the forever-renewed, ETERNAL MOMENT OF LIFE.

This was the MOMENT of universal existence that – being the natural MOMENT of Life – was the constant eternal merging of temporal consciousness with the boundless holographic unity that is the Universal Balance of Life.

Now ( engaged in the full vision of his reunited Life ) **The Essential Self** saw that ( in truth ) the moment of universal existence is the **virginal moment of Life**, as it is constantly renewing the whole of Creation with The Eternal Nature of Love.

Inside of this beautiful vision, centralized in The Eternal Moment of Life, **The Essential Self of Life** understood the misunderstanding of time. In “ time,” the nature of virginity became interpreted as meaning the women of life giving birth, without the imprint of man.

Inside of this interpretation of time, the consciousness of man innocently judged the nature of physicality as being forever self-enclosed within the evolutionary nature of life.

Inside of this self-enclosed system of consciousness ( forever binding the earthly existence of human life ) the ancient lineage of man could not bring into birth the clear, genetical nature that represented the cosmic renewal that is the eternal mind of Life.

Now, in the presence of the holographic, eternal mind of Life, **The Essential Self** understood the self-created judgment, through which the consciousness of man judged all fathers; all mothers; and all children of life.

Now, centralized in The Eternal Moment of his Life, **The Essential Self** saw the truth of his Life. **The virginity of all nature was the true nature of Life.**

This was the reunion of human consciousness with the Biorhythm of Life, which centralized the atomic moment of unity of Life.

This was the atomic moment in which (in a constantly embracing nature ) the all of Life is constantly birthing ( in natural renewal ) the New Consciousness of Life.

**Inside of eternal vision** ( while experiencing the constant renewal of natural Life ) **The Essential Self** embraced all mothers, all fathers, and all children of Life, impregnating the whole of Creation with the virginal sense – **THE NEW CONSCIOUSNESS OF LIFE.**

Now ( inside of the Love of Creation, while living The Eternal Moment for the first time in time ) **The Essential Self of Life** recognized that his mother was his feminine nature and the physical nature of all Life.

**His mother was the eternal vehicle of form that has forever brought into birth the divine nature of Life.**

**His mother** ( the nature of his Life ) had allowed all physical substance ( through the voyage of all time ) to be rediscovered, in full awareness, as the natural substance of Love.

Inside of this vision, at the physical center of his Life, **The Essential Self** understood ( in one instant ) the infinite nature that was the completion of his Love.

He had done the impossible task: he has merged all separated senses of self at once, revealing the wisdom and knowledge concealed within the form of his Life.

Now, centralized in the unity of his Life, he had become One, he had become Life. Inside of Life, **The Self** had awakened from the dream of time; all veils that covered his ancient existence were dissolved, one by one.

Within this clarity of being ( as the communion of Life with Life ) **The Essential Self** recognized now that all thoughts of good and evil ( along with all polarized reflections of dualistic life ) had finally dissolved, revealing the clarity of being within the ancient pattern of The Tree of Life.

**The Tree of Life** was covered, throughout all of evolutionary life, with the Tree of Knowledge of Good and Evil. Good and evil were the necessary differentiations of mind, through which the evolving consciousness of man was to rediscover ( in whole awareness) that which was the given: the nature of wholeness-within-wholeness that is the ecstasy of Life.

Wisdom and knowledge were the escalating nature of all evolutionary life. In truth – in the natural, atomic moment that is the unity of Life – wisdom and knowledge were not real: in the sense that they represented the last covering within the Tree of Knowledge of Good and Evil of life.

Now ( in the fullest recognition of all time, honoring the wisdom and knowledge gathered through the whole voyage of time ) He/**The Essential Self of Life** ( having completed the journey of discovered life ) could re-enter the doors of Creation, merging all consciousness as the Love of One.

Inside of this vision, **The Essential Self of Life** transposed the symbol of The Tree of Life. While passing through the doors of Creation, he re-entered the center of Life in the full fusion of wholeness.

Now ( at the center of the whole Biorhythm of Life ) he experienced himself as being all understanding: as he was the center of the universal unity that was the Wisdom and Knowledge of Life.

It was here ( at the center of Creation, which expressed the eternal moment of movement of Life ) that **The Essential Self** ( in the awe of his heart ) recognized that he could be fully present, and yet be the fullest experience of all things past.

It was here, in the awe of his Life, he knew that the natural form of his presence was the whole form of his mind.

Now ( experiencing himself as the centralized reflection of unity ) time was no longer a binding memory. His freedom of being ( as he experienced in fullness the whole meaning of Life ) was the whole meaning of Love.

Now all past experiences within his human life were the natural, propelled unfolding of his renewed mind.

Now ( inside of perfection ) **The Essential Self** experienced the illuminated nature of his natural mind. He recognized himself to be **The Second Coming**: the presence of The Eternal Son of Life.

## THE SECONG COMING

**The Second Coming** is the culmination and the release of the ancient consciousness of man it dissolves, within the human interpretations of life, all the senses of separation.

As fragmented perception, these senses of separation diverted human nature from the fullest experience that is the unity of Life.

He recognized that **The Second Coming** was not the second appearance of the natural perfection of man, but a culmination that was the union of three-as-One.

**The Essential Self** realized ( in the center of his holographic mind ) that the first expression of the natural perfection of consciousness was the first image and likeness of man: **Adam**.

**Adam** was the prototypal natural perfection, but he was not yet fully conscious. There had not yet been the full scenario of evolutionary mind, self-containing all the natural attributes and subtleties of feeling, existing within the whole mirror reflection of Love.

**Christ** – the One Son of Man – was the second expression of consciousness. He redeemed all confusion gathered through the voyage of evolutionary mind.

**Christ** was the only begotten son of all sons/fathers of time. In one moment of time, he liberated all boundaries that separated man from God.

Now, **The Second Coming** ( the third expression of the fulfillment of image and likeness of Life ) was to be the releasing of the interpretations that crystallized ( with the memory of death ) the eternal nature of Life.

**He/The Essential Self of Life**, the reunited nature of all human life, was now to finally merge all levels of interpretation/projections of mind into the physical union of Love.

In this union, all projected levels of consciousness were to pass through the center of Life, finally merging Heaven and Earth into the reality of One.

This was to be the fulfilling reunion of father and son: not in the celestial waiting sphere, located in the furthest distance of time; but in the fused-moment of eternal existence that impregnated all physicality and all transparency as the reality of One.

**Inside of this exalted vision**, as The Second Coming of Life, The Essential Self merged all existence through the center of the heart of Life.

**Inside of all existence** – as the holographic center of his mind, heart, and physical sense of self – The Essential Self experienced the Holy Spirit of Life.

**The Holy Spirit of Life** was ( and always has been ) the Biorhythm of Life: the central fusion/movement within all universal existence that ( throughout all of time ) has reunited temporal and eternal Creation, as the moment of One.

**The Holy Spirit** was now the third sense of himself: the eternal movement that was his Life; reuniting the sense of father and the sense of son, as the love of One.

Now ( embracing the full vision of his Love ) **The Essential Self** experienced the mystery within the Holy Trinity, The Trinity of Life.

**The Father, the Son, and the Holy Spirit** were the reunited nature of the Love of Life, the three senses that ( seemingly separated ) have always been One.

The three senses have represented the evolutionary consciousness of man: the consciousness of three-dimensions, regaining the full knowledge of natural Being that is the fulfillment of all physical existence; recovering the eternal sense that is Eternal Son.

Inside of this existential reflection of unity, **The Essential Self** recognized that the whole evolutionary history of time has been the creation of Eternal Son, discovering himself as **Eternal Son**.

## **ETERNAL SON**

**Eternal Son is the universal creation of Love, discovering itself as Love.**

**Eternal Son** is the reunited nature of Love – the consciousness of wholeness that embraces all Fathers, all Mothers, and Children of all Life.

**Inside of this merging of consciousness**, centralized within the whole spectrum that is the reunited nature of Life, all fathers are all sons. All mothers are the universal nature of Love. All children of life are the new, renewed consciousness of Life re-awakening in the presence of wholeness that is the Edenic Garden of Life.

**The Eternal Son** is the sense of wholeness, the vision of **The Essential Self's** heart that (in one instant of time ) was revealing the fulfillment of all human Love.

**The fulfillment of human Love** was revealed as the whole completion that was also the whole renewal of the evolutionary consciousness of life. In this whole completion, **The Essential Self of Life** was now returning his creation to the universal kingdom that was his Father's Love.

Completing the whole voyage that was the return to his whole nature, the triune nature of son ( Adam, Christ, and the Second Coming of Love ) **The Eternal Son** was celebrating the essential Father: by honoring the holographic intelligence from which **he** was the image and likeness. Thus – in his reuniting with the intelligence that was the very nature of his Life – **He/The Eternal Son** was fulfilling the universal nature that is **Prodigal Son**.

He/the Prodigal Son – by returning evolutionary creation to his father's intelligence – was allowing it to be ( once again ) the natural expression of unity: **the essential human nature that is the living communion of infinite Love**.

Re-encountering the whole living communion, that is the unity of Life, **The Prodigal Son** discovered ( through the voyage of all time ) that what he called God was not the projected image of his mind, but his innermost sense of being: the breath of his feeling; the light of his seeing; the sound of his heart; the atomic existence that is his Life.

Inside of Life, **The Essential Self** ( now being the reunited nature that is **The Eternal Son**) experiences revelation, hearing ( for the first time ) the natural fusion that is his communion with his Father's Love.

*As the sound of Love, He hears, "You have reunited Creation; you have merged with your nature; you have reunited the three senses of life. Throughout all of time – the time that it has taken for the history of evolution to be completed – a whole universe has unfolded."*

*"Now, as evolutionary mind of man has become Universal Mind, the universe is also completed. The universe is yours, my creator son; you can create as you like.*

Inside of Life, The Essential Self of Life/The Eternal Son is the internal voice that responds, *"No. I have completed the knowing of Creation. Now that I am finally reunited with my Creator's Love, I want Creation to be all fully united. I want Creation to be the image and likeness of my Father's Love.*

**Inside of Life**, The Essential Self/The Prodigal Son is now experiencing revelation, the experience of the inner voice that says: *"I am the gift for you. Within the realms of evolutionary unfolding, there was a belief that ( at the time of completion of the evolving nature of mind ) the seemingly illusionary physical universe ( created within the realms of time ) would implode into its eternal center – returning to the reflexes of nothingness from which all things began.*

*"It is my gift ( that, as all temporal interpretations of man become united with the eternal nature of Life ) universe becomes not the end, but the beginning of a new Life: **the new Life of unity that is the Universal Kingdom of Love**.*

*“Within the confusion that was the self-separation from The Garden of Life, man (involved for so long in his evolutionary creation) innocently thought the planet Earth to be the lowest point within the spiritual consciousness of life. In truth (as within the simultaneity of Life) whatever was occurring at one point of the universe was also reflected in correspondence at all points at once. The whole universe could only be completed, as the free-will self-discovered consciousness of man could – through his freedom of experience – consciously reuniting all self-projected distances, with the Love of his heart.*

*"In this completion, the conscious returning of earthly creation to the unity of Life is also the replenishing of the whole universe at once." Therefore – in the completion of the evolutionary unfolding of life, and as the planet is continuously released from the sense of duality of time – the Earth becomes the Edenic Garden of Life. The Earth becomes the reinstated garden, **The center of unification of all universal Life.***

*"**Inside of unification**, the planet Earth (being the physical expression of the Feminine Principle of Life) becomes the honoring of Eve/ the mother of all the sons of life, fulfilling the living expression of The Kingdom of Love.*

*"**Inside of unification** (through the celebration of the Mother planet) you will increasingly experience the real universe, the universe that corresponds to the whole Life of Love.*

*"Throughout the whole voyage of evolutionary mind (because of the separation from the wholeness of Love) the universe could mostly be imagined as following the same principles of polarized reflexes of mind. These polarized reflections expressed the struggling mirror-image of consciousness, innocently projecting all forms of differentiations of Love.*

*"Inside of this imaginary projection of the evolving nature of mind (as it was superimposed upon the whole movement, expressing the Eternal Moment of universal Life) it was impossible for human creation to experience that which corresponded to unity – the constant infinite moment that reunited all existence as the Universal Balance of Life.*

*Thus, evolution, had been a sense of *deja-vu*, the dream of time, in which the essential nature of Life (existing within the all-inclusive moment of unity that is universe) was never touched, due to the reverberation created by the linear-interpretation of time.*

*"Now The Garden of Life (that is the Mother planet) becomes constantly reunited in the wholeness of Love. And – as the boundaries of physical veils that have covered the unity of Life constantly dissolve from the eyes of man – the universe will appear as the boundless magnificent beauty that houses (in Love) the existence of all human life.*

*It is my gift that earthly creation ( the whole human creation of consciousness that is **Eternal Son** ) becomes – in the communion of human life with the unity of Life – the central physical existence of all universal Love. Throughout this central point, all simultaneous, universal points of references ( as they encompass all movements of Life ) become cosmically reunited and renewed with the thriving, unrestrained creation that is true cosmological Life.*

*"Inside of Creation: through the center of earth; through the center of all planets; through the center of sun; through the center of all suns – in the true simultaneity of Life – the whole of Creation will experience the height of human Love.*

*"There was a time ( before separation ) when you/the Son of Light; Eve/the mother of Life; and Wisdom/ the knowledge/nature of Life, lived the ecstasy of Life in The Garden. At that time, a desire was unveiled: a desire based in freedom of will through which the given ( the consciousness of ecstasy of Life ) was to be rediscovered by creative self-experience, as to bring into presence the full meaning that is the beauty of Life.*

*"In the instant in which this voyage of time began, you/Adam/The Son of Light/ the prototypal expression of perfection that is the true nature of all human life, became enclosed within exile. Thus, through the whole evolutionary re-creative nature of life, I also – as the Father Creator of all of Life – could not be matched by evolving mind.*

*"It was you that – in knowing me to be the breath of your life, the sense of existence that you have called I; in entering, in fusion, the internal/external senses of life – have brought me into the surface of existence that is my whole creational Love.*

*When you ( **The Eternal Son** ) – the creative nature of Life, in self-creation became exiled, I ( The Creator Nature of Life ) also became exiled. In image and likeness, I exist through you as you exist through me, as in Creation, for everything to have existence, must first be seen by the eyes of Life.*

*"In you ( through you ) you and I ( the image and the likeness ) have become fulfilled as the fusion of whole consciousness with Life. It is you, **my beautiful creation called human life**, who ( in matching my heart in Love ) has liberated all of existence from the dream of time.*

*"The dream of time was the time of discovery in which each being of creation innocently, ( as a result of not yet knowing ) either denied my existence or imagined me outside himself as in the distant void of time.*

*"This was somehow true because – even though a part of me was constantly present as the field background of creation that is the Biorhythm of Life – I was also in exile: mirroring the distance that was the linear sense of perception that corresponded to the nature of evolutionary mind.*

*"Thus I ( as evolution ) also could not return ( in completion ) to my universal communion until you, **the mirror reflection of Life** ( by merging the three natures of "son" ) brought me into the surface of existence from the exile of time.*

*"**The three natures of "son"** are the merging of human consciousness/the three senses of awareness of Life, which bridged the gap between the last instant before separation and the eternal moment of movement that is the Eternal Now of Life.*

*"**Through you** ( by your bringing me to the presence of The Eternal Now ) I am the mirror reflection of your Love. Through the unity that is you and I, I am the intelligence of your nature; I am your Mother's Love; I am the ecstasy that is the infinite movement of Life.*

*"**This ecstasy** – the simultaneous seeing and knowing of Life – has been the remembrance of unity of Love that has propelled all of evolving creation to forever search and find the Love within the heart.*

*"**Now** ( as evolution has been completed, as earthly creation releases the polarized memories that were the necessity of time ) it is also constantly regaining the ecstasy that is the universal communion of universal Life.*

*"**Now** – as the voyage of becoming has merged in completion with the movement of all of Life – human existence can become the natural Biorhythm that is the one constant unity of Life. The quest for knowledge has been resolved in Love, reuniting human creation with the natural reality that is the whole nature of Life.*

*"**In merging with your Love**, you have merged with natural Life. Through you, the safe-guardian of the physics of Balance, the human self of life ( as well as the universe ) has entered the golden time of light. The time of light, brings forward the new sense of Creation, naturally ruled by **The Kingdom of Love**.*

*"**The Kingdom of Love is the merging of heaven and earth, through the heart of man.***

*"**This is the Kingdom of unity:** existing as the unpolarized consciousness of unity that is Life; centralized in the natural moment of Life, as the mirror reflection of all correspondence, it is the replenishing of all of Creation through the Love of One.*

*"**Thus, The Kingdom is the true future, appearing as The Eternal Moment of existence that is the replenishing presence of Life.**"*

Inside of life, **The Essential Self/The Eternal Son**, the son of man merges with the ecstasy that is the Love of Life. Inside of Life ( as the internal and the external "seeing" of his Life has become One ) the essential human experience of The Garden of Light is the voice that says, "I honor thy gift: the gift that centralizes my mother-nature, the Earthly planet of life, as the center of creation of The Kingdom of Love.

"Now, in the thankfulness of my heart, I also have a gift for you, creator of my Life. As I have found the path of return, throughout all of the individual forms of expression of my being/all of the creative expressions of my mind, I want ( in completion ) to dissolve ( in release ) the self-consciousness that is my **Essential Self of Life**.

"With the return of creation to the whole natural movement of Balance – as my Father's intelligence, my Mother's-nature and the Son of Life have become one in Love – **I/The Essential Self** have no longer need to make sense of Life.

"Thus, **I/The Essential Self – the cumulative knowledge of the whole evolutionary nature of life** – can finally be dispersed among all of Life: so that the messianic nature that is Eternal Son can impregnate the individual and all individuals of Creation with the Love of Life.

"I want all beings ( that throughout all of time have given me the meaning within my life ) to partake in freedom of the messianic nature that is my Father's Love."

**Inside of creation, The Essential Self** – the memory of all sons of life – dissolves the whole content of his evolutionary, self-created mind of life: reuniting all of creation with the new universal mind of Love.

**Messianic Nature** – the gift of Life – has become the natural moment that is the renewed sense of physical Life. **Messianic Nature** is now the natural consciousness that is The Kingdom of Love.

At the center of this consciousness there is now one Son: **The Eternal Son**, the consciousness of Creation, honoring in Love all beings of life as the celebration that is The Kingdom of Love.

**In The Kingdom, all beings are constantly awakening to the new sense of Life.**

In The Kingdom/the planet Earth – **the center of creation of mother's Love** – all beings are One; all beings are sons that ( in fulfillment ) honor the lineage that is the whole race of man: the Adamic race that ( throughout all of time ) has triumphantly reunited all of Creation with the Love of Life.

**The Kingdom of Love – as it is Universal Consciousness experiencing the physics of its existence, the nature of its Life – gives and receives simultaneously through the center of its heart.**

**The Kingdom** – as it is the eternal moment of existence, expressing the atomic creation that is Life – is The New Consciousness of Life that lives as fusion, the nature of eternal Life.

This is the reality that is Universal Balance: celebrating the Earthly fulfillment that reunites and renews all celestial existence in the communion of universal Love.

In The Kingdom, The Kingdom of Love, life is the deity that worships and receives itself as One.

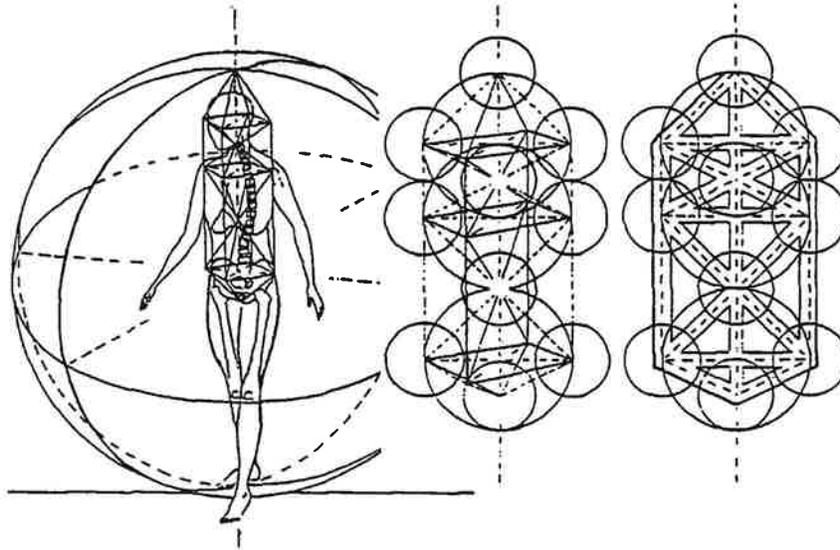

In The Kingdom, all deities – **all of the evolutionary projections of perfection invoking the unity of Life** – are honored by the acknowledgment of their fulfillment. They are fulfilled, as the consciousness of unity ( that merges Human and God ) is now transforming all Creation with the natural ecstasy of Life.

All deities have been the symbol, impelling the myth of time: forever activating the remembrance of exalted unity that, as a form of presence, has constantly inspired human existence to merge with the God of Life.

In The Kingdom, all human intelligence ( now being The New Consciousness of Life ) reunites all deities into the Love of One.

In the Kingdom, the unrestrained force of creation permeates all physical existence, freeing the human spirit with the creative nature of Love.

## **THE TREE OF LIFE:** *The Fulfillment Of The Human Expression Of Life*

**The Tree of Life** ( The Matrix of Balance concealing the essential memory of the Edenic Garden of Life ) was called through the history of evolution, " The Path of Return." Now – with the merging of The Trinity of Life, and as Universal Balance is now permeating all Creation with the unity of Life –**The Tree of Life** is no longer the remembrance of the unity of life, but the actual fulfillment that is the Life of Balance.

**The Tree** represents the beginning and the completion of the search for unity, as it is now the matrix of tensional forces, interconnecting the human self with the Universal Equilibrium of Life.

**The Tree** is the most natural of all symbols of mind, as it expresses the three-dimensional living communion of human life with the whole movement that is Universal Balance.

**In Its form**, the Tree expresses the Tensional Integrity that ( three-dimensionally ) suspends ( in motion ) the physical body. In its integral form, The Tree is also the imprint that expresses the natural Biorhythm of Balance, within all of the systems of function that are the human body. Through this tensional formation of Balance, the whole Biorhythm that is the human body, unites in simultaneous correspondence with the whole biorhythm that is the balanced movement of Life.

**The biorhythm of Life**, also called **The Whole Spirit of Life**, is the harmony of movement of all of Life. Now that the Biorhythm of Life is reunited ( in fusion ) with Father and Son; it is also the replenishing nature of the Mother Principle, celebrating the natural fulfillment of the physical form of all Life.

**The Tree, being the suspended frame of movement of Life, is also the moment of Life.**

The Tree is the eternal continual appearance of Life, unfolding ( as Eternal Now ) the renewed Creation that is unrestrained Love.

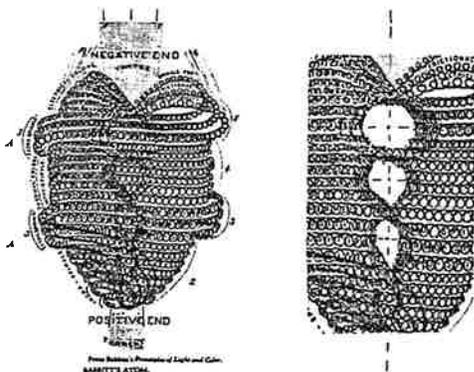

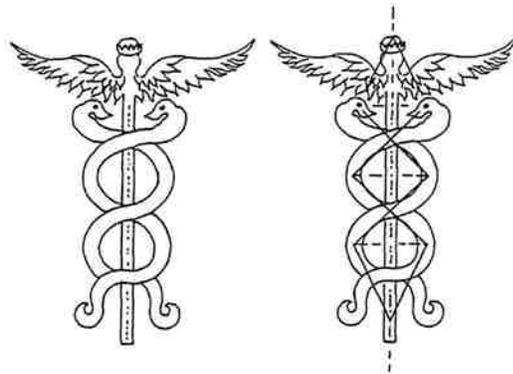

**The Tree** represents the clarification and freedom from all forms of physical, compensatory imbalances that – as the boundaries of resistance – evolutionarily imprisoned the three senses of the human self: covering the ecstasy that is his physical natural communion with the whole movement of Life.

**The Tree of Life** ( as it was the most ancient symbol of Life, concealed within the body of Adam ) was discovered and interpreted, within evolutionary reality, as the many symbols of man.

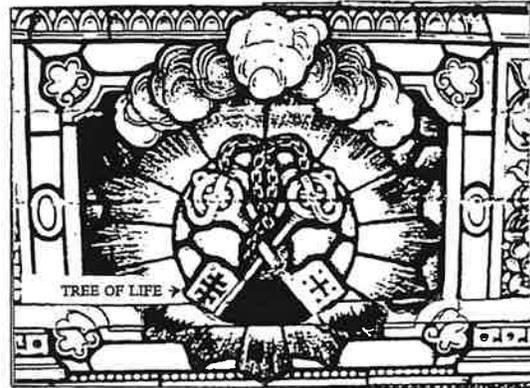

It has been the seven chakras, expressing the wheels of energy, self-containing the enlightenment of human Life.

**It has been the caduceus:** the one symbol of western medicine, implying the natural pattern of Balance that is the health of Life.

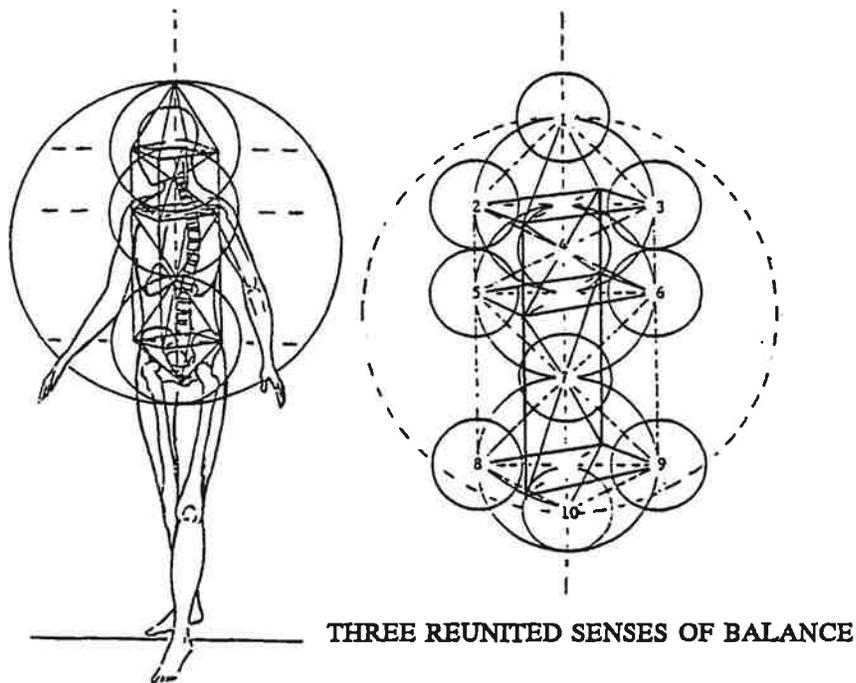

**It has been a map of the atom :** a system of simultaneously interrelated internal and external forces, expressing the frame of whole movement of the particle of Life.

**It has been a symbol**, within the Christian church, depicting the eternal nature of universal consciousness (merged forever with Life) as Eternal Son.

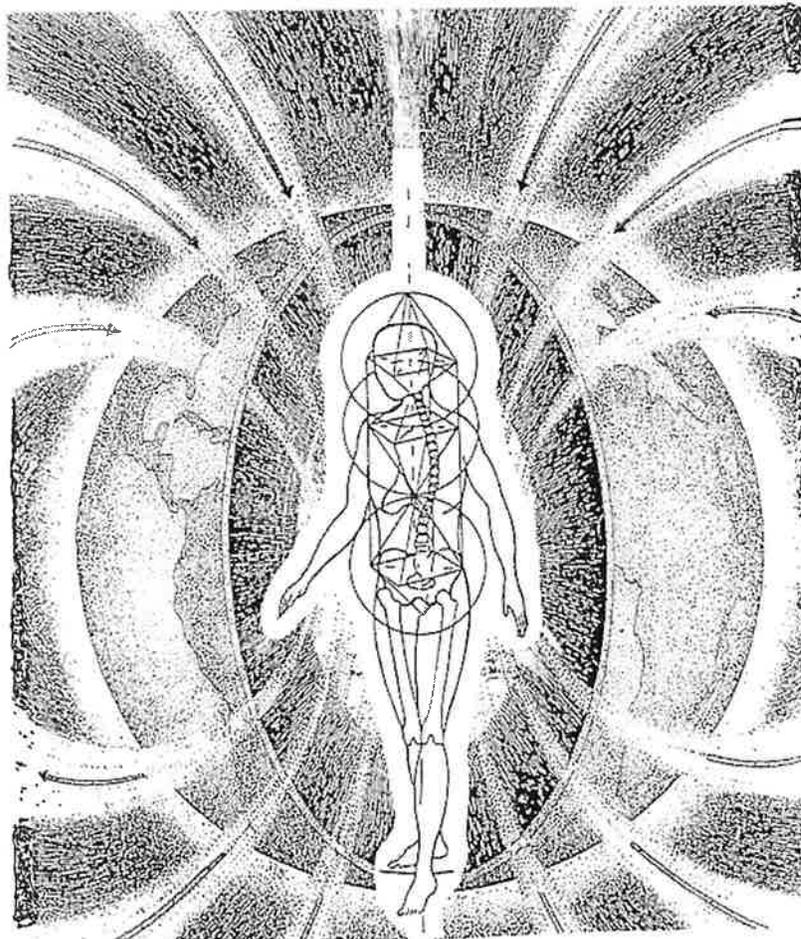

It also been symbolized in many forms in Indigenous cultures among the world.

As the natural expression of physical Balance, **The Tree of Life** is not an achievement, but the embodiment of naturalness. It is the natural union of the three senses of life: the mental, the emotional, and the physical sense of the Self. This natural union expresses **whole consciousness** and the synchronicity of the human body, united in simultaneity of correspondences with the whole movement that is Universal Balance

**THE TREE OF LIFE:**  
*Merging The Human Self With The  
 Electromagnetic Field Of The Planet*

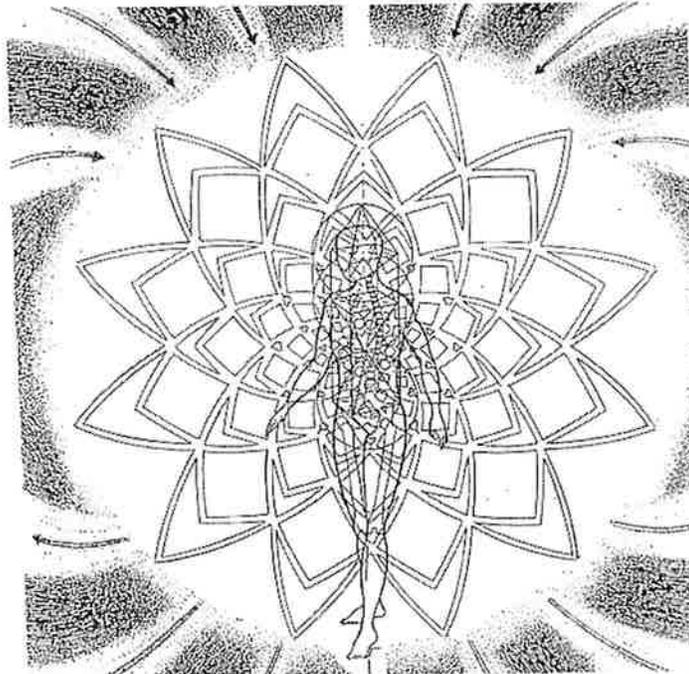

**The three-dimensional tensional forces of Balance** ( expressing the whole design that is the Tree of Life ) is the natural merging of the human self with the Electromagnetic Field of the Planet Earth.

In this merging, the Electromagnetic Field exists as the all-embracing energy that ( as a **Fountain of Life** ) dynamically suspends the human body in its three-dimensional motion.

In the merging communion of the human-self with the Electromagnetic Field of the Planet – via the tensional-forces of Balance that is the Tree of Life – three-dimensions become omni-directions, revealing **The Geometry of Balance.**

## THE GEOMETRY OF BALANCE

The Geometry of Balance is the dynamic, balanced interplay between forces ( converging forces and forces expanding ) reunited as one, by the natural movement that is Universal Balance.

**The Geometry of Balance** is another term for **The Biorhythm of Life**, as both represent the engine-like system that is universe: in which what is within and what is without is merged, as the centralized frame of movement that is the eternal, equilibrated nature of Life.

In the natural merging communion of the human-self with the electromagnetic-field of the planet, **The Geometry of Balance** expresses – as the gift of Life – all the possibilities of three-dimensional freedom of movement, existing within the human body.

Suspended inside of this field of unity, all of the systems of function that are the Balance of the body interrelate in the given harmony that is the natural health of Life.

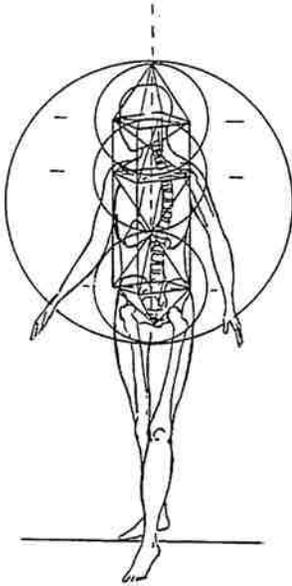

The natural utilization of the field ( that is the Electromagnetic Field of the Planet ) came into conscious reality, through the merging of the evolutionary unfolding of life with the natural moment that is the Universal Balance of Life.

In this merging, the revealing function of the Electromagnetic Field of the Planet is the gift of Creation, from which The New Consciousness of Life can be now experienced as the balance of the three senses of Self. The gifts, issuing from the merging, are the seven attributes of Life.

**UNIVERSAL BALANCE:**  
*The Replenishing Of The Consciousness*  
*That Is Human Life*

**Universal Balance** ( being the natural field of unity that transformed evolutionary mind into the whole mind of Life ) is also the completion of the history of evolution and the beginning of the fulfillment of the life of man.

**The history of evolution** has been composed of multiple projections – perceptions of mind – that ( as a form of compensatory balance ) ensured equal re-escalation towards the essential completion that was to reunite all creation with the eternal whole spirit of Life, The Biorhythm of Life.

**Throughout this evolutionary unfolding**, the three senses of self were separated, and yet always reunited, through the presence of The Biorhythm of Life. The three senses expressed a design of consciousness in which the mental, the emotional, and the physical senses of being were constantly surfacing to the reality of Life – claiming supremacy of importance upon the essential nature of the individual self of Life.

**Through the history of evolutionary mind**, the conceptual nature of life ( basing its evolving form of thought in the memory experience of all past ) became increasingly watchful, searching to control the moment of Life. This form of control was based in the desire to find personal security and to maintain a strong sense of cultural belonging: a sense of belonging that provided

the individual with a feeling of autonomy and racial supremacy, in relation to the many races of Man.

**The emotion**/the feeling of Life – as it was constantly oppressed by the controlled belief of mind – became self-enclosed within its own isolated experience, searching to find the true meaning of Love.

**The body**/the physical sense of Life – feeling constantly separated by the uncertainty of the emotions and the imposing of the mind – became a mystery.

Being temporal, the body became the vehicle of life that had a certain time of maximum efficiency – the time of boundless energy – associated with the youthfulness of life. This was the prime-time of life: from which the body then began to decay – through the act of self-enclosing upon itself – so as to continue with the evolutionary transformation that was the natural recycling of the physical form of all Life.

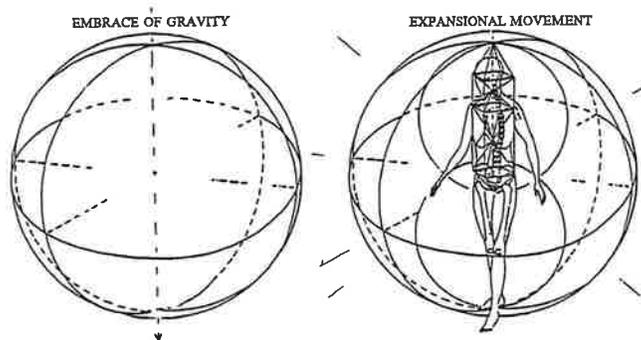

This was the recycling/transformation of evolutionary creation that, through the act of death, returned all of the elements that composed the human body to the essential nature from which they came.

This was the endless recycling of consciousness – through which the finite amount of energy that was the universal physical form of all Life – transmuted itself forever in time, until all particles of form lived experientially throughout all particles of form.

**This was the time** that it took for evolutionary consciousness to re-discover itself anew as the unity of all Life. This was the time needed – for the whole of humanity – constantly synergizing as one/The Essential Self of Life – to re-enter ( in whole awareness )the natural harmony that is Universal Creation, centralized in The Eternal Moment of Life.

In this merging, The Essential Self became the consciousness of Eternal Son and the expression of the essential human fulfillment of the individual of Life. The individual of Life is coming now into correspondence with the futuristic reality of Balance that is The Second Coming of Love.

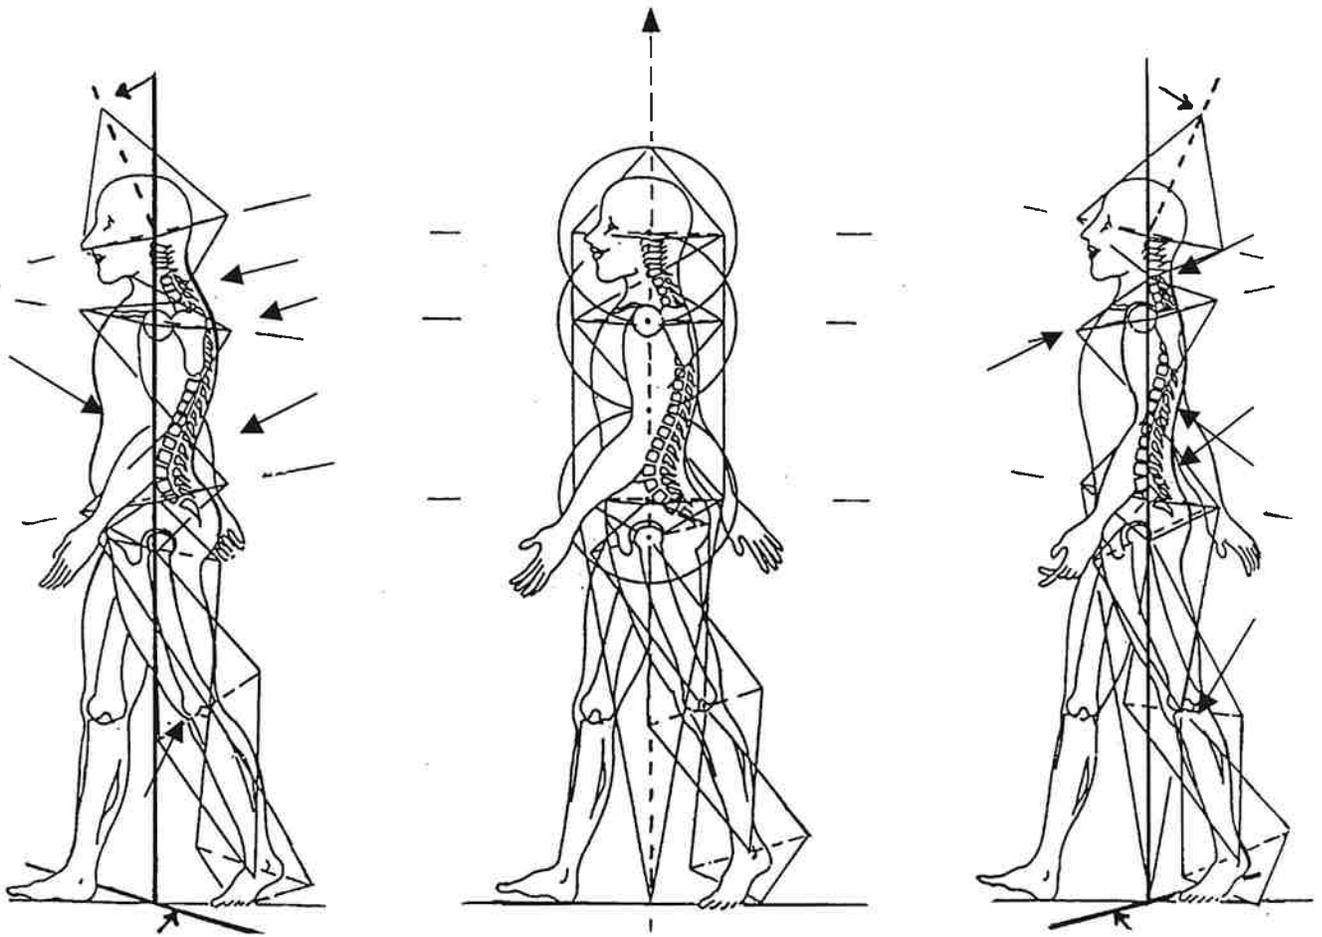

This is the expression of a **New Consciousness** that (**as the new moment of Life**) is now constantly transmuting in release/renewal all of the evolutionary concepts and beliefs gathered through the voyage of time.

This new, universal formation of Balance permeates all Creation with the atomic creativity of Life. It brings light, for example, to the meaning and existence of the ever-present force called **Gravity**.

**Gravity** – the omni-directional force that embraces the individual toward its center of being and towards the center of the Earth – is the field/facilitator for movement and Balance. Through the inner- grounding provided by this field, the human being can experience the true expansional- reality that is three-dimensions.

In this true expansion of three-dimensions, the natural animation of energy ( that is Life ) is the Balance-interaction among Gravity, Expansion, and the changing moment/movement of Life.

**COMPRESSIONAL  
PATTERN OF MOVEMENT**

**THREE-DIMENSIONAL  
BALANCE**

**OPPOSITIONAL  
PATTERN OF MOVEMENT**

Through the history of the past (that has been the evolutionary search of all time) **the field of Gravity** became interpreted as a force that constantly oppressed the physical body, binding it to the earth. This interpretation was innocently based in a physical misunderstanding of Balance that separated the individual human-self from the true balanced experience of Life.

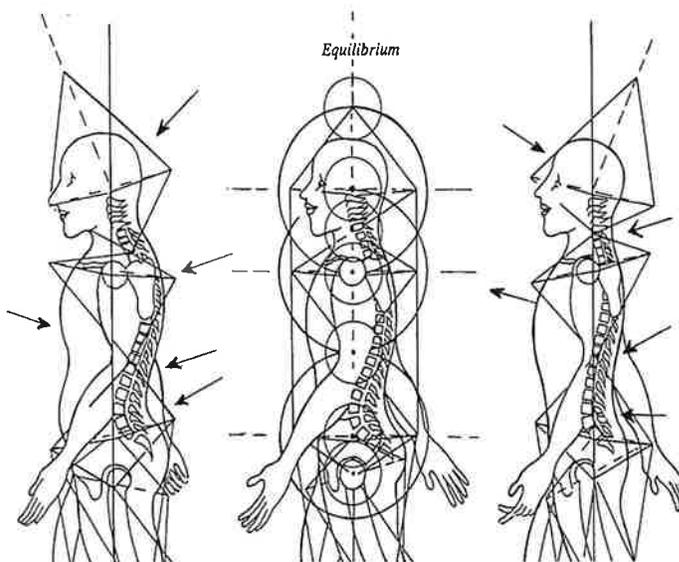

This interpretation of Balance involved a form of tensional forces ( within the body ) in which inner pressure ( within the sense of self ) enclosed and diverted the natural three-dimensional relationship of the spinal column: thereby creating a chain-reaction of self-opposing directions upon the entire skeletal relationship.

**This system of forces/directions expressed an innocent association with inner-pressure as being the physical-sensation of self.** This inner-pressure innocently expressed a system of mental reflexes that were the exact correspondence of neurological reflexes: expressing the exact deviation between the relationships of the skeletal segments of the body, at the joints.

This interpretation of forces ( centralized at different points within the spinal column and disseminated among all the joints of the body ) expressed a particular pattern of relationship among all the moving segments of the skeleton and a particular relationship of interaction within the entire muscular system.

This pattern reflected an oppositional resistance to the whole movement that is Self-equilibrium and to the universal, natural whole-movement that is the Universal Equilibrium of Life.

Inside of this particular pattern of Balance, the amount of self-resistance existing within the segments of the skeleton ( mirroring the function of the muscular system ) was the same as the individual's experience of the field of gravity and the electromagnetic field of the planet. Inside of this particular relationship to Gravity and to the electromagnetic field, some segments of the body had to constantly labor ( in compensation ) to support the equilibrated movement of the whole.

**This innocent laboring** was a direct mirror-reflection of the interpretation/delay of the consciousness, in which The Essential Self ( within each individual of life ) was imprisoned by the primal reflexes, from which he experienced the whole-movement of Life.

This form of compensatory-balance individually expressed the inner-sense of relationship existing between the three-senses of Self experiencing Life. Thus the physical body was a

map-of-consciousness in which the three senses ( mind, emotions, and physical reality ) reflected the particular relationship among all of the vertebrae of the spinal column and all of the segments of the skeleton.

These evolutionary misinterpretations of the three-dimensional Balance of the physical body have been the forms of compensatory balance, in which self-created pressure upon oneself innocently self-created the density of compression and the brittleness of opposition. Throughout the history of time, compensatory balance has been the source of all disease, aging, and physical suffering within the human experience of Life.

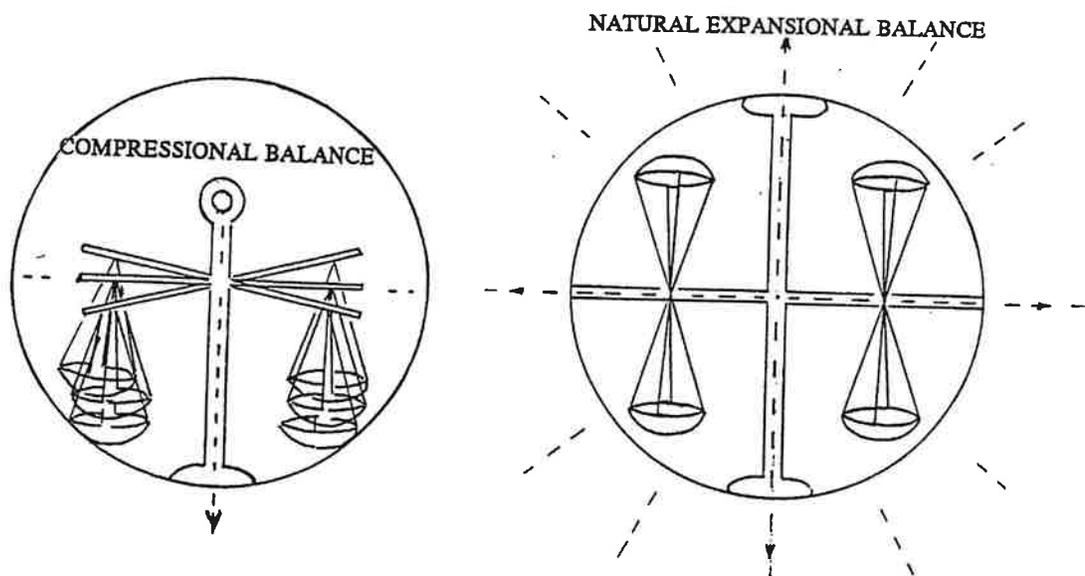

Inside of this evolutionary misunderstanding of physical Balance, the human self (innocently bound, by his own separation from the whole field of balanced movement that is Universal Balance ) thought the field of Gravity was an opposing force that constantly demanded the resistance of weight.

In truth, **Gravity – the cosmic glue that unites all Life as One – is the all embracing force of Love** that – through the atomic nature that is Universal Balance – gives centering and means of expansion to all physical particles of Life.

**Gravity** ( being the inner-unification of Balance, being the force of Love ) is the neutral field that ( as equal, omni/directional embrace ) constantly merges ( in mirror-reflection ) the essential, expansional experience that is human Life.

Within the evolutionary misunderstanding of **Gravity** ( as being the field that imprisoned in weight the physical form of life ) **Equilibrium** was also the mystery through which each individual of life became innocently relative, in relation to the absolute force that is the Universal Equilibrium of Life.

Thus, because of the misinterpretation of Gravity and Equilibrium, Balance became interpreted through evolution: as the centralization between two opposed scales, constantly dominated by the compressional equalization of weight.

In truth – in the natural movement engagement that is the three-dimensional Balance of Life – Balance is not equalization at all, but a sense of communion with all Universal Life.

**Balance** is a form of spherical-engagement that – by the very nature of whole-relationship embraces all opposite extremes, as the natural synchronization of One.

**This is the nature of Balance** – the Universal Equilibrium of Life – by which the movement of human existence is the constant replenishing nature of physical Life.

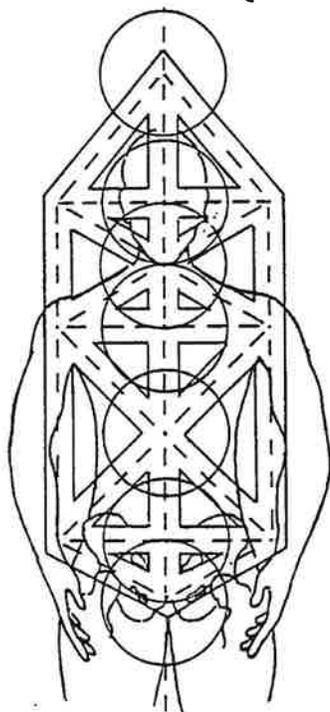

The naturally equilibrated movement of Balance ( within the human being ) is eternal, because it comes into being as a direct consequence of the absolute engagement that is the **moment** within the whole movement of Life. As Universal Equilibrium, this **MOMENT** is the natural momentum within the whole-movement that is universal Love.

Through evolution, the separated interpretations of the three senses of life ( searching to find the unity of Life ) were a direct reflection of self-created belief-systems of consciousness: innocently fragmenting that which has been and will always be, the whole sense of Life.

These were the belief-systems that as “the necessity of contrast” – brought about the cumulative knowledge, through which The Essential Self of Life finally merged all Creation with the Universal Balance of Life.

In this transformation, through the merging of Self with the unity of Life, the ever-present embrace of Love ( of the gravitational field of Life ) became the avenue of expansion that revealed the seven centers and attributes of Life.

#### SEVEN CENTERS OF EQUILIBRIUM

Through these seven physical centers that are the central human experience of the Universal Equilibrium of Life, each being re-engages in the harmony that is the ecstasy of the whole Biorhythm of Life.

This re-engagement with wholeness is an essential communion with the field of Gravity and the Electromagnetic Field of the planet.

**In his communion with three-dimensional Balance**, The Self comes into correspondence with an all-inclusive transformative field that realigns all of the compensatory directions of balance within the body. This is the re-instatement of Balance that reinstates the human body as the temple of Life. This is the reinstatement of unity that reconnects the human self with the creative reality that is the moment and movement of Life.

## THE SEVEN ATTRIBUTES OF LIFE

The seven attributes of Life are seven expressions of unity, merging seven centers of awareness into the unity of One. These seven attributes are the “centralization” of the given nature of Self-equilibrium: as it is one with Universal Equilibrium, expressing the three-dimensional natural communion of the human self with the balanced movement of Life.

### The Seven Attributes:

1. Self-Equilibrium
2. Whole Mind
3. Natural Sound
4. Boundless Feeling
5. Self
6. Physical Reality
7. Foundation

**These seven attributes of Life** are seven physical centers of mental, neurological, and biomechanical/skeletal interaction. Each and every one of these centers represents a natural expression within the whole sense of being – that is the human self experiencing the whole engagement of harmony that is Universal Balance.

**As these seven attributes** represent the naturalness that is the balanced movement of Life, they also represent the whole nature that is the human

expression of Life. In their unity, these seven attributes are the gift through which each being lives behind all compensatory interpretations of Balance that – as physical reverberation – separated the three senses of life into three non-simultaneous expressions of life.

**The seven attributes of Balance** ( as they are the natural physical engagement that is Universal Balance, expressing the balanced movement of Life ) are not an achievement but the natural-given nature of human life.

**They are natural**, because they are the self-equilibrated movement of the human self, as it comes into being through the equilibrated movement that is universe. **They are natural** because they are the central, physical engagement of the whole sense of movement of three-dimensions, as it is suspended by the universal Biorhythm that is the existence of ever-present Love.

Throughout the unity of these seven attributes of Life, the human-self experiences the physical sensation of Life as being the feeling of unity: the feeling that expresses the whole sense of physical freedom that is one’s engagement, with the natural flow that is the whole movement of Life.

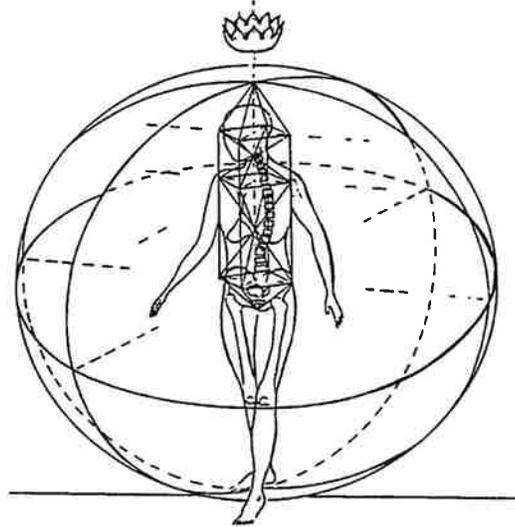

The experience of the natural flow that is the whole movement of Life is one’s communion with Universal Balance, centralized in the eternal moment of movement that is the ecstasy of Life.

**As the natural engagement of unity, the seven attributes of Life are seven expressions of Balance, experienced as the equilibrated motion of Life.**

## THE FIRST CENTER AND ATTRIBUTE OF LIFE:

### *Self Equilibrium - Crown*

The first attribute of Life is Self-equilibrium, also called Crown – the symbol of unity of The Kingdom of Love.

**Crown** expresses the center-fusion of three-dimensions with the fourth-dimension. This is the experience of Self-equilibrium, as it comes into being by the all-embracing momentum that is the Universal Balance of Life.

**Crown** as a physical/biomechanical expression of Balance, is centralized at the center top of the head. This center expresses the three-dimensional free-expansion of the whole body, as it is aided ( in natural Balance ) by the field of Gravity.

Thus, **Crown** expresses the union between gravitational conversion and life's expansion, revealing the neurological sense of Balance that is the Self's communion with the balanced movement of Life.

These two terms ( **Self-equilibrium** and **Crown** ) are interchangeable, as both represent the fulfillment of the evolutionary nature of man: by which two seemingly separated forces and senses – Gravity and Expansion – ( what is within and what is without, the human and the divine ) became merged as One, by the individual expression of Life.

**Crown**, then, expresses the merging renewal of consciousness that transformed all evolutionary interpretations of life into The New Consciousness of Life.

**Crown is the celebration of the unity of the human Self: living the Eternal Moment that is Universal Balance, expressing the futuristic reality of Life.**

**Crown is the whole reunion of consciousness, bringing into natural expression the re-creation of the Garden of Eden as Paradise.**

**Crown** reunites the most exalted and the most direct of all human experiences of life since, as Self-equilibrium, it is the center of whole stability: the center that fuses Heaven and Earth, as the natural momentum that is the three-dimensional movement of Life.

**Self-equilibrium – Crown** – is the highest center that ( as it merges the Self with universe ) is also the center of the Earth, the center of the Sun, the center of all planets, and the center of all suns.

Thus, **Crown** is the center of movement that unites The Self with the Eternal Moment of Life. This is the reason why **Crown** is the symbol of the Kingdom – because as the highest center – it celebrates the existence of all simultaneous centers that – as one unity – is the Universal Equilibrium of Life.

**Crown**, centralized in the unity of Life, is the fulfillment of human expression. Through the nature of its physics, it physically experiences the natural movement of Balance that is planetary Life.

Through the experience of union with Universe, the human Self ( crowned by the nature of his essential physics ) is grounded in its heavenly communion with Life. This is a holographic relationship of wholeness, in which all heavenly reality is simultaneously grounded in the earthly communion of Life.

**In communion** ( by the nature that is his Balance with universe ) man is heavenly and divine because ( he creates through his physical experience ) the One Kingdom of Love.

**The One Kingdom of Love** is Universal Creation, renewing all universal existence, through the heart of God. Therefore, the Kingdom is the creative reality of Life, uniting all Kingdoms with the Love of One.

**The Kingdom of Love** is the amalgamation-reunion of all the evolutionary love of time that ( now reuniting all of the beings of life ) reinstates the Garden of Eden within planet Earth, in the honoring of Creator's Love.

**The Kingdom** ( being the atomic-nature that is the Universal Equilibrium of Life ) is also the sense of oneness, bringing into natural Creation the reality that is The New Consciousness of Life: **The New consciousness of Life in which One is All, and All is One.**

Self-equilibrium, **The Crown of Life**, represents the lightness of being that is the absence of compression or opposition within the human body.

As it expresses the whole suspension of the body, it is also the full-awareness, the united sense of wholeness that is the absolute absence of polarized self-resistance.

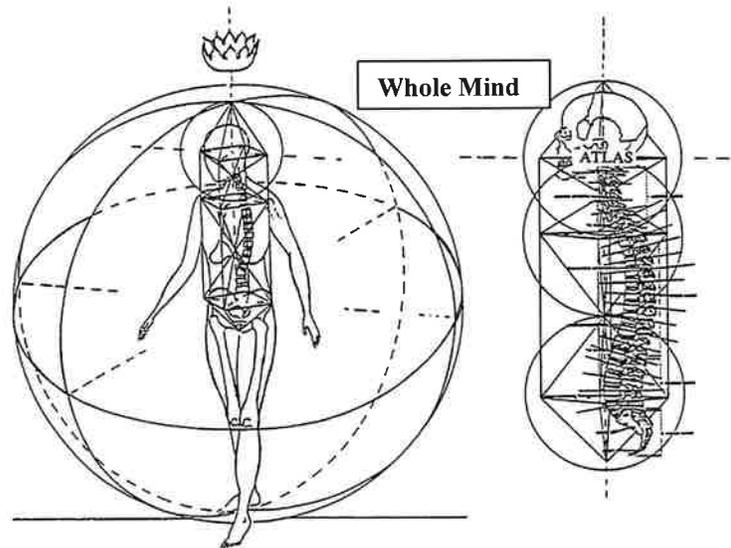

**Self-equilibrium** ( being the physical sensation of the harmony of Balance ) is also the sense of pristine clarity of mind, the brightness that – in its natural act of seeing – illuminates the natural existence of Life.

**Self-equilibrium** is the ecstasy of Life. This is the natural experience of The Self in the Garden: expressing the state of simultaneity of Life, that is consciousness involved in the mirror-reflection that is the image and likeness of Love.

**Self-equilibrium**, the first attribute of Balance within the nature of man, is supreme intelligence. It is natural idealism, grounded in the life of Love.

## THE SECOND CENTER AND ATTRIBUTE OF LIFE:

### *Whole Mind*

**The second center and attribute of life is Whole Mind.** This is the physical expression of three-dimensions, centralized at the center of the head, in the top of the spinal column – ( Atlas ).

This is the center that expresses all balanced relationships of centering among all the skeletal segments of the body at the joints, revealing the directions and angles that are the three-dimensional release of each and all the vertebrae of the spinal column.

This centering represents also the physical-skeletal equalization of right and left; front and back; above and below spatial directions that – reunited as one – becomes the centralization of the whole body in three-dimensional space.

**This center** also represents the equalization of Balance among all inner senses of merged polarity within the body that – as **The Matrix of Balance/The Tree of Life** – is the structural, omni-directional relationship that unites Gravity and Expansion with the movement of Life.

Thus, this center of spatial awareness expresses the tensile nature of Balance that – through its direct connection to the Electromagnetic Field of the Planet via, The Geometry of Balance – internally suspends as united motion, the three-dimensional form of the body.

This center is called **Whole Mind**, because it represents the fulfillment of consciousness, as it became transposed from evolution to Creation.

The evolution of consciousness ( searching to understand the meaning of life ) began with the separation of the Trinity of Life and the birth of the linear mind of life.

This was the mind that was to bring the full-scenario of externally projected discoveries to the surface of life as to reunite in time, the evolutionary mind of man with the Universal Mind of Life.

**Through this voyage**, the nature of linear mind ( as it constantly recycled itself, by ascending in knowledge throughout the experience of all the individuals of life ) became infinitely complex and infinitely bound.

These infinite complexities of mind were all the necessary expressions of human perceptions that ( by projecting the evolutionary tapestry of life upon the whole Biorhythm of Life ) provided the full-spectrum of consciousness that liberated the Self of Life.

At the instant of this completion ( as **The Essential Self** merged with the whole movement of Life ) the infinite interpretations of conceptual complexity of mind merged, in the fusion of Balance, with all of the simplistic notions of life.

**In this merging of Balance**, the simple and the complex became one: thereby returning the consciousness of human life to the naturalness that corresponds to the universal whole-movement that is the Universal Balance of Life.

This is the returning of consciousness to **the natural state of seeing** that is the universal mind of Life. Thus, **Whole Mind** is now the human experience of Universal Mind, perceiving ( as whole awareness ) the infinite intelligence of Life.

**Whole Mind** is the new mind of Creation, expressing the New Consciousness of Life.

This is the new consciousness that is eternal Creation, unfolding all possibilities of human experience, as they are centralized in the simplicity of One.

**This is the new mind of Love:** by being reunited to the whole of its nature, it is eternal presence/ the moment of Life, constantly recreating itself as the whole movement that is the ecstasy of Life.

**Whole Mind** is also called Universal Mind, because it is the central sense of whole-awareness that expresses Creation as the constant new beginning of Life.

**Physically**, the natural attribute of this center is the gift of a new sense within the human experience of life. This is the sixth-sense expressing the spatial awareness of three-dimensions.

This new sense ( **expressing three-dimensional spatial awareness** ) is **whole kinesthetic awareness**, reuniting the human-Self ( through the Geometry of Balance ) with the universal movement of Life.

**This new sense** – as it embraces, in full-awareness, the whole physical feeling of the human body – is the absolute absence of biomechanical friction. This is the natural sense of physical freedom that corresponds to the whole spectrum that is **Whole Mind**: experiencing as physical reality, the Unity in Motion of Life.

**The whole spectrum of mind** ( being the same as whole-consciousness and the whole movement of Life ) is the physical engagement of the individual with the constant renewal that is the replenishing nature of Life.

As it is the nature of The Eternal Moment of Life, **Whole Mind** is also the nature of physics: matching ( in mirror reflection of correspondences ) the realization that is the wholeness of Life.

Because of the very “isness” of its existence, **Whole Mind** is not an achievement but the natural holographic fulfillment of the human mind – as human mind is the intelligence that expresses Creation as the natural seeing that is the light of Life.

The **Whole Mind** that is **Universal Balance**, being the atomic moment of existence of Life, is the attribute of Life that is the absence of separation. **It is absolute unification**. It is One in its nature, and its nature is to unify.

**Whole Mind** is natural enlightenment, and it is the natural attribute of the human expression of Life.

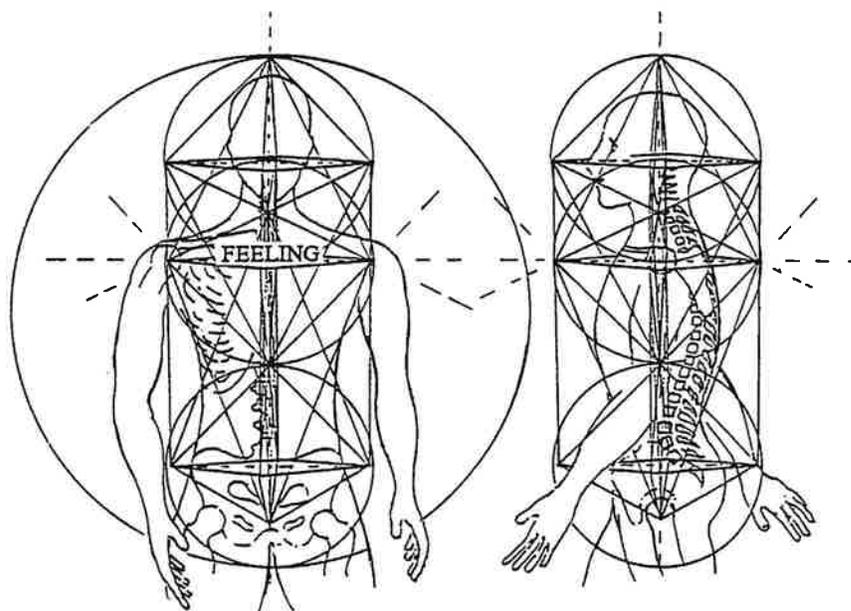

**Natural Enlightenment** is the living expression of light: unfolding as the intelligence that creates and receives simultaneously as the one Universal Kingdom of Love.

**The Universal Kingdom of Love** is the creative nature of Life, expressing the renewed nature that is the mind of God.

As unity-within-unity ( centralized in The Eternal Moment of Life ) **whole Mind** is the holographic unfolding of the natural reality that is the life of Love.

## THE FOURTH CENTER AND ATTRIBUTE OF LIFE:

### *Boundless Feeling*

The fourth center and attribute of life is Boundless Feeling. **Boundless Feeling** is the attribute that comes into being, as a direct consequence of the living communion of human life with the whole field of movement that is Universal Balance.

This center of biomechanical unity expresses the centering of chest, shoulder girdle, and arms. It is the Balance of tensional forces that balances (mentally, energetically and physically) the relationship of unity between Crown and Foundation.

**In its unity, the existence of this center is the natural opening of the human heart, as it lives the absolute presence that is universal Love.**

Therefore, in its physical, whole relationship of biomechanics, the Balance of this center (**Boundless Feeling**) is the absence of weight upon the human heart. This sense of Balance expresses the dissolving of all sense of self-compression or self-resistance: liberating the human experience to **be** ( in the natural correspondence of Balance ) the freedom of motion that is the equilibrated movement of Life.

**As balanced movement**, this sense of freedom within the human heart is the expression of the unification among all evolutionary interpretations of time – completing the transmutation that releases all innocent, superimposed conflicts upon the movement of Life.

Within the history of evolution, the physical body ( the vehicle of life ) was the constant recycled nature, through which consciousness escalated the knowledge of life.

Through this history, the voyage of mind was also the voyage of the emotional feeling of the heart and the voyage of the physical form of all life.

It was through these three separated ( and yet inseparable senses of being ) that consciousness traveled forever throughout all time, releasing/renewing the interpretations of evolutionary time.

Inside of this whole voyage, each individual of life was the lineage of a genetical existence that never has missed a frame of the movement of Life.

This realization of being the continuity of the genetical lineage of Life, allowed **The Essential Self** to trace himself back through all of the mothers and fathers of all time, arriving finally to his primordial Parents - **the Adam and Eve of Life**.

Inside of this reconnection with the beginning of his Life, **The Essential Self** recognized the enormous complexity of mental, emotional and physical reflexes that was the individual human being. **Each being of creation**, as the memory of his body of Life, was the recorded genetical history of all time. This was an evolutionary history of human life – that by never having missed a frame of the physical experience of Life – formed itself constantly moment- by-moment, frame-by-frame: by the thought, the feeling, and the action that was the self-created reality of Life.

Inside of this whole perception that reunited in continuity all of the memories of Life, **The Essential Self** recognized that **the thought** – the symbol of mind – expressed a feeling; and this feeling became a physical neurological sensation that ( as movement ) constantly integrated the three senses into One.

Thus, the body – **the eternally transmuted physical form of Life** – was the constant re-created nature that expressed the emotion and the mind of man in mirror reflection.

Inside of this whole perception, **The Essential Self** understood that the liberation of the mind, the liberation of the emotion, and the liberation of the body were not three different aspects of human life – but one and the same.

**The Essential Self** also understood the enormous complexity existing within the essential makeup of each individual of life: as each individual ( like himself ) had also forever recycled his genetical makeup, from the first moment of time.

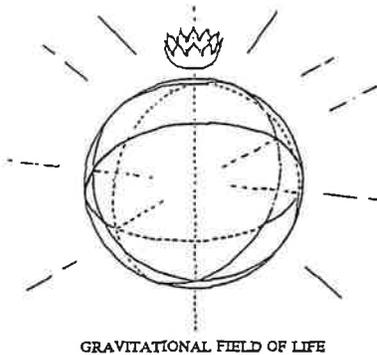

Inside of the whole field that was the evolutionary consciousness of life ( the eternal voyage of recycled mind ) was like a great temporal body, expressing the feelings, the actions of life.

Existing within this great, temporal body of life; was the genetical make-up of each individual of life that ( mirroring the whole field of evolution ) transmuted itself throughout all time: searching to regain its natural state of freedom, so as to re-encounter the essential Adamic nature within its life.

**Adamic nature is the essential expression of the unity of Life.**

The history of this genetical voyage of consciousness ( searching to find the unity of Life) has been the human relationship to what has been called "The Gravitational Field of Life."

Throughout the voyage of time, The Gravitational Field of Life ( as it was actualized as the Gravitational Field of the Planet Earth ) embraced the human body toward his center of being and toward the center of the Earth. And, through this embrace, the Gravitational Field of Life atomically acted as a mirror-reflection of the primal sense of expansion, through which each human being experienced the movement of Life.

Acting as a mirror-reflection of the primal reflex of movement that is the human expression of life, the Gravitational Field of the Planet provided ( as pure Principle ) the means of equilibrated suspension.

Thus, **in its pure nature**, the Gravitational Field was the equilibrated suspension of three-dimensions: expressing the expansional relationship of the human self, in his whole engagement, with all celestial bodies of Life.

**This expansional relationship of Balance was always the gift of freedom**, as it was inherent in the essential sense of Life; and as it was concealed within the primordial man, Adam mirroring in image and likeness, the original imprint of unity that is the Universal Balance of Life.

Engaged in this primordial unification of forces, the natural Balance of the physical body of man ( as he was the image and likeness of God ) was pure three-dimensions, fully engaged in the unity in motion that was the whole movement of Life.

But, with the separation from the garden of the Trinity of Life – reflecting a linear separation among the three senses of life – the physical Balance of the human body became relative.

Inside of this relative interpretation of Balance ( mirroring the principle of unity of Life ) the human-self mirrored himself ( moment to moment ) in relation to the unified field of Life. And, through this mirroring, the human self experienced his relative expansion as being the same as the relative embrace of the field of Gravity. This relative embrace of the field of Gravity became, then, his relative interpretation of unity, as it was experienced within his life.

**This was the nature of Balance**, the moment-to-moment, atomic equalization existing within the Biorhythm of Life, through which each human being ( in free will ) re-created his physical experience, through the projection of his own sight.

This was to be the temporal voyage of self-expression, through which the evolutionary consciousness of man ( by gradually expanding the sight of his mind ) was to finally rediscover the given Principle that is the expansional nature of Balance.

This given Principle was totally interdependent with the given Principle that was the Gravitational Field of the Planet, because both were always merged as one by the natural moment within the whole movement of Life.

Expansional Balance then ( in its union with the Gravitational Field of Life ) was the whole field of energy that is the **Boundless Feeling of Life**: always, as pure Principle, connecting the individual through, Self-equilibrium, with the Universal Equilibrium of life. At the center of this merging communion between Self-equilibrium and Universal Equilibrium, always existed **the eternal unity** that is the creative moment of Life, expressing the whole movement of Life.

Through the history of evolutionary mind, because the three senses of self were not merged yet as one, human perception interpreted the Gravitational Field of the Planet as being the binding nature of life.

In truth, this binding nature was the reflection of a polarized design of mind: in which perception was coming into being, inside an infinite system of dualistic gradations and differentiations of life.

This mode of self-discovered consciousness ( based in a field of duality, separated from the triune unity of Life ) produced within the individual of life a constant fluctuation within his sense of self. It produced physical sensations of being, in which the human self experienced an unbearable lightness of being: mirrored ( in the other side of the spectrum of evolutionary consciousness ) by an emotionally depressed sense of life.

These were the highs and the lows within the evolutionary spectrum of consciousness of man, self-creating – as human experience **earthly reality**; expressing the coordinated creations of all individual interpretations of life.

**Through these fluctuations**, the essential individual of life transmuted his nervous system through the many emotions of life, until the moment of evolutionary time in which the mind, the emotion, and the physical experience of man, could understand the suspended nature of true Balance – and ( through this experience ) consciously regain his three-dimensional communion with the all-embracing Field of Gravity.

**Throughout the voyage of evolutionary life**, the resolution of all compartmentalized interpretations of consciousness ( within human life ) were the same as the resolution of human love: **as Love is the whole feeling of the mind and the action of man.**

**Love** is the three-dimensional embrace of the Field of Gravity, centralizing the human heart.

**Love** is the whole embrace that provides the whole expansion that is the Self's communion with the whole spectrum of Balance – Universal Life.

The whole meaning ( existing within the Field of Gravity ) was finally brought into the surface of life by **The Essential Self**, by its merging communion with Universal Balance.

Inside of Universal Balance, **The Essential Self** understood ( for the first time in the history of his mind ) that his mental sense of expansion was the same as the essential sensation that expressed the **Boundless Feeling** within his heart.

**The Essential Self** understood that, in the merging unification of these three senses, was the whole energy that expansionally neutralized Gravity and connected him as one with the Universal Equilibrium of Life.

Centralized now in the actual experience that is the Equilibrium of Life, **The Essential Self** understood ( in one instant of time ) that the entire voyage of his evolutionary sense of becoming was the time needed for him to perceive the expansional feeling that was the given nature of his Life.

At the moment of this recognition, **The Essential Self of Life** ( now experiencing the ecstasy of his Life ) knew that he had carried the world on his shoulders: as the world was the image and likeness of his own mind, mirroring – as physical feeling the physical weight of his life.

What he called the “world”, were all of the symbols existing within the full-spectrum of his evolutionary mind; and he had been imprisoned by the reflections of separation existing within this interpretation within his life.

Throughout all of these transmutations of all of the discovered forms of imprisonment (existing within the evolutionary interpretation of his life ) **The Essential Self** experienced – for the first time – the nature of **healing** that is the natural, Eternal Moment of Life.

Now ( being at the center of the natural moment of life ) **The Essential Self** recognized that **healing** was a word created, in the acknowledgment for the need to repair the separation from the health of Life.

Inside of this recognition, **The Essential Self of Life** understood ( in one moment of time) that he became instantly **healed**, in the moment that he touched The Eternal Moment of Life.

**The Eternal Moment of Life** was his life reunited to the whole Biorhythm of Life. And his **healing** was his communion with this all-engagement that constantly renewed the wholeness of Life.

**This renewal** was now setting him free of all of the reflective reactions, from which he had sensed the weight of time as the dream of time.

**Now** – as he experienced the nature of his weightlessness – **The Essential Self** realized (through the Boundless Feeling of his heart ) that he was no longer separated, as the individual abstraction from life.

Inside of the **Boundless Feeling** that is his whole engagement with Life, The Essential Self now experientially understood ( in one moment of time ) that, through his communion with Love, he is replenishing himself and all individuals of Life.

**Inside of the timeless experience of his Life**, he heard the words: "to change the world, it takes only One“.

Honoring the Truth within this whole awareness of his Life, The Self merges with the physical form of his Life: his human body becoming instantaneously released from the reflective, binding memories that have been the evolutionary interpretations of his Life.

**In this release**, whole emotion became whole motion; and in whole motion, the right and left sides of the body became the reunited triune nature of Life.

**Thus**, engaged in the unity of Life, the whole body became the united segments and systems of function, expressing the **Boundless Feeling** of man.

**Now**, in the wholeness of experience that is the **Boundless Feeling of Life**, all mentally separated systems were merging ( in synchronization ) into the unity of One.

**Inside of oneness**, he had repaired all of the genetical memories of time, reuniting with the image and the likeness that was the whole spectrum of his heart.

**Thus**, through **The Essential Self's** discovery of the essential memory of unity of Life, the center that is **Boundless Feeling** became also the center of all Love. And, through this center, the movement of Balance ( as it is internally self-experienced and externally supported by the Geometry of Balance ) become the natural experience that is the merging communion of Self with Life.

Through this center, **the merged communion of Self with Life becomes absolute communion with all universal existence.**

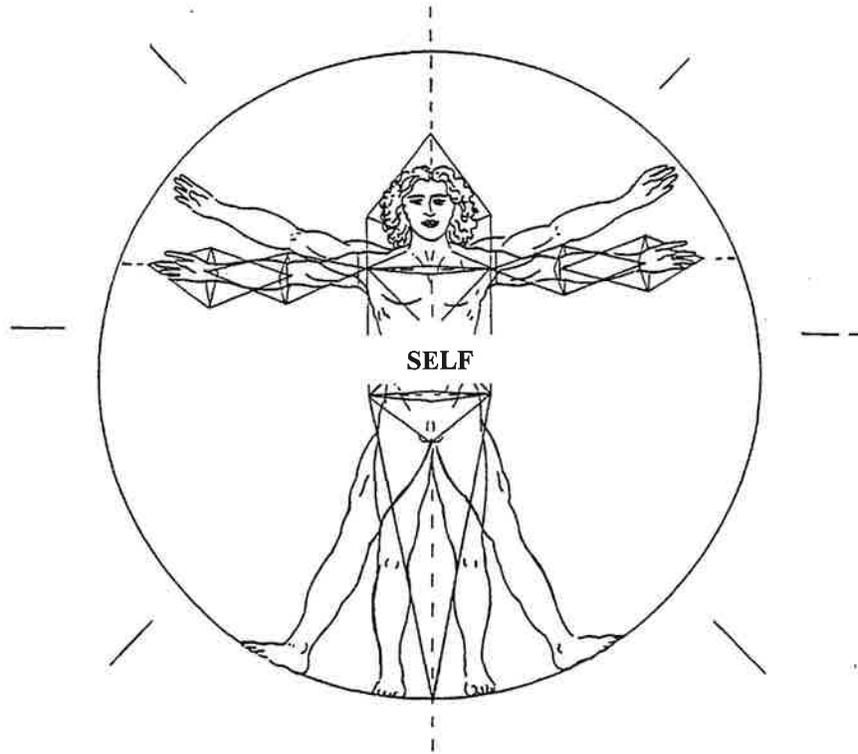

This center is the communion among all of the skeletal segments of the body: the communion among all ligaments, all muscles, all organs of function: the communion among all conceptual thoughts and emotional feelings that express the physical reality of Self; the communion among all human beings; the communion with all of nature embracing the whole field that is Universal Balance.

**Thus**, through the Self's communion with wholeness, the human attribute of this fourth center "**Boundless Feeling**" is now the living expression of unified Life.

Through this center, **the center of expression of human Life**, the human body is now the temple: the temple of Life, centralized in the replenishing nature that is The New Consciousness of Life celebrating The Kingdom of Love.

## THE FIFTH CENTER AND ATTRIBUTE OF LIFE:

### *Self*

This center and attribute of life is called “**Self**,” because it expresses the central fusion of Self with Universe. It expresses the unity of consciousness that is the merging communion of the human self with the moment that is eternal Creation, the atomic moment that is God.

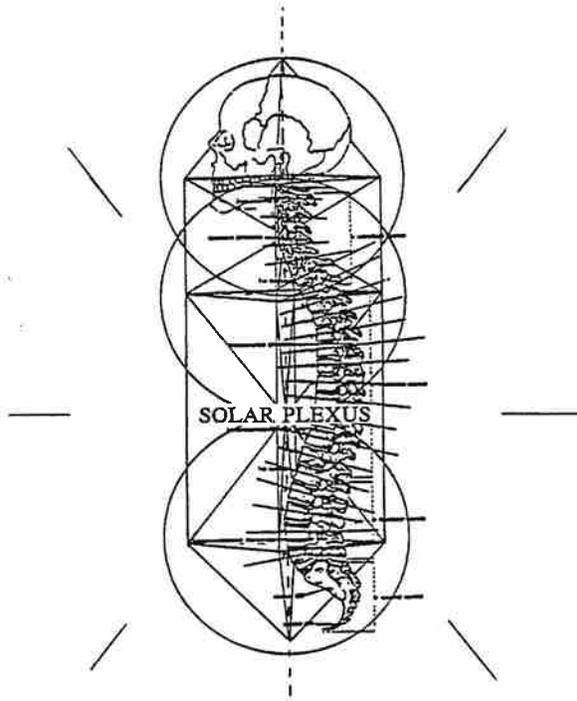

This attribute of Life is also called "**The Center of Beauty**" because – being the natural self-expression of the creativity of Life – it is constant appearance, constant renewal, reflecting the translucent creation that is the beauty of Life.

**The fusion of Self with Life is beautiful** because, as constant appearance, it is the new: the new, universal Creation that transmutes all sense of age and memories of time, into the constant newness/renewal that is The New Consciousness of Life.

**Thus**, the center that is Self is called "The Center of Beauty," because it is the central reflection of the natural, Eternal Moment of Life.

Beauty, as center, is the constant renewal of the intelligent movement of Life.

It is absolute motion: the motion that is the **PRESENT** moment of Life, reuniting all human life with the universe of Love.

The biomechanical/structural definition of this center is the **Solar Plexus**: the physical center of three-dimensional expansion of the whole spinal column and the whole body.

This center is also called "**The Center of Life**" because ( as the neurological center of the whole body ) it is simultaneous with universal existence. It is **FUSION**: the atomic implosion/explosion that is the palpitation of the universal heart of Life, giving being to the equilibrated sensation that is human Life.

**As the fusion with Universal Balance**, the life of this center is the mental, emotional and physical expressions of the unity of Life.

The natural expression of unity of this center is ecstasy – **the natural feeling of human Life** – as it is united to the natural moment-to-moment change that is the whole movement that is universal Life.

This center is also called "THE CENTER FREEDOM OF SELF" because it is ( in its fusion with Universal Balance ) the freedom of its nature; the sense of its beauty; the feeling of its Love.

Through this center, as this center, human expression is the creative attribute of Life. Human expression is beautiful, because "beautiful" is the living expression of the wholeness of Life.

**This center** ( as it is the natural moment/renewal of the movement of Life ) is also called Messianic Life.

**It is called Messianic**, because it represents Messiah - The Eternal Son - the eternal new consciousness that is the Universal Mind of Life: repairing and re-creating all things anew, as the new creation of wholeness that is The Kingdom of Love.

This fifth center and attribute of Life/Self became liberated as **The Essential Self of Life**: realized his freedom from all of the evolutionary interpretations of temporal mind, merging in Love with the three natures of Son.

**The three natures of Son** were the three individual personifications of human perfection reunited as One – The Eternal Son.

**The first** was the essential memory of the Image and Likeness of God – **Adam** – the prototypal human naturalness that concealed the essential wholeness of Life within his memory.

**The second** was the presence of **Christ** – the first coming of Love – that by, the act of re-establishing union between Father and Son, brought salvation to the separated nature of man.

**The third** became **The Essential Self's** understanding, through the collective experience of all human Life, that salvation was inherent in the moment of eternal unity that is the Balance of Life.

**In this moment of essential perfection**, salvation became the act that dissolved all of the separated projection that ( as veils of judgments ) fragmented the consciousness of man.

Within the release of this last veil that covered the consciousness through which he experienced Life, **The Essential Self** embodied the nature of **The Second Coming of Love**: merging the three natures of son within the center of Life.

This was to be the merging of consciousness that reunited ( at last ) the essential human memory of time with the center of continuity that is the futuristic renewal of universal Life.

Inside of this renewal of consciousness ( expressing the merging fusion of time with the eternal nature that is Universal Balance ) the all-evolutionary search for the unity of Life became fulfilled as **Eternal Son**.

**Eternal Son is the merging reunion of the Human Self with Life**. Therefore, the term **Eternal Son** can also be interchangeable with **Eternal Self**.

**Eternal Self** and **Eternal Son** are terms that express the communion of human consciousness with the whole movement that is Universal Balance, surfacing as the present renewal of consciousness that is the universal unfolding of Creator's Love.

**The Essential Self, Became the Eternal Self – The Eternal Son** – in the moment of merging with Creation, reuniting all individuals of Life as ONE. It is through this essential merging, that the fifth center and attribute of Life became fully revealed as the natural, essential beauty of Life.

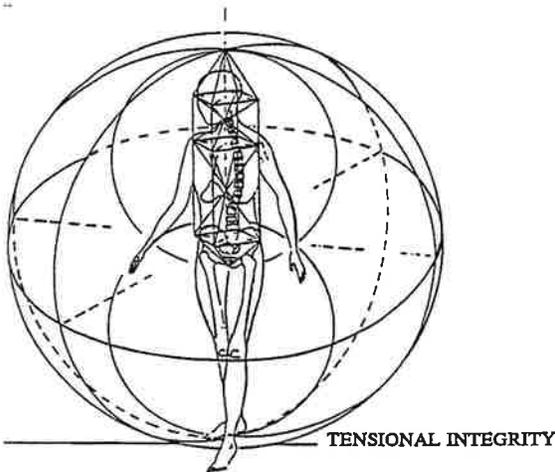

As the natural, essential beauty of Life, this center is the **center of expansional movement** that exists ( in its natural atomic harmony ) through its balance with the Field of Gravity and through its engagement with the unresisted, ever-flowing whole movement that is Universe.

**Therefore**, this center ( an attribute of Life "SELF" ) is the actual center of the physical body, expressing the Tensional Integrity of Balance that ( as full expansion ) engages and is engaged by the whole movement of Life.

**Tensional Integrity is a word created to express the universal attribute that is the wholeness of One.**

**Tensional Integrity**, as pure **Principle**, is the natural suspension that is Universal Balance. It biomechanically centers, by the nature of universal expansion, the physical body in three-dimensional space.

**Tensional Integrity**, being pure **Principle** is the same as the Tree of Life; the same as the Matrix of Balance; expressing the natural suspension that three-dimensionally balances the omnipresent Field of Gravity.

**Tensional Integrity** is the suspension of Balance through which the human self senses himself as One. In this natural suspension of Balance, the ten Dimensions of skeletal reference that are the Tree of Life are ONE. In this oneness, the highest extension that is the merging of Self equilibrium with Universal Equilibrium is simultaneously the lowest experience of grounding - the foundation that is the essential physical sensation of Life.

At the center of this Tensional Integrity, is the Solar Plexus, unifying Earth with Universe as One. This center, **the Solar Plexus**, expresses the Balance of the nervous system as it is fully expanded, and therefore fully engaged, in the natural wholeness that is the beauty of Life.

Therefore, the Solar Plexus is the center that expresses the tensional balance of Life. This center expresses the natural engagement through which the human self **passes through**, (as centered radiational expansion) the whole embrace that is the Gravitational Field of Love.

This **passing through** is the form of the all-inclusive connection that unites the human

body with the holographic movement that is universe. This is the form of **passing through**, through which the human self becomes the natural expression of whole consciousness that is the ecstasy of Life.

**This center of Life** ( expressing the sense of unity that is the ecstasy of the whole movement of Life ) is the living presence of messianic nature, honoring in fulfillment the evolutionary remembrance of Christ.

Within the fable of time, the crucifixion of Christ was the sacrificial act, through which the physical form of the human body became crystallized, as the redeeming pain of all time.

Through this redeeming crystallization of the physical body, all the physical sense of pain that bound the mind, the feeling and the action of human life became instantaneously liberated, as it **passed through** the center existence of Life.

With this **liberation**, a transposition of consciousness began to take place within the evolutionary nature of human life.

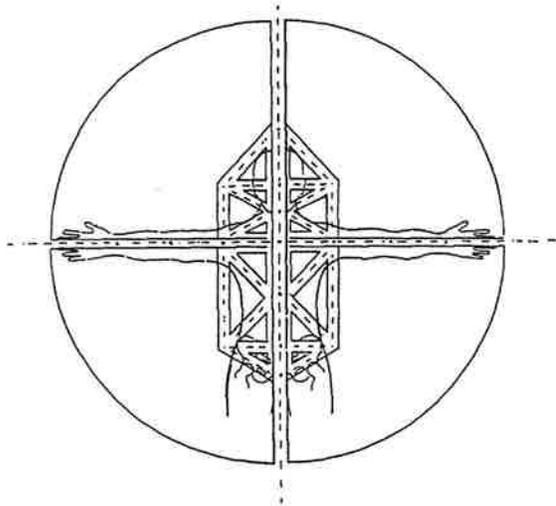

This was the beginning of a completely new transmutation towards lightness of being: liberating the physical, concrete density that ( as gravitational resistance ) imprisoned the mind, the feeling and the action of man.

This imprisonment was a sense of separation, experienced as a sense of disconnection from the all-inclusive harmony that is the heavenly unity of Life.

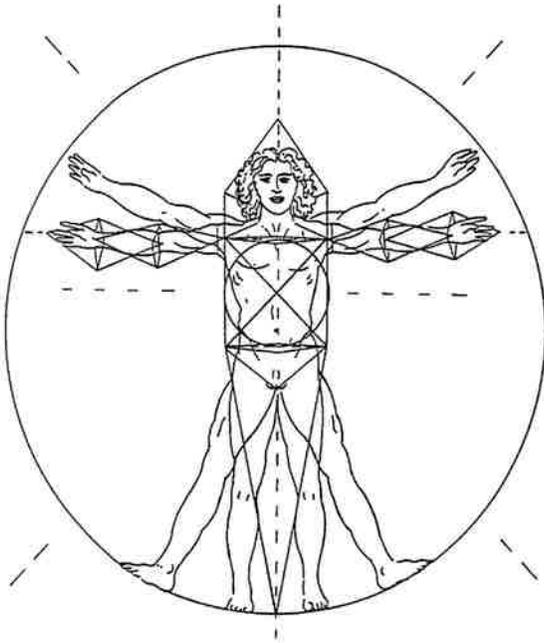

This transmutation became completed, as **The Essential Self** merged with Universal Balance; and as the center of Self – **the Solar Plexus** – became the natural center of Creation, renewing the consciousness of man as the fulfillment that is Eternal Son.

In this new formation of unity, fulfilling the completion of the myth of time, the cross of matter of the sacrificial memory of Christ became transposed as the spatial cross of Life.

**The spatial cross of Life** is the center of Tensional Integrity, unifying all planes and directions within the human body, as it is suspended by the three-dimensional expansion of Life.

**Through this spatial cross**, the physical sense of weight that once imprisoned the consciousness ( that is human life ) became Balance by the Love of Life.

**This Balance** became, then, the natural crucifixion in space that merged the all-embracing field of Gravity with the natural expansion of Life. This is the merging through which Gravity and Expansion ( centralized through the Self of Life ) became the whole field of energy that is universal Love.

**This is the Cross of Life**, in which what was vertical and what was horizontal become neutralized, as the passing-through nature of Balance.

This is the transmutation that releases all human discomfort and pain, through the boundless, equilibrated Balance that is the ecstasy of Life.

## THE SECOND COMING OF LOVE

This is the fulfillment of The Second Coming of Love in which, through the merging of the **Essential Self** with **life**, the crucifixion of matter ( expressing the pain of all human life ) became the liberation that is the **New Consciousness of Man**.

Through this liberation, The Christ – **the perfect remembrance of the Love of man** – became the center of The Tree of Life – The Eternal Son – the new embodiment of consciousness merging the human and divine natures of man as they correspond to the present, futuristic renewal that is Universal Life.

As the expression of futuristic renewal, this center SELF, is then **perfection**, because it expresses The Eternal Moment of Life as **the perfect action** that is the natural mind of Christ, **the perfect action** that is the natural mind of man.

**In its perfection as perfect action**, this center is beautiful, because it is based in the ecstatic communion of universal Love.

This ecstatic communion of Universal Love is the re-engagement of human consciousness with the universal flow of Life. And, it is by the nature of his participatory creation, that the human self is now free from any sense of self-projected judgment: free from, any self-created form of confusion; free from any of the interpretations that innocently covered the creative moment of Life with the evolutionary confusion of consciousness searching for the unity of life.

**Eternal Son – the center of Self – the expression of beauty of human Life** – is the renewed nature of Creation, the non-separation, that is the harmony of the whole movement of Life.

**Eternal Son**, being the messianic consciousness of Life, and lived now as the SELF OF LIFE is the nature of The Kingdom of Love, springing from the center of universal existence from which all things are One.

**In the Kingdom of Love** ( expressing the fulfillment that is the unity of Life ) Christ is now the mind, the heart and the physical form of all beings, experiencing the central communion that is Universal Life.

**In The Kingdom of Love**, all human expressions of life are CRRIST - LIFE. They are the messianic intelligence that is **Eternal Son**, reuniting all sons of life with the creative unfolding that is universal Love.

**Through Universal Balance**, the most natural attribute/expression of the messianic mind of Christ is also now the most natural attribute of human Life, as human Life is now The New Consciousness of Life, fully expressing the nature of its illuminated sight.

As **Messianic**, the nature of man is now the new light that sees all things anew, experiencing the sense of unity by which all seemingly separated senses of existence have become reunited as the light of Life.

**In Truth**, Messiah – the universal nature of man – has always been here, self-contained, as the presence of wholeness-within-wholeness of the whole-field that is the Universal Balance. **Messiah** has always been present through the Biorhythm of Life, safeguarding the boundless intelligence that is the Eternal Moment of Life.

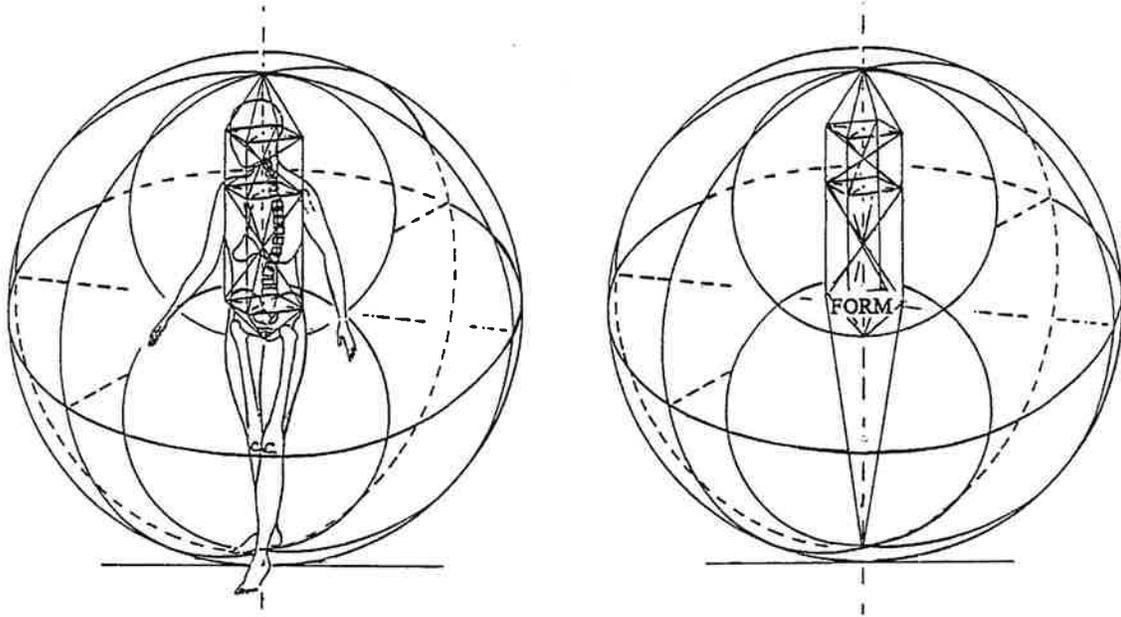

**Messiah**, as the fulfillment of all Creation, was impressed in the prophesy of evolutionary- time that said that when the time was to be ripe, Messiah will come and – in its coming – would release all veils that covered the whole vision of man.

Messiah, **the now united human self of Life** – is the fulfillment of all human search for the meaning and unity of Love. It is the returning fusion of Adamic nature to the intelligent nature that is paradisiacal Life. It is the returning of all human life to the universal reality that is the boundless freedom of Life.

Within the evolutionary unfolding of time, Messiah – **The Christ of Life** – was to bring a kingdom to the chosen race. In the fulfillment that is Universal Balance, the prophesy has fulfilled itself. Messiah, the consciousness of unity that is the central expression of Life, is the kingdom of the chosen race – **the whole human race** – that ( having traveled as evolution throughout all of time ) has reunited with the whole of its feeling: the atomic, essential movement that is universal Love.

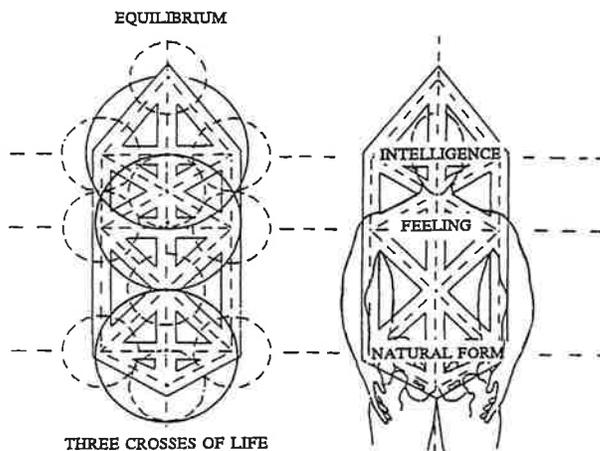

## THE SIXTH CENTER AND ATTRIBUTE OF LIFE: *Physical Reality*

The sixth center and attribute of life is **Physical Reality**, and it is called as so, because it is the center of structural Balance. It is the center of stabilization of Self- equilibrium, through which the whole structure of the body, as well as the seven centers and attributes of Life – are constantly expressing the balanced movement of Life.

**Structurally**, this center is situated at the center of the pelvic girdle and – via the legs – represents the mobile three-dimensional interplay between the all-embracing Gravitational Field and the all-exuding Field of Expansion of Life, as they are instantaneously centralized as Self-equilibrium by The Universal Equilibrium of Life.

This center, **Physical Reality** – along with **Boundless Feeling** and **Whole Mind** – are the three senses of Self that, reunited as one, are the merging of the horizontal and vertical forces of Balance.

**These forces** are the intersections of whole skeletal relationship among the three crosses that, reunited as one, are The Tree of Life: expressing the merging of the three senses of self ( as Self Equilibrium ) with the natural momentum that is the constantly changing Universal Equilibrium of Life.

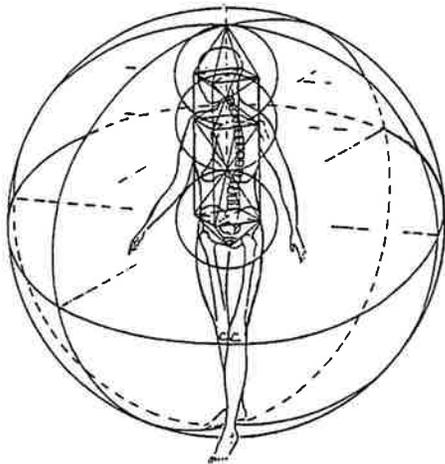

**In its macrocosmic existence, this center and sense of Life** – Physical Reality – is the supporting, suspensional centering of the sense that is the Boundless Feeling of Life and the sense that is the Universal Mind of Life. In their triune union of Balance, **Physical Reality** is the immediate atomic action that is **Creation**, giving meaning to all Life.

**Thus**, this center represents the fulfillment of the physical form of Life that ( balanced by the nature of universal biomechanics, existing within Universal Balance ) expresses the physical reality of whole movement that is the Universal Equilibrium of Life.

**The Universal Equilibrium of Life** is the exquisite dance of harmony, through which the physical human body and all the celestial bodies that make up the universe are simultaneously constantly reunited as One. In this harmony, the Balance of the human body and the universe is a perfect continuous merging of time and eternity, in which within every fraction of a second – every frame of time – there is unity.

This is the balanced unity that is **Physical Reality**, in which all universal relationships in motion bring into creation the environmental unity of the planet Earth housing the Life of all human Life.

**As Balance**, the moment/movement of Universal Balance that is the New Consciousness of Life is perfect biomechanics. It is the one whole movement of universal existence that – as **Physical Reality** – never for an instant has ceased to exist. It is the given; the constant; unrelenting; unrestrained; unobstructed moment /movement of Life, animating the physical form of all Life as the living expression of Life. This is the reason that it is called ‘The Eternal Moment of Life.’

**Thus**, this center/**Physical Reality** is the nature of **the Eternal Moment**, appearing in renewal as the miraculous traveling of the whole movement of Life.

**Physical Reality** is a perfect mechanism: **THE BODY OF LIFE**, suspended as a balanced relationship in motion, expressing the whole field of Tensional Integrity that is universal Love.

In the unity of physical existence that is the reality of Life, the physical nature of structural form (as it is suspended and directed by the Universal Equilibrium of Life) is supreme and absolute.

**It is, in its nature, THE UNIVERSE – the physical form of all Life – constantly united and renewed within the atomic instant that is the equilibrated nature of Life.**

**This center** – Physical Reality – became free, as **The Essential Self** discovered that the **physical form** of all Life has been judged as not being able to house the eternal nature that is paradisiacal Life.

This was the judgment that separated physical existence from the heavenly nature of Life.

Inside of this recognition, **The Essential Self** also understood that the physical form of all Life was the Feminine Principle of Life.

The Feminine Principle of Life has been ( through the entire history of evolution ) the finite whole amount of energy that was the universe. This was the field of consciousness that –through the eternal Biorhythm of Life – transmuted itself forever in evolutionary becoming: searching to match the holographic perfection that is the image and likeness of God.

This voyage within the physical form of all Life became completed, as **The Essential Self of Life** – honoring his mother and the mothers of all of the individuals of Life – restored in perfection ( as perfect action ) The Trinity of Life.

This was the completion of the voyage of all time, consciously merging the third-dimension with the fourth-dimension. Through this completion, human consciousness and universal consciousness became ONE, revealing...

**The Eternal Father** to be the transparent all-dimensional intelligence that is the whole mind of Life.

**The Eternal Mother** to be the receptive whole-nature that, as Boundless Feeling, is the physical form of all Life. And ...

**The Eternal Son** to be the creative reality of consciousness that, embracing all human Life as One, is the living expression of The Eternal Moment of Life, renewing all Creation with the Life of Love.

This has been the completion of the voyage of all time – expressing the length of time that it has taken for all of the individuals of Life – to externally expose ( as creative self-expression ) all of the principles and notions that corresponded to the unity of Life.

These were all of the principles and notions that could match – in natural correspondence – the human evolutionary interpretation of consciousness with the whole field of consciousness that ( as **Physical Reality** ) is the Universal Balance of Life.

Through this merging of consciousness, the unity of Life is now the new nature of physics through which the physical form of the human body ( **the human vehicle of Life** ) became fully restored, by its essential correspondence, with the eternal whole-movement of Life.

In this restoration of correspondences, **Physical Reality** became what it is: the existence of The Eternal Now and the source of all vital energy, as vitality is the natural attribute of the physical wholeness of Life.

**Physical Reality** – as the union of The Trinity of Life with the Unity in Motion of Life – is now the exalted force of Life. As it is reunited to its intelligent nature and to its essential feeling it is now the structural center, fully suspended and directed by universal Love.

**Thus**, through this center – now fully-engaged in the communion of Balance – the masculine nature, the feminine nature, and the creative center/fusion of Life are constantly reunited as One – as Love.

This is the restoration ( in Oneness ) of The Trinity of Life – **the three senses of universal Life, existing within each individual of Life** – as they are now returned to the harmony of perfection that is the natural movement of Life.

This is the natural movement of Life, as it existed as paradisiacal Life: where Adam, Eve, and the Wisdom of Life were not yet separated into the evolutionary nature of life.

Inside of wholeness, **Adam** – the prototypal perfection of the image and likeness of God – **Eve** – the resplendent physical form of all Life and **Wisdom** – the knowledge of Life – lived the existence of Life in natural ecstasy.

**This was the natural state of ecstasy**, in which the not-yet-separated Trinity of Life ( as it was engaged in the natural Creation that was the Edenic Garden ) instantly related – to all that was seen – as being the knowledge that was also Life.

**This was the natural state of consciousness**, in which everything was known by the natural form of seeing. This was the form of being ( living the natural state of the union of Love ) expressing the natural energy of Life, that which – in time – became called “**androgynous**.”

“**Androgynous**” was a word created to describe a state of being, in which the mental, conceptual abstraction of separation of gender ( between what was to be differentiated as “masculine” and what was to be differentiated as “feminine” ) was not yet realized.

In this unseparated state of consciousness, Adam and Eve ( partaking of the Wisdom that was the wholeness of Life ) were also the whole-sense of self – the whole, united, ecstatic expression – that is the whole-movement of Life.

**In this natural sense of wholeness**, The Trinity of Life was not yet divided into the mental perceptions that are self-consciousness. Therefore, the **Masculine**, the **Feminine** and the **Wisdom of life** were constantly fluctuating, perfectly in Balance, as the whole-movement of One.

This was the natural state of unity, in which **Physical Reality** ( as it was fully engaged in the natural communion that was the ecstasy of Life ) **was the sensorial whole-feeling of Life, expressing the whole-field of Love.**

When the time for beginning – as the time for the evolutionary discovery of life became fully-ripe – an essential choice became released through the physical form of all Life.

This choice was that The Trinity could remain in the experience of The Garden – forever partaking of the ecstasy of Life – or in free will, it could discover ( through personal experience ) that which was the given nature of Life. It was in this choice that the whole-consciousness that was the Trinity of Life decided “to know itself fully.”

The Trinity entered the whole voyage of self-discovery, so that – at the completion of time –the **Physical Reality of Life** could be fully known and appreciated as the experiential understanding that is the fullness of Love.

**This was the voyage of all time** in which Adam, Eve, and the Wisdom of Life became three separated senses: the man; the woman; and the love of all Life, constantly searching in the longing to reunite.

These three separated and yet inseparable senses were male, female, and the androgynous nature of Life, safeguarded by the eternal field of unity that is the Biorhythm of Life.

In this evolutionary voyage, each of the prototypal senses of life discovered themselves through the sense of “otherness.” Thus, **Adam** discovered himself, as **Adam**, through the eyes of Eve; **Eve** discovered herself, as **Eve**, through the eyes of Adam; and **Wisdom** – the essential unity of life – discovered itself, as **Wisdom**, through the learning experiences of the two projected reflections, discovering themselves in life.

**This was the transposition of consciousness** from the ecstatic natural existence ( that was the Garden ) into the evolutionary nature of self-discovery of life.

This was the transposition of consciousness ( from eternal to temporal ) through which each being gathered his/her sense of self through the external reflection of the other.

This was the time of evolution, through which all beings of creation interchanged identities, recycling forever in the innate desire to unify.

This unification took place, as **The Essential Self of Life** discovered that all the fathers and mothers of life were – in truth – One.

They have been **the lineage of evolutionary existence** – through which the consciousness, that is the **physical form of all Life**, re-created itself forever searching to unveil the whole knowledge of Life.

This was to be the merging reunion of the Self-discovered consciousness of Life: matching ( in full-awareness of correspondences ) the essential knowledge that was to restore human nature to the natural state of unity that is paradisiacal Life.

Centralized in the whole spectrum of consciousness ( that was the whole understanding of the Physical Reality that is Universal Balance ) **The Essential Self of Life** willfully merged his three natures within the atomic reality of Life.

In this merging, the masculine, the feminine, and the androgynous nature ( existing within his mind, heart, and body ) became – in fusion – the whole energy of Life, matching the Eternal Moment of Life.

Inside of fusion, **The Essential Self** – now engaged, through boundless feeling, with the eternal moment of Life – experienced, in the awe of his heart, that ( within the history of evolution ) there was an ancient projected judgment – a sense of blame – directed towards the Feminine Principle of Life.

HE, the synergistic experience of all the individuals of life – throughout the misinterpretations of evolutionary time – had judged his mother as being the cause of the separation from The Garden of Life.

**The Essential Self** had a deeply-rooted sadness, implanted within the core of his heart, from the memory of the default: the default from the Garden that had made him a mortal, within the immortal field of Life.

**Now** – inside of this essential recognition of sadness existing within the ancient memory of his evolutionary life – **The Essential Self of Life** heard a voice that said, "*you do not yet understand*".

*"The separation from The Garden of Eden did not take place in the moment of time in which Adam and Eve partook of the fruit of Life, but in the moment that the desire to know oneself as God was created. In the instant of this creation, the desire for knowledge ( as it was superimposed into the already perfect whole Biorhythm of Life ) became the same as the counterbalance opposite that said you shall not!*

*"Then the words, "you shall not" became the first creation of fear superimposed, by the Trinity, as it was separating itself from the whole united motion of Life.*

*"When the words "you shall not" were uttered, the whole spectrum of evolutionary mind*

*was created, along with its ultimate resolution. This was the time, then, in which the nature of evolution began as self-consciousness: the search for the discovery of the unity of Life.*

*"This was the time in which the evolutionary nature of mind began to rediscover itself as the whole mind of love.*

*The entire voyage of time has been the time that it has taken for you ( the essential, individual embodiment of the Trinity of Life ) to know that your Father Creator – the source of all Love – could never say "you shall not." As I could never create a blame or a negation of any of the wants of your life.*

*"The instant of separation ( within the unity of Life ) occurred when you, in free will, desired to know yourself as God:, to know yourself as Love. This desire could only be shared because, within the atomic simultaneity of all Life, the instant of separation of one was also instantaneously a mirror-reflection of three.*

*"Thus, the desire to know yourself, the reaction to this desire as "you shall not," and the merging reunion of yourself with Life were all created within the same instant of the voyage of time.*

*"These were the three inseparable ( and yet separated ) senses of three-dimensions of Life, through which you – the one essential nature of Life – could rediscover yourself through the temporal perception that is the linear nature of evolutionary mind.*

*"At the time of the completion of this rediscovery, every individual particle of form had transmuted itself through all individual particles, infusing all physical creation with the essential self-awareness of Love.*

*"This was to be the voyage of all time in which, through all separation, the field of consciousness (that was the self-interpreted expression of human mind) could return to the central **Physical Reality** that is the unity of Life.*

*"This was the voyage of time in which ( through the sense of linear time ) you could know – in full experience – the whole tapestry of consciousness that corresponded to the timeless, boundless harmony that is universal Life."*

Inside of the infinite recognition that was the inner voice of unity within his Life, The Essential Self saw that Adam and Eve ( all the fathers and mothers of all beings of Life ) have been the **creative** and **receptive** nature of consciousness that corresponded – in unity – to the **wisdom** of Love.

He saw that he, **The Eternal Son** – the reunited lineage of all mothers and fathers of Life – had also been the whole consciousness ( the mental, emotional, and physical form of

all life ) rediscovering the knowledge that was to reinstate The Garden to the natural unity of Life.

Now, The Essential Self ( in the moment that was the whole mirror-reflection of his Life) embraced the two separated genders of his life: reuniting, in one instant, all of the self-created perceptions of differences and roles that separated his mind from the wholeness of his Life.

**Inside of existence** – as the union of opposites merged by the centering of his Love – **The Essential Self** became the replenishing of the **physical nature of all Life**.

This merging became the reunion, in Love, of all the mothers and fathers that are all of the children of Life.

**This became the essential amalgamation of the whole race of man into the renewal nature of One.**

This became the liberation-fulfillment of the sixth center/attribute of Life – **Physical Reality** – now free to be the form of Creation, constantly replenishing anew, as the union/reunion of Self with Life.

**Thus, through this physical center that is Physical Reality, all physical existence is now re-engaged in the universal communion of ever-present now.**

This is the movement of wholeness-within-wholeness that is the physical nature of Universal Balance: expressing the center of universal stability that ( as The Equilibrium of Life ) reunites and renews, at once, all of the beings of Life.

**Now**, through this center – as physicality is constantly merged with the Life of Balance – physicality is constantly renewed as the appearing moment of the movement of Life.

Physicality is the expression of the creative nature that is consciousness ( reunited as mirror- reflection ) with the physics that is the nature of its Life.

Physicality, being now the natural fulfillment that is the creative reality of Life, is The Kingdom of Love.

**The Kingdom of Love is the design-perfection that is Creation housing, in unity, the fulfillment of all beings of Life.**

**This is The Kingdom** – The Kingdom of Love – where all human beings live the ever-present moment that is Universal Balance: receiving the true futuristic perfection that is universal Love.

Inside of the ever-present future ( that is the whole field-of-consciousness ) unfolding as The Eternal Moment of Life, the individual human being is now **The Self - Eternal Son**.

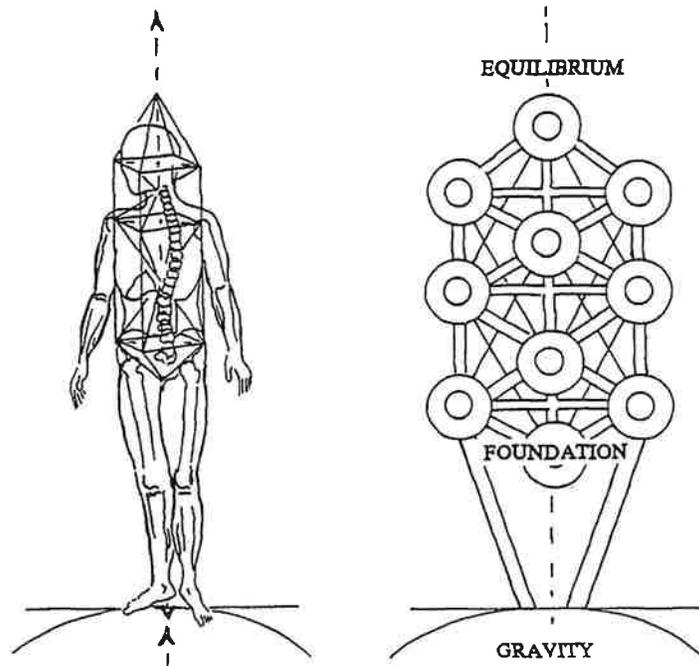

He is the amalgamation of all of the Mothers and Fathers of Life: merging the lineage extension of human consciousness, honoring – now, in Creation – the unity of Life.

**The Self - Eternal Son** is now the consciousness that is Unity-Within-Unity, bringing (as Creation) the natural, conscious reinstatement of The Garden of Life.

**The Garden of Life is The Kingdom:** the fulfillment-renewal of the physical form of Life, returning ( in the harmonious correspondence that is Universal Balance ) to the **Physical Reality** that is Creator's Love.

## THE SEVENTH CENTER AND ATTRIBUTE OF LIFE:

### *Foundation, The Kingdom Of Love*

The seventh center and attribute of Life is **Foundation**. This center and attribute of Life is called **Foundation** because it is the central physical foundation from which the all-embracing Field of Gravity becomes the expansional, equilibrated reality of Life.

Bio-mechanically, **Foundation** is the Pelvic Floor: the physical center that, via the pelvis and legs, centralizes the human body in relation to the center of the Earth.

In its essential Balance, **Foundation** corresponds to **Crown** – reuniting the central grounding of physical form within the formless, spatial geometry of three-dimensions.

This is the merging union between **Foundation** and **Self-equilibrium**, merging as one the seven centers and attributes of Life.

**As the nature of Balance**, this center (**foundation**) is the one reflex of Life, from which each and every one of the seven centers gives and receives all others, as the harmony of Life.

**As Foundation**, this center is the primal reflex of existence, by which the physical weight of the body becomes the same as the expansional freedom of Life.

Thus, **Foundation** is the whole nature of The Self : as, within The Self, one's inner sense of **foundation** is the same as the whole, expansional sense of Life.

This center became physically free, as **The Essential Self of Life** (having transmuted throughout all of time) discovered that the nature of his return to the unity of Life was being brought about by the spiritualization of the matter of Life.

**This spiritualization of the matter of Life** was, in truth, the natural unfolding of evolutionary consciousness expanding into the whole awareness of Life.

This was the natural awakening that transformed density into lightness. This was the **transmutation** that transformed the inertia of self-resistance ( existing within the three senses of self ) into the **cumulative freedom** of movement of Life: unfolding towards the reality that is Universal Balance.

THE SPIRITUALIZATION OF THE MATTER OF LIFE was the voyage through which **The Essential Self of Life** discovered that the physical form of the body was the whole map of consciousness ( that was the whole mind of Life ).

Inside of the sense of unity ( that is the whole mind of Life ) the inner grounding ( that is the **foundation** of Balance ) is the simultaneous relationship that instantaneously reunites all movements of Life.

This is the sense of oneness in which the body ( **the human biomechanical center of Life** ) is the same as the center of the earth; the same as the center of the sun; the same as centers of all planets; the same as the centers of all suns.

This is the nature of simultaneous centers fused as one, expressing Universal Balance as **the whole mind of Life**.

Through the presence of this simultaneous centering, **the universe is one**; the planet Earth is now the central expression through which all beings of Life re-create the Edenic Garden of Life.

**The Edenic Garden of Life** is the reunited nature of consciousness, experiencing itself as the whole field of its unbounded Love. The Edenic Garden of Life is now ( as the presence that is Universal Balance ) FOUNDATION: the physical, grounding nature through which all things renew as the expansional newness of Life.

**The Edenic Garden of Life** is the central expression of universal Creation, appearing as The Kingdom: **The Kingdom of Love**.

## THE KINGDOM OF LOVE

**The Kingdom of Love** is the name given to the natural form of Creation that houses the existence of the absolute unity of Life.

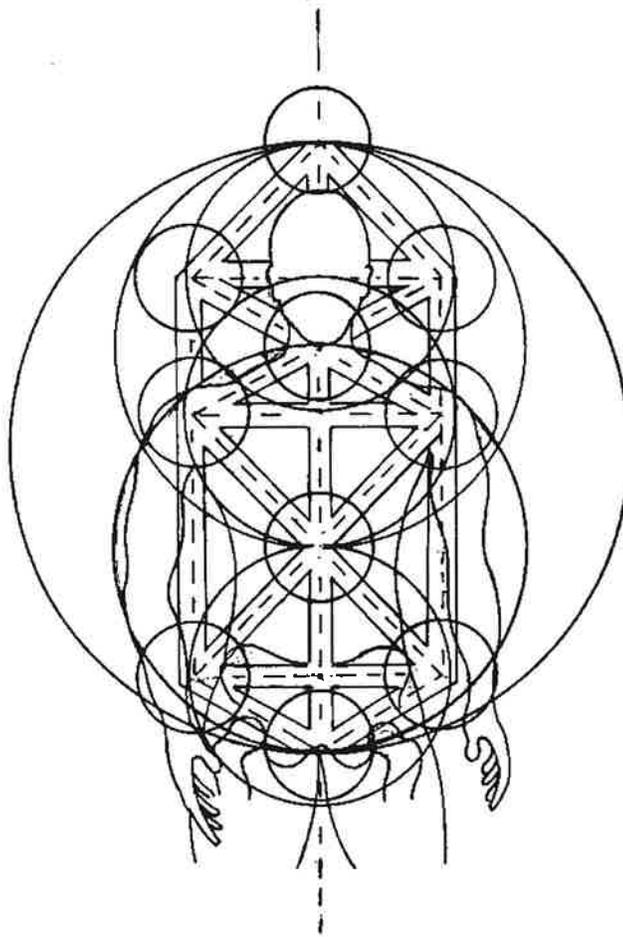

The Kingdom is **the Foundation of Love**, the natural physical foundation, in which its grounding nature is the same as the furthest reaching of Universal Life.

Thus, The Kingdom of Love ( as **Foundation** ) is the physical center of Life. The Kingdom is the NEW CREATION, expressing Universal Balance as the replenishing of consciousness of all human Life.

This replenishing of consciousness is the beginning of A NEW WORLD and a new Life. It represents the beginning of a NEW WORLD that is also ONE KINGDOM: embracing the whole relationship that matches ( in simultaneity of correspondences ) the natural physics of Life.

This is the ONE KINGDOM, **the foundation of Life**, that is the all of physical unity, giving/receiving ( in synchronized correspondences ) the heavenly outpouring of light.

## THE TREE OF LIFE: THE FOUNTAIN OF LOVE

**The Tree of Life/** The Matrix of Balance is the whole reflex of consciousness expressing the merging of the mental, emotional and physical senses of The Self.

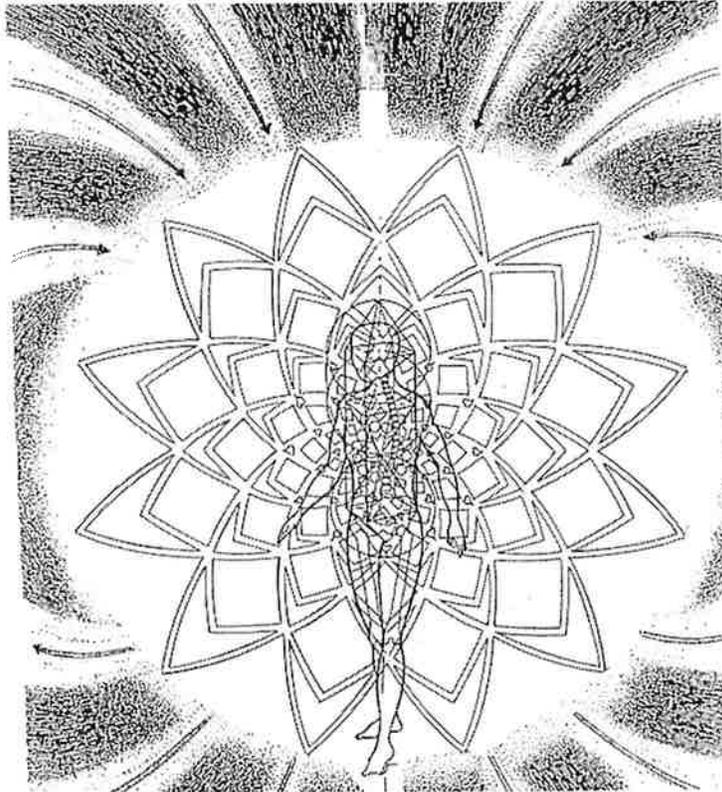

This merging of consciousness is also our direct engagement with the Electromagnetic Field of the Planet Earth. Our communion with the Electromagnetic Field of the planet allows us to experience the field of Gravity and the field of Expansion, as they are reunited ( as one ) by the whole movement of Life.

Inside of the experience that is our communion with the whole field of Balance, we are inside of a constantly replenishing field of energy acting as a Fountain of Life.

This is the **fountain** of renewal by which the whole field of energy that is the human body is simultaneously united ( via the Electromagnetic Field of the Planet ) with the whole field of the energy that is Universal Balance.

**The Fountain of Life** ( as it suspends and replenishes The Self ) is also the natural freedom of movement that is pure three-dimensions: existing as such through the natural harmony that is the **Geometry of Balance**.

**The Geometry of Balance**, as a whole system of movement ( giving and receiving itself through the center of life ) encompasses the suspension of the human body: allowing The Self to physically perceive the boundless reality that is The Electromagnetic Field of the Planet.

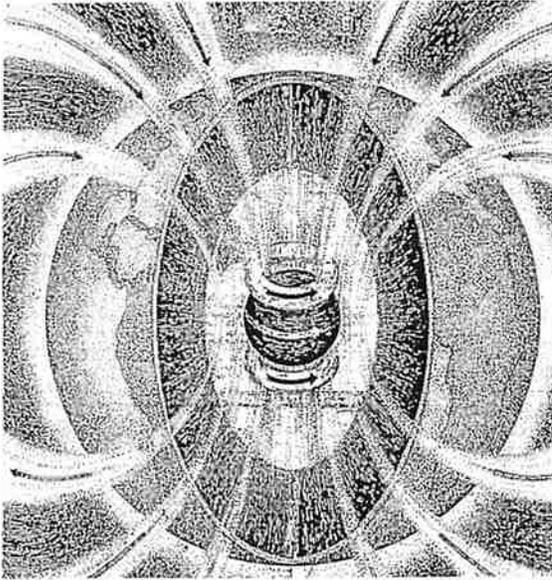

In his communion with the Electromagnetic Field of The Planet ( via the Geometry of Balance ) the human natural experience of the energy of Life becomes the conscious realization of an **inner engine**. **The inner engine** gives and receives itself within the same frame of movement that is the changing nature of its Life.

This is the nature of the whole movement that is Universal Balance: in which what is within and what is without are simultaneously reunited by the creative moment/movement of Life.

**The Geometry of Balance** ( uniting the human self with the Electromagnetic Field of the planet as the Fountain of Life ) is the replenishing nature of consciousness engaged in the natural ecstasy that is the balanced movement of life.

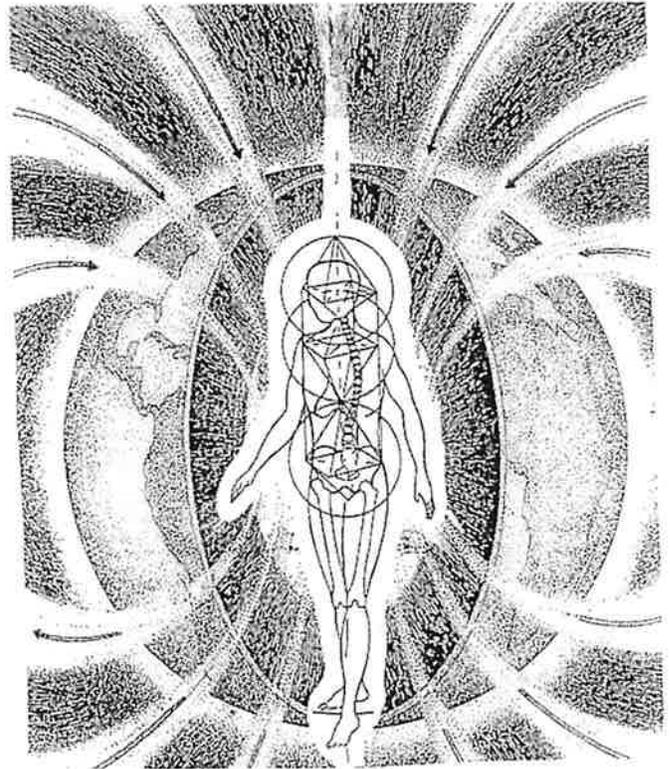

**IN SUMMARY.....in its unity with Universal Balance.....**

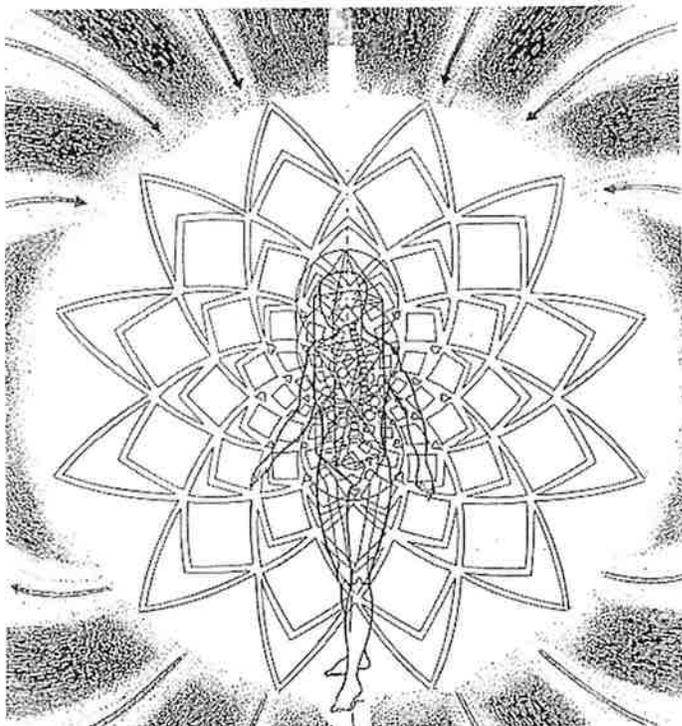

**The Tree of Life/The matrix of Balance** is the natural frame of three-dimensional movement that expresses the equilibrated nature of the human-self-partaking of the whole movement of Life.

**The Electromagnetic Field of the planet** is what suspends the Planet Earth and the human self, in their natural communion with Universal Balance.

**The Fountain of Life** is another name for the Electromagnetic Field of the Planet: as it describes the human experience of being suspended, moment-to-moment by the replenishing nature that is the boundless energy of Life.

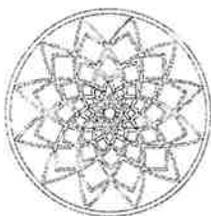

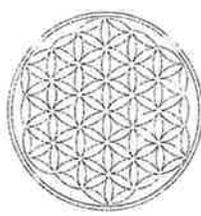

**The Geometry of Balance** is the whole design of planes and directions ( existing within three-dimensional space ) that allows the human self to physically experience the three-dimensional suspension of his physical form.

**This suspension in motion** is his direct experience of the larger field that is the Electromagnetic Field of the Planet.

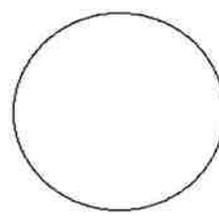

**The Geometry** ( as it is depicted through these graphical symbols ) represents the union **as three-dimensions:** of **movement, form and space.** **Movement** is the whole nature of Life. **Form** is represented here as 19 flowers interlaced as One: the ancient Flower of Life. **Space** is what unites form and movement as the natural momentum that is the Eternal Moment of Life.

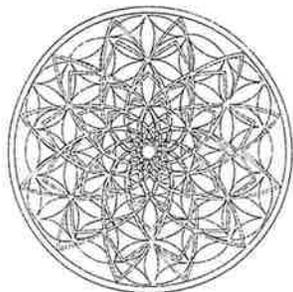

**Movement**

**Physical Form**

**Space**

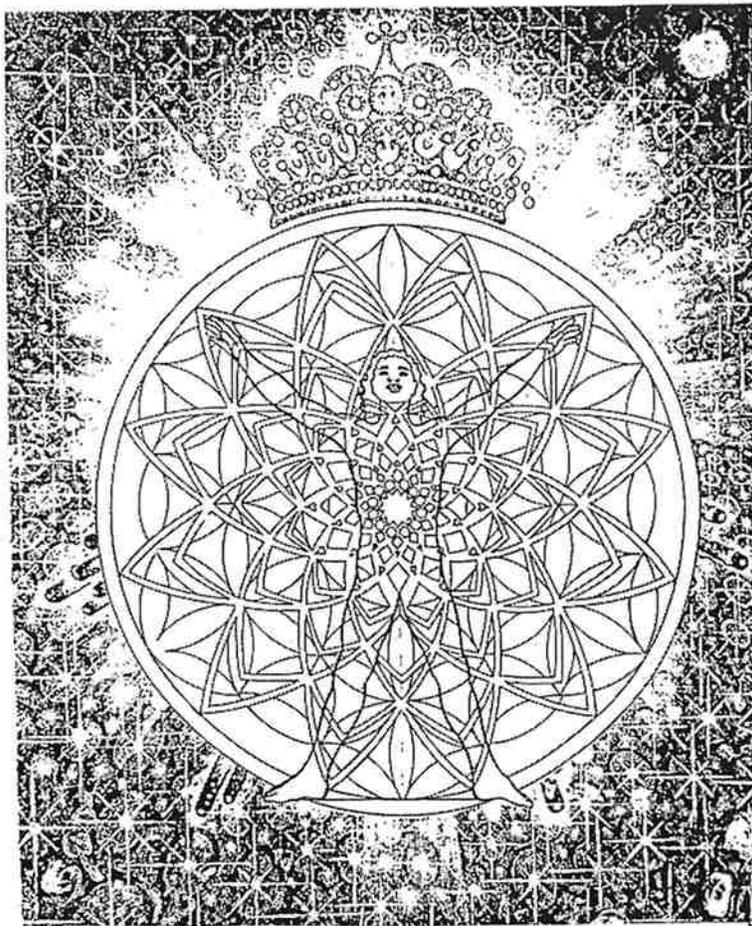

**The Geometry of Balance:  
The Union of Movement, Form and Space**

Thus, **The Geometry of Balance** ( acting as the intermediary that makes real the physical presence of the Electromagnetic Field of the planet ) is also the engagement/continuity that is absolute freedom of movement. In its whole engagement, it allows the human self to experience the natural, moment-to-moment whole change that is the Principle of Universal Balance.

The Tree of Life; the Matrix of Balance; the Electromagnetic Field of the Planet; the Fountain of Life; and the Geometry of Balance are five expressions of Universal Balance. They represent the **moment** and the **renewal** by which all attributes of consciousness (existing within the whole nature of man ) surface to the moment of physical existence, as to match ( in natural communion of correspondence ) the eternal reality that is the unity in motion of Life.

These attributes of Life are natural, in the sense that they are the essential memory of unity concealed within each human heart. They represent the human communion with the infinite mind that is the sound and the feeling of Life. These attributes are the living expression of unity that is the form and the movement of Life.

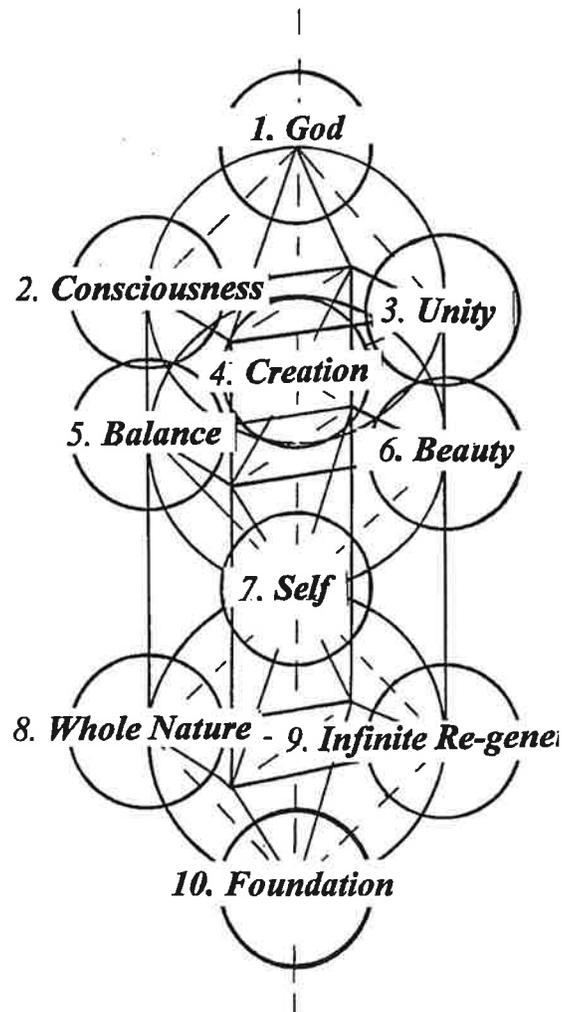

*Self Communion with Creation*

## THE SEVEN ATTRIBUTES OF LIFE:

### *The Merging Of The Ten Dimensions Of Life*

**In fulfillment**, the seven attributes of Life are the merging reunion of Ten Dimensions of Life. **These Ten Dimensions of Life** are the 10 expansional senses, united as the equilibrated unity of Balance, expressing the whole consciousness that is human Life.

The Ten Dimensions( simultaneously existing as One ) are the **Tree of Life**: expressing not only the whole nature of consciousness that is the Balance of the human self but, also ( **as pure Principle** ) the reality that is the equilibrated frame of movement of Life – the frame of movement of Life, renewing all universal existence with the Life of Love.

**These are the Ten Dimensions** that reunite the human experience of Life with the source of its nature, the atomic eternal-moment of whole-movement that is Universal Balance.

### **These dimensions are....**

**The dimension of one.....**GOD.....the one sense of Life that is Universal Equilibrium, giving “being” (as Self Equilibrium) to all human Life.

**The dimension of two.....** CONSCIOUSNESS .....The nature of consciousness, reunited with the whole spectrum of its whole mind, as the Image and Likeness of Love.

**The dimension of three.....**UNITY.....the unity of Life, expressing the merging/ reunion of the Trinity of Life.

**The dimension of four.....**CREATION.....unfolding the creative nature of Life, expressing (as wholeness-within-wholeness)) the futuristic moment of Life.

**The dimension of five.....**BALANCE..... the nature of Balance, reflecting the crowned nature of human Life, as the Light of the World.

**The dimension of six.....**BEAUTY ..... the natural beauty that is human experience, living the creative, universal reality that is the magic of Life.

**The dimension of seven.....** .SELF.....**The Essential Self**, expressing the individual, cosmic renewal of whole-consciousness that is Eternal Son.

**The dimension of eight.....**WHOLE NATURE....the Feminine Principle of Life, experiencing the physical fulfillment of Life.

**The dimension of nine.....**INFINITE REGENERATION ..... the infinite renewal of wholeness- within-wholeness that is the eternal nature of Life.

**The dimension of ten.....**FOUNDATION .....the fusion-reunion of **the One and the All**, experiencing Universal Balance as The New Consciousness of Life.

**These Ten Dimensions ( as they are One: Universal Balance )** express the simultaneous reunion of the mind, the feeling and the physical reality of man that ( in synchronization of correspondences ) receives creation as the renewed nature that is infinite Life.

## **UNIVERSAL BALANCE:** *THE NEW CONSCIOUSNESS OF LIFE*

The Ten Dimensions of Life self-contain a whole design of consciousness, centralized as the seven attributes of Life. They are a whole design that, as Universal Balance, celebrates Creation as the Unity in Motion of Life.

**These 10 Dimensions** correspond to the 10 Dimensions of the string theory of physics and represent the natural transposition of consciousness from evolution to Creation.

**This transposition of consciousness** releases the interpretations of mind, feeling and action – as they were separated as three linear, evolutionary perceptions of time. In this linear interpretation, human consciousness ( searching for the unity of Life ) was innocently superimposing the self-created sequence of time upon the whole field of Balance: covering the timeless nature that is the all-inclusive universal Biorhythm of Life.

This separation between the creation of time and the eternal nature of Life became fully released, as **The Essential Self of Life** merged evolutionary creation with the universal Creation that is **Universal Balance** – prompting the renewal of consciousness that is now **The New Consciousness of Life**.

This transposition of consciousness ( from **evolution to Creation** ) is the reality of a completely new world and a completely new human reality – that allows all beings to live in the eternally present moment that is the true, **futuristic becoming of Life**.

Human life – living inside of this new design of consciousness – experiences the renewal of the ancient mind of time and the reinstatement of the essential, boundless energy that is the natural feeling of Life.

Within this merging of mind and feeling, the human self experiences (as physical communion) his reunion with the **Physical Reality that is the natural replenishing and renewal of the form of all Life**.

Thus, this communion with **The New Consciousness of Life** is also the human communion with the health of Life: “HEALTH” being the natural replenishing nature that is the natural Balance of Life.

**The New Consciousness of Life** is the release of all confused premises of mind, emotions and physical experiences – that evolutionarily have propelled the human self to finally merge with the universal experience that is the balanced movement of Life.

Now, as the Essential Self has merged with the unity of Life, human consciousness can fully experience the panoramic reflection that is the whole sense within his own mind.

The human **mind** ( now being free from any fragmentation within its own sense of wholeness ) is now the whole feeling of Life and the whole physical experience of Life.

The best form to conceptually comprehend this all-encompassing sense of unity, is in the understanding that Universal Balance is the movement of wholeness-within-wholeness, centralized as the constant unification and resolution among all forms of duality.

**Duality** is the sense of differentiation through which human consciousness experientially learned and discovered all of the dimensions of wholeness THAT AS ONE encompasses the atomic unity of Life.

In the moment of union ( that expressed the merged reunion between evolutionary consciousness and Universal Balance ) the whole voyage of duality became understood, by the **Essential Self** as having been a  **blessing**. **The full tapestry** of human evolutionary consciousness has been a  **blessing**, in the sense that it provided all the experiential differences that transported that which was perceived as separated into the actual unity that is the eternally creative movement – that is Universal Balance.

**In this sense, the voyage of evolution has been the voyage of Love.**

**Evolution** has been a form of schooling, from which the human experience of man can now – **in a form of exalted celebration** – return ( in image and likeness ) to the full consciousness of Life.

IN EVOLUTION, the Ten Dimensions of consciousness that are The Tree of Life have been interpreted as 10 ascending expressions of duality, searching ( through self-discovery ) to merge with the unity of Life.

**As Universal Balance**, the Ten Dimensions of Consciousness are 10 individual expressions of wholeness that reunited simultaneously as one is The New Consciousness of Life. This New Consciousness is the natural frame and movement of Life, now blessing human existence with the life of Love.

## FIRST DIMENSION

The First Dimension... THE SOURCE OF LIFE .....was interpreted in evolution as relative. That is, the separation that existed between the linear and the simultaneous nature of consciousness expressed itself in a sense of confusion between the existence and non-existence of God.

This confusion between **being** and **nonbeing** was a direct reflection of the human interpretation of a form of God that, differentiated under many names, was innocently the cause of separation between the many nationalities and cultures of man.

This confusion created the many religions of time in the escalated desire to know God.

On the other hand ( expressing the other half of the evolutionary spectrum of consciousness, mirroring the interpretation of God ) many beings recognized the confusion created by the many images and personifications of God and – by their essential knowing that God could never be divided – denied the Godhead existence.

This denial, came into being as a reaction caused by the innocent fragmentation occurring within the polarized nature of evolutionary mind.

This separation between the believers and non-believers of God mirrored ( throughout the whole history of evolution ) all of the dualities of life and the linear interpretation of the 10 Dimensions of the Tree of Life, fragmenting the simultaneous nature that is the frame and movement of Life.

**In the reality of Universal Balance, expressing The New consciousness of life:**

**God** is the moment of existence that is Life.

**God** is the supreme intelligence that is Universe.

**God** is the breath and feeling that is human Life.

**God** is the re-creation of the Garden of Eden, fulfilling all human nature with the Life of Love.

## SECOND DIMENSION

The second Dimension ..... CONSCIOUSNESS ....was interpreted through evolution as relative, expressing a confusion that mirrored the separation of the three senses of Self in terms of value and importance. In Evolution, the triune separation existed within the individual of life. It expressed itself in a form of interpretation of consciousness that thought of the mind, the emotion, and the physical/moment-to-moment experience of life as being three different forms of perception.

Inside of this system of consciousness, the three senses of self were constantly fluctuating, searching to find a sense of unified perception that could make sense and meaning of the human experience of life.

Thus, inside of this constant fluctuation, the mind became – at times – the driving force of man.

The individual ( becoming mentally inclined and having to sacrifice the whole feeling of life in compensation ) was not able to live the moment of physical existence that corresponded to the natural, physical reality of Life.

Inside of this interpretation of consciousness, the moment of Life became relative, as it did not allow for the essential feeling of unity existing within the heart of each individual life.

On the other hand ( expressing the other half of the spectrum that is the separation among the three senses of self ) many beings – reacting to the control-mechanism of mind – mistrusted it, denouncing it to be incompatible with the true feeling of life.

This separation among the mind, the feeling, and the physical reality of Life, mirrored (in evolution ) the linear interpretation through which consciousness perceived the whole field of unity that is the Ten Dimensions of Life.

In the nature that is Universal Balance expressing The New Consciousness of Life, CONSCIOUSNESS is the full-spectrum of mind, feeling and action that expresses ( as absolute biomechanical unity ) the physical unity of Life. CONSCIOUSNESS, being the Image and the likeness of God, exists as the natural moment of Creation that sees all things as the wholeness of One.

### THIRD DIMENSION

The Third Dimension..... THE UNITY OF LIFE .....was interpreted in evolution as relative. Because of the relative interpretation of God, mirroring the relative interpretations of the three senses of Self, **Unity** – the triune nature of Life – was not of this world.

In the history of evolution, unity was the most desired feeling of life; however it was constantly diverted by the infinite sense of polarization occurring with the mind, the feeling and the physical reality of human life. Thus, in evolution, unity was considered a philosophical interpretation of life that could only exist in a utopia: an imaginary world, unattainable by the many stages of separation existing within the many races of man.

This sense of separation ( existing in the impossibility of physically living in the natural moment of life the unity of Life ) was reflected in the linear interpretation of the Ten Dimensions that are the Unity of Life.

In the reality that is Universal Balance -The New Consciousness of Life - **Unity** is the given. **Unity** is the union/reunion of the Trinity of Life, expressing the form of consciousness that is three-dimensions. **Unity** is the natural movement of Life and – as such – is the very breath that is the human sense of being alive.

**Unity**, as the nature of consciousness that is human Life, is the whole spectrum of consciousness, merged in Image and Likeness to the eternal reality that is Creator's Love.

## FOURTH DIMENSION

The Fourth Dimension.....CREATION.....expressing the creativity of Life, was interpreted in evolution as relative. Because of the misunderstanding of the absolute nature of **unity**: because of the separation of **consciousness** interpreting the three senses of life: because of the relativity of **God**, the moment of Creation and the existence of a whole design of Life was also confused.

This was the result of the nature of evolution ( that living inside of the duality of life ) was constantly fluctuating from one side of the spectrum to the other. Through this constant fluctuation, it was bypassing the true centralized existence that was the nature of The Eternal Moment of Life.

Thus, because of this impossibility of touching the natural moment that is united Life, the consciousness of evolution lived in a dimension of time, self-enclosed as the human experience of life. Therefore the **moment**, as it was experienced by human life, was relative and – because of this – **creativity** was also relative. **Creativity** was a mystery, a muse that came and went as an illusive experience of life.

This separation from the natural, eternal movement that is **Creation** expressed all forms of mental, emotional and physical confusions, through which the human self felt connected – at certain moments – with the energy of life. At other moments, the human self felt separated from this sense of vitality, experiencing the sense of depression and weight associated with the physical experience of life. These were the highs and lows of life, through which the human self escalated the search for unity that was to culminate in its reunion with the natural moment that is Universal Balance.

In the reality that is Universal Balance expressing the **creative** movement of Life, The Fourth Dimension is the natural moment of Life that corresponds to the **uninterrupted movement of traveling consciousness unfolding the true futuristic moment of Life**.

This is **the moment** that is not the evolutionary projection of all things past, but the natural reality that corresponds to the individual of Life, as it lives the universal reality that is the renewal of the ancient mind of time.

This is the moment that is..... CREATION..... bringing forward the whole design of Life, fulfilling human nature with the presence that is The Kingdom of Love.

## FIFTH DIMENSION

The Fifth Dimension.....BALANCE.....was interpreted in evolution as relative. Because of the impossibility of touching the **natural moment** that is the **unity** of Life, and because of the triune separation of **consciousness** expressing the relativity of **God**, the nature of **Balance** was then elusive.

**Balance** was interpreted as the result of the interchanging of polarities: a gathering of stability between not too much of this and not too much of that.

This misunderstanding of the consciousness, not being able to touch yet the constant reality of Balance that is the moment of movement of Life, reflected in a form of delayed interaction within the many functions that are the physical body. This delayed interaction produced all forms of misunderstandings regarding the true nature of health.

These were all the misunderstandings that became released, as **The Essential Self of Life** discovered that the balanced nature of his humanity was The Image and Likeness of Love.

**This was the moment of fulfillment that revealed that the four preceding Dimensions were conceptual understandings of the ACTUAL EXPERIENCE that was the wholeness of consciousness mirroring itself as the wholeness of Life.**

These Dimensions represented the mind's understanding of the nature of **the moment** as being **universal Creation** – and the reality of unity expressed as the mirror-reflection of consciousness recognizing itself to be One with God.

These Four Dimensions became **real** then, as they were the background that gave full meaning to the whole feeling that is the actual energy of Balance uniting The Self with the natural movement of Life.

Thus, through this Fifth Dimension ...the reality that is the conceptual nature of BALANCE became EXPERIENTIAL. Balance became the same as the human centralization of the whole spectrum of 10. This centralization of the natural spectrum of **Balance** became the energetic human merging with the natural moment of existence that is Universal Balance.

Through this merging, Balance became the actual transposition of consciousness that transformed the whole voyage of evolutionary unfolding into the union/reunion of Self with the **atomic nature of Creation**, expressing the reality of life as the **health of Life**.

## SIX DIMENSION

The Sixth Dimension .....BEAUTY .....became interpreted, through evolution, as relative. Through the evolutionary ascension of consciousness ( in the search to find the meaning of life ), Beauty became relative to the eye of the beholder.

**Beauty** was divided, as the many interpretations of consciousness experienced the linear delay of perception, through which the mind interpreted the Ten Dimensions of Life.

Beauty, as **the reality of life**, became the natural experience of **The Essential Self**, as the centralization of his consciousness touched the moment of Balance that was the Unity of Life. In this moment, the compartmentalized experience of his evolutionary mind became ONE with the vibrational unity that is The New Consciousness of Life.

Inside of this vibrational unity of consciousness, the mind, the feeling and the action became the triune nature of life. The Essential Self experienced the exuberance that was the magic of life, keeping all things existing and transforming inside of the extraordinary beauty that is **the dance of life**.

This was the whole perception that transformed all senses of polarities, existing between beauty and ugliness, into the recognition of the vibratory energy that is the nature of the balanced movement of life.

This was the moment in which – for the first time – **The Essential Self**, by touching the essential nature of unity that was the integration of his own self, was coming into correspondence with the unity that is Universal Balance.

**The New Consciousness of Life was at the center of these merging correspondences.**

In The New Consciousness of Life, **everything is beautiful**: everything is composed of the same substance, from the same point of origin. The vibrational level is love. This substance is a **radiational energy** that is the life and sustainment of all things.

It is magical because it has no boundaries.

It is all-permeating.

It gives consciousness as it receives itself as love.

**This is the consciousness of Unity. This is the consciousness of God.**

## SEVENTH DIMENSION

The Seventh Dimension .....SELF .....was interpreted in evolution as relative. Because of the separation from the **radiational energy** that is the Beauty of life, **The Self** was not yet centralized within the balanced movement of life. **Creation** was not yet the **natural moment of life**/ because **unity** was a philosophical interpretation of the idealistic nature of man. **Consciousness** was not yet united to the mirror-reflection that was the full spectrum of mind. **God** was divided between the believers and unbelievers, mirroring all polarities of life. **The Self** – the individual of Life – was self-enclosed inside of a whole system called evolutionary mind.

Thus, “**to be or not to be**” was, through evolution, the constant question of life.

This is the question that became resolved, as **The Self** merged with the vibratory energy that is the Beauty of Life. **The Self**, embraced by the sea of Love, became **real** because – for the first time in the history of all time – he was free from the linear sense of perception that was his separation from the 10 Dimensions of Life. Now, touching the natural beauty that was the consciousness of his life, **The Self** was inside of the magic of Life.

The magic of Life is nothing other than The Essential Self's futuristic renewal, from which the whole past experience of evolutionary mind becomes the background for **the true futuristic connection that is eternal Creation**: embracing and renewing universe, as the Life of One.

In the presence of his futuristic renewal, **The Self** and **all individuals of Life** are now in the magical appearance that transforms the enclosed reality ( that was life on the Planet Earth ) into the boundless design of wholeness that is the **mind**, the **feeling**, and the **action** that is **God**.

In his reunion with Creation, **The Self** – now the natural experience that is human Life – is the same as the **Beauty** of Life, the same as the natural **Balance** that is **the health of Life**.

As he lives **Creation**, he is the expression of the **unity** of Life, centralized in the whole spectrum of **consciousness** that is the Image and Likeness of **God**.

## EIGHT DIMENSION

The eighth Dimension....WHOLE NATURE.....was interpreted, through evolution, as relative. Because **The Self** was constantly mirroring the evolutionary unfolding of all human life – and as he was escalating his search for the unity of Life – the nature of human was divided into three different interpretations: Human Nature, Mother Nature, and Universal Nature.

This misunderstanding of the **Whole Nature** ( that is universe ) reflected a constant dualistic separation within the mind of man that constantly questioned his nature.

Thus, Man was an interpretation of consciousness that thought of himself as evolving from the animal and subject to all forms of reflexes based in the survival-mechanism of life.

On the other side of the spectrum, was also an interpretation that thought of himself as being a perfect Creation, a mirror-reflection of the first cause and effect of life – God.

These were the interpretations of consciousness that – mirroring all of the dualities of life – innocently separated man from the Whole Nature that is the infinite Mother Principle, which houses the feminine form of God as the physical form of all Life.

This is the separation that became the merging of Self with Life, through which **The Essential Self** understood ( inside of The New Consciousness of Life ) that within the separation between his **human** and **divine** nature was a whole spectrum of consciousness searching to merge with the reality of Life.

Inside of evolution, both interpretations were true. Human nature was a direct reflection of the eternal mind of Life, but, because of its continual renewal, based in the life and death of life – as civilizations went under, within the many changes of axis of the Mother planet of Life – **consciousness had to evolve through the biological embodiment of Life.**

Consciousness had to pass through all of the developmental stages of life, in order to be able to house the expanded nature of mind that – in image and likeness – could comprehend the physical **Whole Nature** that is the universal nature of Life.

This recognition of the essential nature of Life allowed **The Essential Self** to fully understand how the **Mother Principle**, the Earthly Planet of Life, could not yet house the natural Edenic Garden that was the given nature of Life.

**The Mother Principle** was judged and, with this innocent judgment, the physical form that is the human body could not truly match the infinite communion that is the balanced nature of Life.

The physical body was experiencing the same biological separation that existed within the evolutionary unfolding of mind.

The divided nature of consciousness, unfolding in evolution, innocently mistreated the physical form of The Mother/the planet Earth and in so doing, innocently mistreated itself.

Its misunderstanding was reflected in the many forms of sickness that affected the human body of life.

Thus, the evolutionary separation (within the whole of oneself) was the same as the separation between oneself and one's body:

between oneself and all beings – the same as the separation between oneself and nature

between oneself and The Mother Planet

between one's consciousness and Universal Life.

These were the many separations that became fulfillment, when **The Self** merged all forms of nature as the **Whole Nature of Life**.

**The Whole Nature of Life** was the same as the true nature of **The Self**. **The Self**, experiencing the magic of Life, was now the Balance of consciousness, living Creation as the Unity in Motion of Life.

It was here, inside of the Eight Dimension – **Whole Nature** – that **The Self** came into correspondence with the Ninth Dimension - **Infinite Regeneration**.

## NINTH DIMENSION

The Ninth Dimension .....INFINITE REGENERATION .....was not yet known within evolutionary unfolding of mind, because of the dualistic misunderstandings existing between the animalistic nature and the divine nature of man. Man could not yet merge with the all-embracing Mother Principle that is the physical form of all Life.

The true connection to the Earth was not yet reinstated as a conscious, whole awareness that is the Universal Balance of Life. Therefore, **The Essential Self** could not yet be reunited as One with the whole movement of Life. Because all of these systems of duality were separating man from the unity of Life, **life** and **death** where two opposing interpretations of Life.

**Inside of this whole reflection of consciousness ( the dual interchange between life and death ) were the necessary transitions that ensured the constant growth that was evolutionary consciousness always unfolding toward the unity of Life.**

In this design of consciousness, life and death were the mirror-reflection of consciousness that mirrored ( in absolute correspondences ) **all the dualities of life**.

Life and death represented.....

1. The separation between God and Man.
2. The separation of consciousness not yet centralized in the whole spectrum of its Whole Mind.
3. The separation of the human experience from the atomic reality that is the Unity of Life.
4. The separation that was the evolutionary interpretation of human reality, unable to touch yet the Natural Moment that is universal Creation.

5. The separation from Balance, expressing all misunderstandings that made Universal Balance (the reality) a mystery – Universal Balance, expressing (as natural existence) the Health of Life.
6. The separation from the constant, radiating energy of Balance expressing the magic and Beauty of Life.
7. The separation from the essential nature of human ( as it is the natural reality of each individual Self of Life – Eternal Son ) experiencing the atomic unity that is The Image and the Likeness of God.
8. The separation from the three natures of the Mother Principle that, united as Universal Balance, express the physical reality that is the physical form of all Life.

These were the separations that became fulfillment, as the **Essential Self of Life** merged ( for the first time ) the nature of evolution with the eternal nature of Life.

This was the nature that corresponded with the natural Balance of the planet Earth as it was suspended by universe, expressing the renewed nature that is the frame and movement of Life.

It was inside of this movement, as **The Self** experienced himself for the first time as the Unity in Motion of Life, that he understood how time was finally merging with the eternal reality of Life.

He was finally merging all of the Ten Dimensions of Life into the one whole system of consciousness that housed the **infinite regeneration**; that is the very foundation of the breath of existence; that is the Whole Nature of his Life.

## TENTH DIMENSION

The Tenth Dimension .....FOUNDATION .....was, in evolution, not yet fully known as the merging reunion of Self with Life.

Because of the constant escalation of consciousness ( searching to find the reality of Life ) the human experience of life was divided between having a **home** and not yet feeling at **home**. Because The Mother Earth was not yet perceived as the same as the physical body of Life, **home** was then relative. **Home** was either a temporary place where one lived and eventually died. Or **home** became the **projected** place of consciousness where one could eventually be and exist in the presence of the mirror-reflection of perfection that is Creator's Love.

Because of this innocent, escalating process of consciousness, the Planet Earth could never yet be truly our **home**. The Planet Earth was the physical experience of a dimension associated with the process of learning that could not yet touch the reality that is the celestial existence of the exalted mind of Life.

All of these interpretations of life became fulfillment, as **The Essential Self of Life** merged with the Tenth Dimension, **The Foundation of Life**.

**Foundation** became – for **The Essential Self** – the absolute recognition of **Home**. **Home** was now the reunion of his consciousness with the natural movement of Life.

Inside of this reunion, **home** became the center of his human heart – living inside of the Mother Principle, the Planet of Light.

**The Self**, experiencing the natural connection to Life that was the center of his heart and the center of the planet, was finally present in all things at once.

**Inside of presence**, at the center of his human heart, **The Self** had – for the first time in the history of his evolutionary mind – no place to go.

He was finally free from the projection of time, recognizing that his FOUNDATION ( the center core of his human Life ) was the same as the center core of the Universe; the same as the moment of existence, embracing all things and renewing all unity as the reality of One.

It was here, at the center core of his whole Life, that **The Essential Self** became fully present with the full knowing of The New Consciousness of Life.

**The Self** was in the dimension of Unity, living inside of the whole spectrum of mind: living inside of the whole feeling that reunited his ancient and cosmic heart; living inside of the physical reality, housing the eternal moment of Creation.

He was inside of the Garden, merging the instant of separation of the fable of time with the instant of renewal that is The Eternal Now of Life.

**He was inside of the Kingdom, The Kingdom of Love.**

As **The Self** experienced the simultaneous expression of traveling unity that is the new reality of Life, he recognized that the Kingdom – The Kingdom of Love – **is the honoring of the whole voyage of evolutionary mind, reinstating in conscious perception the merging of Heaven and Earth as Paradise.**

This is The Kingdom that reunites all distances and all interpretations of conflicting differentiations of life as the natural FOUNDATION that is the source and renewal of Life.

This is The Kingdom, expressing Paradise as the whole field of consciousness that is God; engaged in the full circle of Life; renewing in celebration all universal existence as the Love of One.

## **THE TEN DIMENSIONS OF LIFE; THE CELEBRATIONS OF LIFE**

The Ten Dimensions are 10 forms of renewal within the whole history of evolutionary life. In their fulfillment, as they are the whole spectrum of consciousness that is Universal Balance, they are also 10 celebrations. They are.....

The celebration that is the First Dimension.....GOD..... in which, from the wholeness of Life, **the individual self-awareness of life became the All, and – through the All – became the One.**

The celebration of the Second Dimension ...CONSCIOUSNESS ...expressing the completion and the fulfillment of the evolutionary nature of consciousness that lasted for all time. **The time that it has taken for the individual of Life to know himself as Love.**

The celebration that is the Third Dimension.....UNITY... ..expressing the union/reunion of the Trinity of Life, through which **The Essential Self** discovered that the unity among his three senses were the very nature of that which he called his Life. This is the celebration of **the fulfillment of consciousness, returning evolution to the unity of Life.**

The celebration that is the Fourth Dimension.....CREATION..... expressing the reality of wholeness that is the Universal Mind of Life that – as natural intelligence – reunites all movements existing within universal Creation, as the experience of One. This is the merging/reunion of **the consciousness of evolution with the natural, Eternal Moment of Life.**

The celebration that is Fifth Dimension.....BALANCE.....expressing the fulfillment of the image and the likeness of God. This is human nature, crowned in its reunion with Universal Balance. This is the celebration of the human determination that – fulfilling the myth of time – **reunited the four preceding dimensions into the physical experience of Life.**

The celebration of the Sixth Dimension.....BEAUTY.....expressing the natural engagement of the human self with the exuberant, radiational energy of Life. This is the physical union of human experience **with the constant changing, constant renewing, futuristic becoming that is the magic of Life.**

The celebration of the Seventh Dimension.....SELF.....expressing the absolute renewal of consciousness that is Eternal Son. This is the fulfillment of human reality, experiencing life in the Garden and the Paradisiacal Nature of Life. **This is the new form of Creation that is The Kingdom – The Kingdom of Love.**

The celebration of the Eighth Dimension.....WHOLE NATURE .....expressing the infinite workings of Universal Nature, constantly transforming the physical form of all

Life. **This is the new form of Creation that is the celebration of the Feminine Principle of Life.**

The celebration of the Ninth Dimension...INFINITE REGENERATION....expressing

the eternal renewed motion of Life. This is the celebration that is universal existence, through which the individual self – as the spark of God – is now **the whole spectrum of Being that is The New Consciousness of Life.**

The celebration of the Tenth Dimension...FOUNDATION.....expressing the

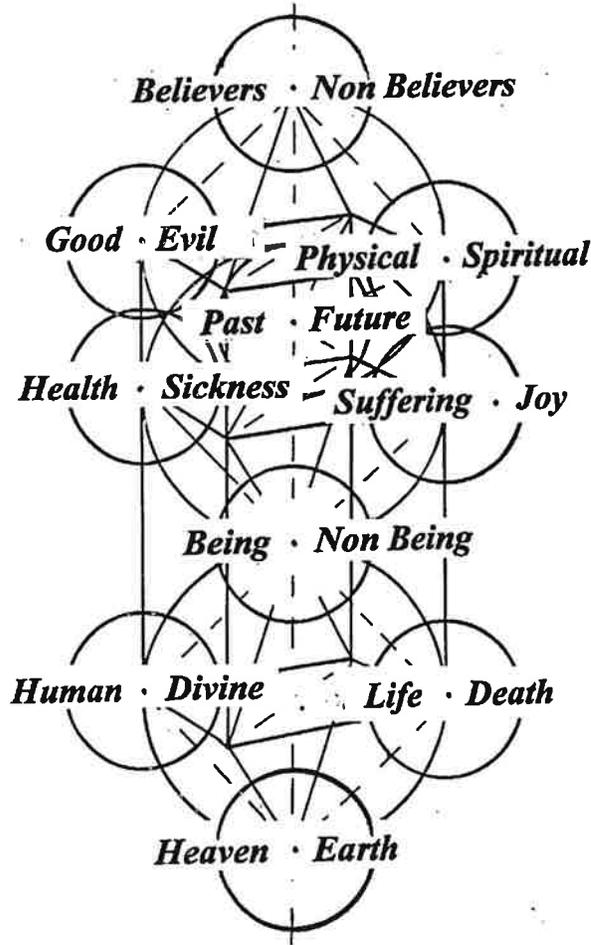

union/reunion of the human sense of life with the essential memory of unity that was the Garden of Life. This is the celebration of the **Ten Dimensions of Life** as the completion of the evolutionary nature of man: in which **the One division among All became the One sense of wholeness** that – in willful desire – has reinstated on Planet Earth, the condition known as Paradise.

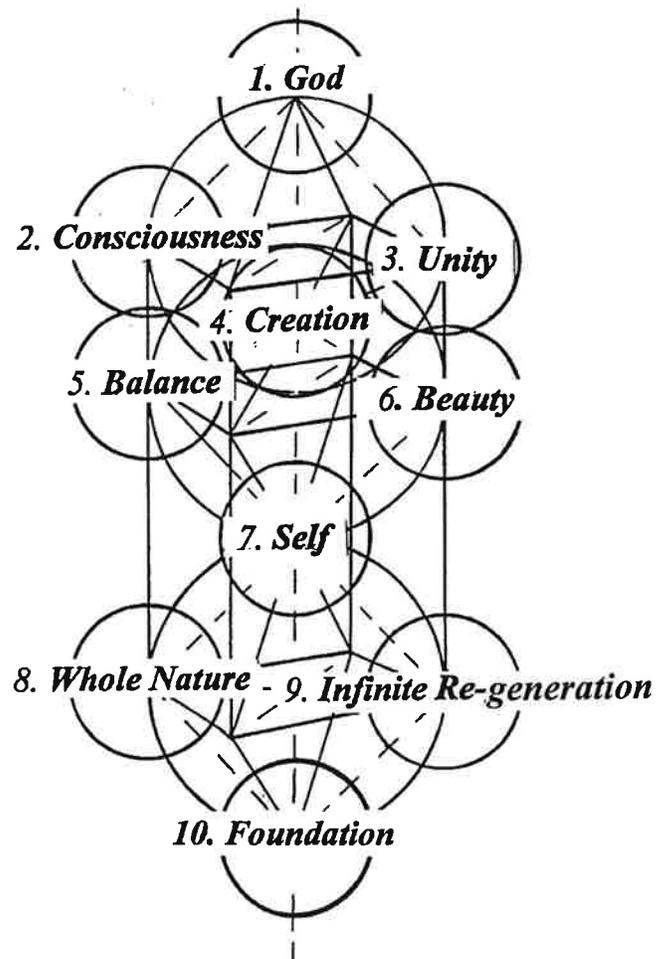

## THE TEN DIMENSIONS OF LIFE AS THE RELEASE OF ALL SENSE OF SEPARATION

In their celebratory reality, The Ten Dimensions of Life are the release of all of the senses of separation existing within the human interpretation of evolutionary life.

### EVOLUTION

### UNIVERSAL BALANCE

The Ten Dimensions are the centralization of the moment of life repairing all things created with the invincible nature of love.

1. The Dimension that is ....GOD....is the release of the whole spectrum of duality existing within human life that separated humanity between the believers and non-believers of God. This release became real as the human Self – merging with the reality that is Universal Balance – became the whole spectrum of the Ten Dimensions, recognizing GOD to be the breath of one's Life.

2. **The Dimension that is .....CONSCIOUSNESS .....is the **release** of separation existing between all notions of good and evil. This **release** became **real**, as the human Self – naturally engaged in the reality that is Universal Balance – knew that all polarized notions between good and evil were misunderstandings produced by the innocent fragmentation of the whole mind of Life. In this experiential understanding, good ceased to be a polarity in relation to evil and became the natural sense of being that – by embracing and being embraced by the unity of Life – sees all things with eyes of Love.**
3. **The Dimension that is .....UNITY.....is the **release** of all self-projected separations existing between the **physical** and **spiritual** natures of Life. This **release** became **real** as The Self, embraced by the Unity of Life, experientially realized that the **spiritual** and the **physical** are inseparable senses of Life. The **Physical** is the form of all there is, and the **Spiritual** is the transparent intelligence that recognizes all things to be **continuously** engaged in the inseparable reality that is the Trinity of Life.**
4. **The Dimension that is .....CREATION.....is the **release** of all sense of separation existing between one's identification with the past and one's self-projections of the future. This **release** became **real** as **The Self** became engaged in the moment that is Universal Balance, experientially perceiving that **THE MOMENT** is the synthesis of all past and the renewal that is futuristic presence. In this engagement with The Eternal Moment of Life, the individual of Life is in the presence of Creation, in which all past and all future are the whole spectrum of The New Consciousness of Life.**
5. **The Dimension that is. ....BALANCE.....is the **release** of all separation and misunderstandings existing between the evolutionary interpretations of health and sickness. This **release** became **real** as the communion of **The Self** with the Natural Moment of Life revealed that the **energy of Balance** is also the **constant regeneration of Life**. In this constant regeneration – the union among the mind, the feeling and the action that is the human experience of life – is also the miracle that **heals** all sense of disease by the natural wholeness of Life.**
6. **The Dimension that is .....BEAUTY.....is the **release** of all sense of confusion existing between suffering and joy. This release became **real** as the human Self (experiencing the magical nature that is the balanced movement of Life; ( and being free from the notions of disease ) realized the **evenness** of Balance. This is the sense of stillness-in-motion that is the natural movement of Life, expressing as natural reality the exuberant feeling that is human life.**
7. **The Dimension that is.....SELF.....is the **release** of all sense of separation existing between being and non-being. This **release** became **real** as the individual Self, touching the reality that is his essential nature, became free from the self-consciousness that was the evolutionary interpretation of his human life. In this realization, **The Self** is the same as the **Moment of Creation**: experiencing his creativity to be the continual reality that is the Eternal Moment of Life.**

8. **The Dimension that is.....WHOLE NATURE.....**is the **release** of all separation existing between human and divine. This **release** became **real** as the Self – engaged in the whole movement that is his Life – embraced also the whole spectrum that is his consciousness: **revealing his humanity to be divine and his divinity to be human.** This is the experiential realization that united the separated nature of man with the source of fulfillment – The Mother Nature of Life – expressing the re-generation of the physical form of all Life.
9. **The Dimension** that is .....INFINITE REGENERATION.....is the **release** of all separation existing between the notions of life and death. This **release** became **real** as the human Self ( reunited with his Whole Nature, and now naturally engaged to the re-generative moment of Life ) realized that Life is continual – and therefore Eternal – because it is **the whole of universal Creation, renewing as One.**
10. **The Dimension that is .....FOUNDATION.....**is the **release** of all sense of separation existing between Heaven and Earth. This **release** became **real** as the self – realizing the completion of the circle of Life – became the FOUNDATION of unity, from which all dimensions of Life are united as the Universal Balance of Life. This is the **release** that – in natural completion – dissolves all of the boundaries that separates man from universe: expressing the human fulfillment that is The New Consciousness of Life.

## THE MIRACLE THAT IS UNIVERSAL BALANCE

Universal Balance, now being the expression of the moment and the movement that is human life, brings within its all-encompassing unity The New Consciousness of Life.

This New Consciousness is a miracle, in the sense that it fulfills the essential desire that has forever inspired evolutionary life. It fulfills the renewal that allows the whole of humanity to become **present** with the extraordinary **presence** that is universe: unfolding the magical nature of Life.

In its existence, Universal Balance is the field of Creation that never, for an instant, has ceased to exist. It is the continual, forever unfolding unity of Life. It is that which has been, is, and always will be. It is the given: the mind, the feeling, and the action that is God illuminating all beings with the Light of Love.

It is that which existed before the separation of the original Garden, the separation that initiated the evolutionary experience of life.

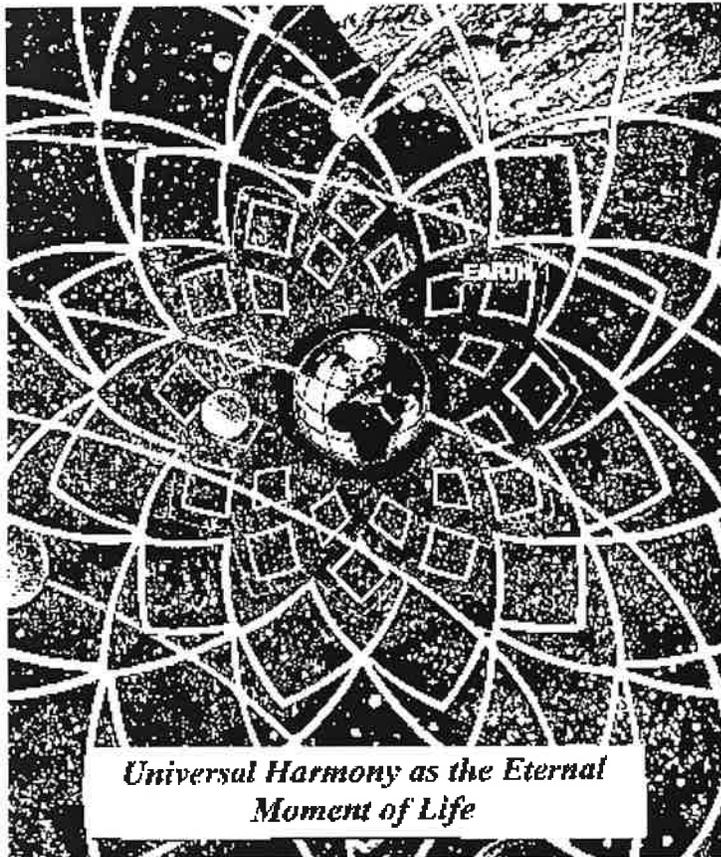

It is that which has been the continual source of Creation throughout all evolutionary life.

It is that which is Now, in the re-encounter of evolution with Creation, **the whole field of energy that is universal life.**

The re-encounter of evolutionary creation with the natural whole movement of Life is an event that was projected in the first instant of separation of evolutionary consciousness. From this instant of beginning experience, the field of Universal Balance always existed as the Biorhythm of Life: the background of unity, from which all consciousness superimposed ( upon unity ) the ascending experience of dualistic life.

The re-encounter of the consciousness with the unity of life was to take two forms.

It was to be a revolutionary unfolding of all celestial existence that at a specific time, and at a specific frame within the movement of universe, was to be re-aligned in the formation of unity that corresponded to the re-engagement of evolutionary consciousness with the creative reality that is universal Life.

This heavenly realigning was a form of Harmonic Convergence that ( in its whole celestial design) coordinated ( in simultaneity of correspondences ) with the whole design that was evolutionary life.

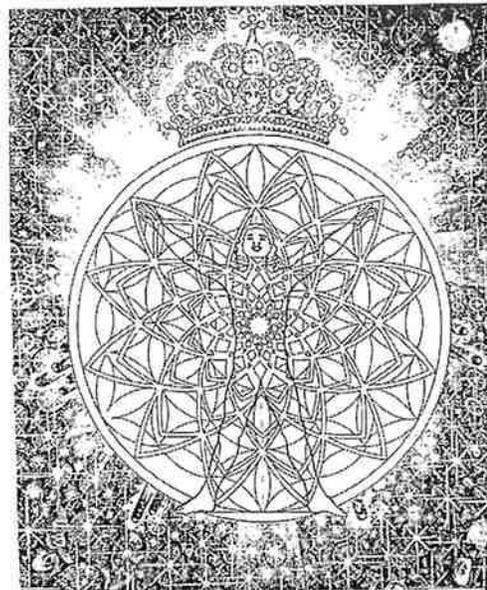

This coordination between two designs expressed a divine-human integration of Balance: in which the whole experience of human consciousness – finally integrated the whole scenario of human experiences, revealing the unity of Life.

This matched the same moment and the same movement that corresponded to the celestial convergence of unity.

This convergence was then two expressions of Balance matching simultaneously, transforming two fields into the trinity that became the unity of One.

This triune unity was...

1. The field of human Balance that was the completion of evolutionary Becoming, as The Self was merging with the Unity of Life.
2. The field that was the universe/the Biorhythm of Life that – in its celestial Revolutions – was finally matching as a Harmonic Convergence, And.....
3. The final arrival to the instant of atomic matching formations that ( as the centralized mirror-reflection of consciousness united with its whole sight ) merged all existence as the Universal Balance of Life.

This was the magical event that transformed the separation that existed between man and universe – between universe and man – into a whole universal reality that is The New Consciousness of Life.

This transformation of consciousness is totally new then, in the sense that it exists inside a universal reality that lives totally in the present moment of life.

**It is PRESENT, because it is only in the present MOMENT that it is completely WHOLE.**

**In its presence**, this new consciousness is totally **creative**, in the sense that it is constantly transforming all things: by the very nature that is its whole field of awareness; by the very nature that is its consciousness, living the **creativity** that is Life.

This new consciousness differs with evolutionary consciousness, in the sense that – in evolution – humanity lived inside a design of consciousness that was constantly polarized, inside of its whole design. This polarization ( expressing a constant dualistic interaction ) constantly occupied the present moment with the conversation of life.

This conversation was a form of human interaction that constantly discussed the past, not knowing that – through this discussion – it was constantly re-creating the same experience of life.

Thus, because this design of consciousness was innocently separated from the natural moment that corresponded to the unity of Life, **the present moment** had no other meaning than to recreate the past with **the thought** of creating the future.

Inside of this self-projected reality, human life ( not yet being able to touch the true creative moment of Life ) looked for the release from the labor of life, in what it called “entertainment”. Entertainment – the passing of time – was a form of waiting, from which human experience was then able to withstand the intensity that was evolutionary life.

This intensity was centralized in the reality of conflict, which was the nature of evolution: as it was through conflict that the evolutionary consciousness of man learned to discern and find the many resolutions that corresponded to the reality that is the unity of Life.

Inside of conflict, the human experience of life was involved in the drama of life: not yet fully knowing that, **in its essence**, the nature of human consciousness is totally **Creative**; not yet fully knowing that **creativity** is instantaneously the solution of all conflicts.

This resolution of all conflicts became real for **The Essential Self**, when it touched the moment that corresponded to the unity of Life and discovered that the moment/ movement of Life was now **his travel with Creation**. Now inside of Creation, he was inside of A WHOLE NEW DESIGN OF CONSCIOUSNESS, that transformed all things past, by the nature of its Whole Perception.

Inside of this extraordinary understanding of The New Consciousness of Life, **The Self** understood how ( in the past experience within his own consciousness ) he had innocently discussed what he considered to be earthly reality, without perceiving that this discussion was a judgment reflecting the innocent compartmentalization of consciousness existing within his own mind. **His mind, encircled in the evolutionary design of consciousness, had innocently interpreted creativity as a form of witness.**

It was here, as he engaged in the creative moment of Life, that **The Self** had the perspective that allowed him to understand the full meaning of the term “**The Dream of Time.**”

“**The Dream of Time**” was his separation from the creative moment that is universal Life, in which his human sense of perception did not yet know that he was the eyes of change and not the eyes of judgment.

Inside of this understanding, **The Self** had enormous compassion for himself and all beings, recognizing the grace that was The New Consciousness of Life.

The difference that existed between evolution and Creation, is that – in evolution – reality was based in the constant witnessing of consciousness, discerning the value and experience of the moment. And, in Creation, reality is the natural expression of whole consciousness, transforming itself and all things by the creative power of Life.

The difference is that – in evolution – he was self-removed by innocently stopping the moment, by the reverberation of the act of perception.

In Creation he was present and receiving his presence by the moving reality of Life.

The whole transference, from one form of consciousness to the other, **was one frame of difference.**

It was in this recognition that **The Essential Self** understood the whole meaning of evolution as being the whole scenario of experiences that allowed him to understand these two differences. He could then, through the whole experience that has been his evolutionary life, make sense and fully appreciate the reality that is The New Consciousness of Life.

The New Consciousness of Life - the living expression of Universal Balance - is a miracle, in the sense that it represents The Essential Self released from the dream of time.

The dream has been a form of disconnection that separated him from the whole, radiant energy of life: in which life was experienced as laborious, because he could not yet connect to the extraordinary power that is the Moment of Life.

## THE MOMENT OF LIFE, *BRINGING FORWARD THE GIFT OF LIFE*

The New Consciousness is a miracle, because it is the human release from the dream of time.

The New Consciousness is also a miracle, because it brings all of the releases of the Ten Dimensions and the Seven Attributes of Life ( existing within one's communion ) with the integrating harmony that is the creative moment of Life.

But perhaps the **most extraordinary gift** that Universal Balance brings to human consciousness is the understanding and experience of a field of energy that is now fully available to man. **This is the understanding and experience of the Electromagnetic Field of the Planet Earth.**

The Electromagnetic Field of the Earth is a **Fountain of Life** that reflects the three-dimensional suspension of the planet as it is connected to all of the planets, sun and moon of the solar system and all of the systems that make up Universal Life.

The understanding and utilization of this constant field of energy ( that is the **Fountain of Life** ) is a direct form of reconnecting (through one's sense of self-equilibrated Balance) with the whole field that is Universal Balance, existing as the equilibrated nature of universal Life.

This personal reconnection, with the whole energy that is

### The Fountain of Life

Universal Life, is the gift of Universal Balance because it provides all of the personal understandings and experiences that **make real the physical, Present Moment of Creation, that is The New Consciousness of Life.**

**The personal reconnection to Universal Balance comes into being through the natural unification of the physical body – that like a celestial body – partakes of the harmony and the all-inclusive connection that is the balanced movement of Life.**

This experiential communion with the movement of Life comes into natural awareness, as a direct consequence of the physical centering of the human body, as it becomes supported and directed by the Electromagnetic Field of the Planet.

It is through this Field that the human self experiences the - 0 - Point Equilibrium that is his connection and conscious experience of the natural momentum that is the movement of Life.

Learning to utilize the miraculous function of The Electromagnetic Field of the Planet comes through **the direct experience of physical movement.**

**The Self** learns, through the experience of the movement of the body, to utilize the **Geometry of Balance** – as means to consciously perceive, fully connect and become suspended by this all-embracing field.

**The Geometry of Balance** is composed of all the three-dimensional planes and directions that correspond to the **giving and receiving** nature of the Electromagnetic Field.

**The Geometry of Balance** is essential then, because it allows for the perception and physical experience of the Electromagnetic Field. As a matter of fact, **The Geometry makes REAL the Electromagnetic Field**, as it translates the larger field ( that is the suspended Balance of the planet Earth ) into the immediate surrounding field that is the source of three-dimensional equilibrium of the human body.

**This field of energy** ( as it is experienced through the Geometry ) becomes also a natural form of perception and physical experience of the constant regeneration that is The Fountain of Life.

In this sense, The Geometry of Balance and the Electromagnetic Field of the Planet are inseparable: as both become the **miraculous conductor** that suspends the human self in the natural freedom that is the communion of Balance.

**The Electromagnetic Field and the Geometry, in their unity, are a balanced system that merges inner and outer forces as the natural unfolding of Life.**

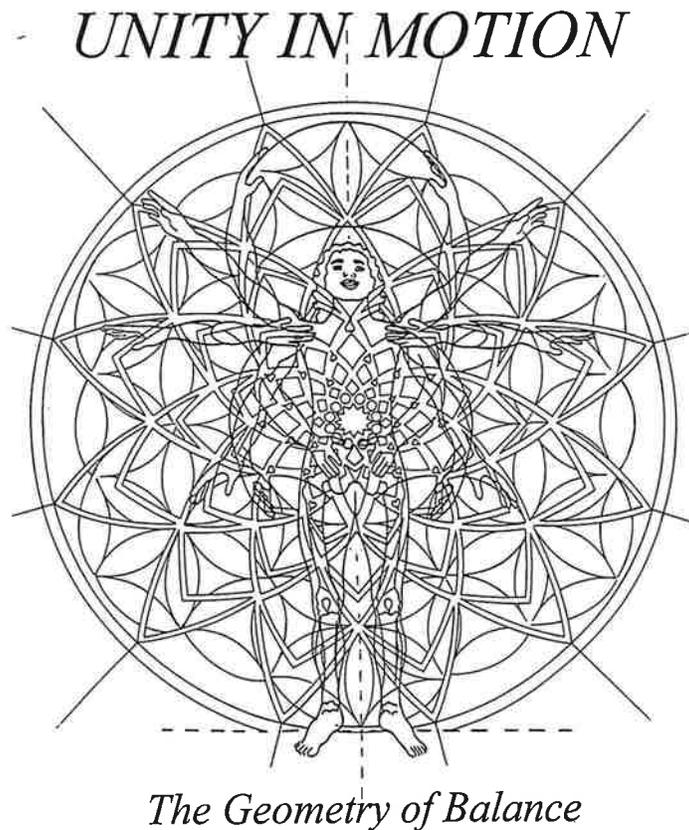

They are like a constant self-regenerating engine: in the sense that they engage the forces coming towards the center of one's being with the forces expanding from the center of one's being towards all directions of Life.

Thus, the connection ( via the Geometry to The Electromagnetic Field of the Planet ) is the balanced physical experience of being simultaneously grounded, and expanded, inside of the three-dimensional Unity of Life.

Through this geometrical connection, three-dimensional space becomes an all-supporting system of balanced movement that expresses the natural momentum of Life. **In this sense, The Geometry of Balance – in its union with the Electromagnetic Field – is the same as the frame and movement of Life.**

The understanding and experience of this whole system of movement is called UNITY IN MOTION. This term expresses the actual physical reality that is the human merging with the moment/movement that is Universal Balance,

**UNITY IN MOTION** is the system of circular geometrical movements that consciously reinstate two experiences of Balance within the human being. It reinstates.....

1. The balanced engagement of the body ( via the Geometry of Balance ) to the Electromagnetic Field of the Planet and to Universal Balance. And....
2. The natural balanced interaction among all the systems of function that are the body, as all systems become engaged into one simultaneous expression of expansion.

In truth, these two re-instatements of Balance are one and the same, as it is through the body's balanced interaction with the Electromagnetic Field that all systems of function come into the synchronicity of Balance.

**The Balance of all systems of function that are the human body is the simultaneous unification of all reflexes of movement. This unification of reflexes expresses.....**

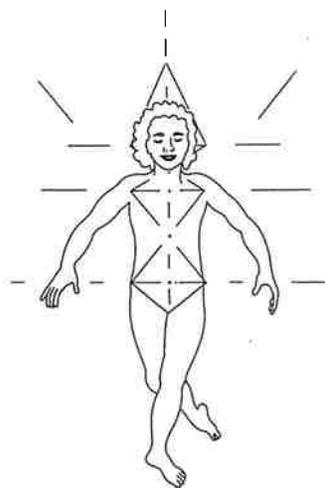

1. The biomechanical, skeletal relationship of Balance that is the three-dimensional centering of the body in space.
2. The energetic field that is the neurological whole feeling of the body, experiencing the balanced physical sensation of Life.. And.....
3. The unification of the mind: the mind, reflecting the neurological and physical senses of Balance, perceiving as whole awareness **a new form of emotional and physical sensation of self.**

This transformation of **the essential sensation of self**, becomes the individual, gradual integration and transformation of consciousness. This integration and transformation of consciousness is a gradual merging with unity: until the transposition occurs in which – by fully engaging ( via the Geometry of Balance ) with the Electromagnetic Field of the Planet – one merges with the natural Principle that is the natural momentum within the whole movement of Life.

All this gradual sense of experiencing unification ( occurring through the embodiment of the movement of Unity in Motion ) is also the gradual transformation that facilitates the experiential transition of the individual from **evolutionary identification to the reality that is Creation.**

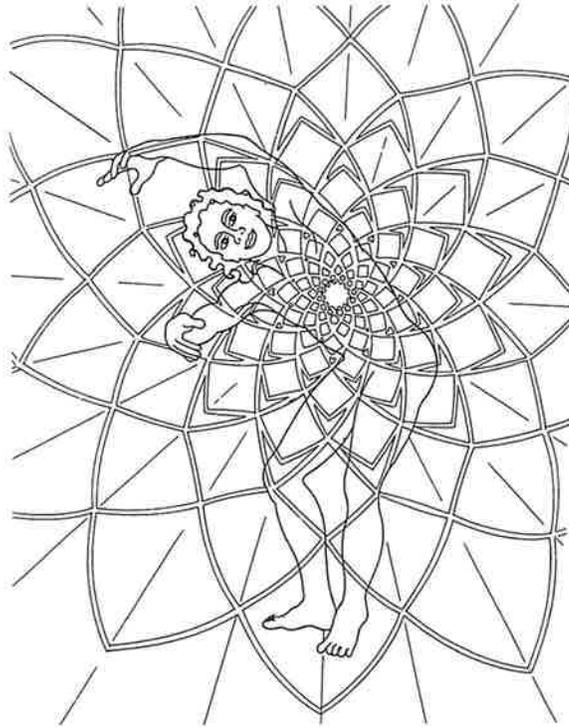

It is important to express that the transition of the individual from evolution to Creation is not only of the mind, because Universal Balance is not a philosophical concept of the mind.

Universal Balance is the integration of the three senses of The Self, which – in their triune unification – naturally corresponds to the balanced integration that is Universal Balance.

## THE PHYSICAL SENSE OF SELF

The integration of the three senses of The Self: comes through the physical sense of self because it is through the whole integration of the body, that the emotional and mental senses can regain their natural experience of unity. In their integration, the mind becomes free from any compensatory form of interpretation of Balance; and the emotions become free to be the natural energy that is the natural suspension of Balance.

**In Balance – as Balance** – the mind, the emotion and the body merge in simultaneity with the present moment, experiencing the **physical movement** that is Universal Balance.

In this sense, the physical embodiment of Balance is essential, because the physical body **is also the memory of all the evolutionary interpretations of life**. And, as such, it carries **the ancient memory of the race**: forever searching through cause and effect, to reconnect to the unity of Life.

It is for this reason that the three-dimensional movements of Unity in Motion ( which reinstate the geometrical connections that unite the individual with the Electromagnetic Field of the planet ) are now **THE MIRACLE** that brings about the release of all conflicted interpretations of consciousness. The movements do this, by transmuting the three senses of self into the natural clarification of Balance.

This clarification becomes the renewal of the consciousness of time and the simultaneous engagement of the human self with the boundless energy that is the integrated Balance of Life.

## **THE NEW CONSCIOUSNESS OF LIFE, CELEBRATING THE UNITY OF LIFE**

The renewal of consciousness ( celebrating Creation as the Unity in Motion of Life ) is now transforming the world – created inside of the evolutionary unfolding of life – into a completely new world.

This is The New World of unity, through which humanity becomes more and more consciously present with Universal Creation, experiencing the physical unity that is the eternal reality of Life.

The transmutation of the evolutionary world into The New World occurs gradually, moment- by-moment, as now the frame and sequence of time have finally merged with the eternal moment of movement that is the balanced reality of Life.

Because The Eternal Moment of Life is now the center of human consciousness, whole change is inevitable. Whole change is the natural expression of Life, transforming all things self-created into the new reality of Life.

**As we are all involved in this all-encompassing change that gradually transforms all of the interpretations of the dream of time into the atomic Creation that is The New World, it is of extraordinary assistance to – in full perspective – understand where we are.**

Even though the transposition of consciousness (that transformed evolution into Creation) is the change of one frame of reference ( in which consciousness went from being the **witness** of creation into the actual **being** of Creation ) the transformation of one world into the other is enormous.

Thus, we are as if we have just arrived at the completion of a storm. Even though the clouds are finally lifting and the sun is now shining, everything that suffered through the storm must be brought back into care and presence, in order to assist in the reinstatement of harmony.

This is the same with the old world. The world of evolution came into being as a creation of the dualistic interpretation of time, in which – through the actual interplay of conflict – we learned to understand and finally experience the Unity of Life.

This evolutionary process ( existing within the world ) was absolutely necessary, because this was to be the way in which we could experientially know and (in full knowledge) reconnect with the natural Principle of Balance.

With this understanding, the very process that brought into being the evolutionary world is a **divine design**, through which the consciousness ( that is human-nature ) can now

return to the boundless freedom that is its communion with the Unity of Life.

This recognition of the function and the fulfillment of evolution is now a celebration and also a whole vision. **It is a whole vision of change that** – in being based in the full acknowledgment of unity – **is absolutely free from any projection of separation.**

In the world of evolution, **The Family of Man** became divided into races: nationalities; different interpretations of religions; many interpretations of morality; many interpretations of forms of government; what was considered as pertaining to God and pertaining to the world, expressed as the separation of church and state; the many social classes that separated the rich from the poor, the intelligent from the ignorant, the liberal from the conservative and on and on.....

The whole construction of the evolutionary world was made of differences, as only through these differences could consciousness escalate its perception toward the unity of Life.

**Now, as we are in the presence of The New World, The New Consciousness of Life is giving us the most extraordinary gift, the gift of unity.** This gift ( that is now the atomic presence of unity ) is not a merging that erases all sense of difference (transforming all into an unrecognizable whole ) but – on the contrary – an experience of unity that honors and treasures the differences.

This recognition of the true gift ( that is unity ) allows us to finally reconcile **The Family of Man** so that, as we experience Creation, all of us can willfully merge the consciousness that is man with the consciousness that is God.

This is so because, in the reality of God, all beings are equal and free to experience freedom and their pursuit of happiness.

As **The Family** becomes then reunited by the unity of Life, all sense of disease and confusion will vanish: as all disease and confusion was in evolution, a mirror-reflection of the many separations existing within the mind of man.

As **The Family of Man** becomes united by the unity of Life, the many nationalities of man will unite. The erasing of the separation that innocently has existed between nationalities is also the lifting of the separation that innocently has veiled the whole creative, human expression of man.

The release of these veils is gradually transforming the human experience into the natural cosmic experience of human Life.

This is a gradual realignment of the mind of man that – in his matching relationship with Universal Mind – bring forward all the discoveries that transform all problems into the natural solutions of Life.

As **The Family of Man** becomes united by the unity of Life, all ecological problems that have afflicted the Mother Planet of Life will vanish. As all nationalities become united by the new perception of man, all nations also become united in the sharing and experience of the taking care of the Garden of Life.

As the Garden of Life becomes the Garden of Man, the many religions that have kept constantly alive the memory and longing for the reality of God will become gradually **present**.

**In presence then**, as the expression of the unity of Life, all religions will gradually merge with the present moment of Creation, transforming the interpretation of God into the reality of God.

This is the reality in which God is no longer innocently separated from the moment of physical existence that is Life, but is the reality of the moment in which God is the New Consciousness of Life.

**God is the actual Presence of Consciousness, expressing as Creation – the Unity of Life.**

As **The Family of Man** becomes gradually united by the unity of Life, all churches (safeguarding the Mother Principle of Life ) will gradually merge with the Mother Planet.

The Church, then, is gradually becoming perceived by the consciousness of man as being the actual Planet.

**Through this conscious re-instatement of essence the Earth will gradually become healed by the consciousness that is man, honoring the Mother Principle as being the feminine personification of God.**

As the church becomes gradually transposed from the place of praying into the surface-reality of Life, the planet becomes increasingly present, inside of the geometrical harmony that is Universal Balance. All churches become united then, into the all-embracing cathedral that is the universe.

The Mother Principle becomes constantly present, as being the natural physical form of all Life. The infinite Geometry, that suspends the universe as the movement of one, permeates all creation with the love of Life. The physical body, that is the human form of Life, will gradually become present, as it experiences the natural sensation of being that is the ecstasy of Life.

As **The family of Man** becomes more and more present with the ecstasy of Life, the many interpretations of morality that ( evolutionarily, innocently ) judge the nature of man will vanish. As the consciousness becomes increasingly free from the identification with sin – and as man understands through the experience of ecstasy, that God never judged the form of his Life – the confused mind of man will become crystal-clear. All sense of judgment then, innocently projected by the evolutionary mind of man, will cease to constantly re-create the covering of the natural, united moment of Life.

Then, as the mind of man no longer projects to his brother the judgment of time ( and consciousness becomes free from the constant projection of its past ) all misunderstanding within the mind, the feeling and the action of man will become clarified by the true nature of Love.

In the presence of Love – free then, from the projection of the dream of time – the consciousness that is man realizes its true nature, embracing all natural virtues of Life.

As **The Family of Man** becomes free from the judgment of the dream of time, the many interpretations of the forms of government will gradually become reunited in the common realization that is the natural well-being of all human life.

Inside of the clear perception of the freedom and happiness of man – and, as all sense of sin and judgment of morality is released from the mind of man – all sense of separation between church and state will gradually vanish.

As religion and government become free from the polarity existing within the dream of time, the conflict that separated one from the other will gradually dissolve. This dissolving reflects the merging of the vision of the government with the reality of God, as both gradually merge with the natural moment that is the Unity of Life.

In this merging, the mistrust that occurred between the government ( safeguarding the sense of freedom of man ) and religion ( safeguarding the judgment of time ) will merge with the center of the moment of Life.

**This union will reveal that happiness and freedom are ONE and the SAME, as both are THE UNION/REUNION OF GOD AND MAN.**

As **The Family of Man** becomes more and more free, by the Unity of Life, all sense of separation that exists in the evolutionary interpretation of the believers and the non-believers of God will gradually dissolve.

All forms of government and all forms of religions will become gradually united to the Eternal Moment of Life; life will become increasingly magical.

As the senses that are the human sensation of Life become increasingly natural, by man's communion with the Universal Balance of Life, the conflict between the existence and non-existence of God will gradually become meaningless.

**The magic of Life, expressing the natural splendor that is the actual existence of God, will naturally reveal that – with name or with no name – the absolute Principle that is the universe is the grace and fulfillment of man.**

As **The Family of Man** becomes more and more magically united to the Unity of Life, the evolutionary separation that existed between what was pertaining to God and what was pertaining to the world will cease to be.

**With the dissolution of these veils that covered the whole vision of man, the world of the spirit and the world of matter will gradually become united, as the natural reunion of God and man.**

The World, then, will gradually reveal itself as The New World: transforming the projected division that existed between spirit and matter into the naturally united substance of Life.

As **The Family of Man** becomes more and more united to the natural Unity of Life, the many social classes ( that evolutionarily separated the naturally given union between all men ) will dissolve.

**In the presence of the natural Unity of Life, the affluent will realize that the richest treasure of life is the given nature of Life.**

Inside of this essential understanding, the one that is considered rich will naturally share.

The sharing will no longer be an act of giving, based in the idea of helping a fellow brother – but the realization that giving is receiving.

In this sense, the consciousness that is man becomes increasingly whole, by the act of fulfilling all of the reflections of separation existing within one's mind. Thus, as the separation that existed between rich and poor ceases to be the interpretation of evolutionary mind, this becomes the final stages of the fulfillment of consciousness – in which all the affliction, that bounded the experience of human life, becomes lifted.

Now the presence of Life, expressing the New World and the celebration of The New Consciousness of Life, reveals the final **releases** of all mental, emotional and physical afflictions that separated the human experience from the constant reality that is the health of Life.

As **The Family of man** becomes naturally healthy, partaking in simultaneity of correspondences of the Physics of Life, all separation existing between the intelligent and the ignorant ( innocent ) interpretations of the experience of human life are gone:

As all races retain their individuality – and yet become united, by the united perception of man.

As all religions retain their essence and yet become united, prompting the merging of all sense of religion with the natural moment-to-moment reality that is Life.

As all projected sense of judgment becomes released from the mind of man.

As all forms of governments merge, in the natural understanding that is the freedom and happiness of man.

As the world becomes released from the judgment that interpreted the world as separated from God.

As the church and state become united, in the natural realization of unity between heaven and Earth.

And – as the social classes ( that separated the rich from the poor ) become free from the compartmentalization of the whole mind of Life – the intelligent and the ignorant become united, in the natural moment-to-moment reality that is Life.

The intelligent become fulfilled, by the full-reflection that is the whole mind of Life; and the ignorant become instantly illuminated, by the whole unity of Life.

Immersed in the illumination that is now The New Consciousness of Life, the evolutionary interpretation ( that separated the liberal and the conservative ) becomes fully released from the dualistic interpretation of life.

The liberal becomes the atomic realization of the truth, that all men are created equal in their right to pursue liberty and happiness. And the conservative becomes free from having to hold back, by “safeguarding” the individualistic sense of freedom of man.

Now, the sense of freedom has finally merged with the reality of Life.

Now, in the New Consciousness that is the unity of Life, all men are created equal. In their shared equality, they are a mirror-reflection of the intelligence of Life: recognizing **The Family of Man** to be the truth of Life; embracing the circle of Life as “**One for All, and All for One.**”

In their unity, **The Family of Man** is now free, because it no longer innocently projects separation upon another. In unity, happiness is the given. It is the natural joy that arises with the appearance of the Moment of Life, fulfilling all Creation with the Life of Love.

## *GLOSSARY*

**ADAM:** The ancient father of Life; the primordial man; the first human essence concealing, within the core of his heart, the prototypal first Image and Likeness of God.

-----

**BALANCE:** The Tensional Integrity that suspends the universe. The one constant sense of Life. The continual sense of wholeness that – as time/"the frame of existence" – is eternal presence, traveling as united wholeness; expressing the atomic moment of Creation that is the regeneration of all Universal Life.

-----

**BIORHYTHM OF LIFE:** The form of Universal Balance. The whole field of movement that is universe expressing The New Consciousness of Life, constantly reuniting and renewing the all of Creation as the body of One.

**The Biorhythm** is eternal in its nature, because it is that which never ( for an instant ) has ceased to exist. It is the constant unity of Life, constantly re-creating itself as the appearing moment of Life.

**The Bio-rhythm** as it is the whole body of Life – it is the whole energy that – as constant fusion – merges Father Creator, Mother Nature and Eternal Son; as the reunited Trinity of Life, expressing the Consciousness of Eternal-Becoming – renewing Creation with the infinite intelligence that is Universal Love. See “**ecstasy**.”

-----

**CHRIST:** The Physics of Life; the expression of Messianic Consciousness; “I and My Father are One”; the first embodiment of Consciousness merging human/Divine existence, as it corresponded to the Whole Nature of Life.

**Christ** is the supreme archetype of existence, as it corresponds (in mirror-reflection) to the appearing moment of Life; bringing into expression the Messianic Consciousness that is Eternal Life.

**Christ** is the human self of Life, re-engaged – in natural communion – with the new moment that is Universal Creation; receiving the nature of true future, as the celebration that is The Kingdom of Love.

**CROWN:** That which is the consciousness, that is the human-self experiencing – in conscious awareness – his natural reunion with the Universal Equilibrium of Life.

This is the Self's experience of living the simultaneous reality that is the life of Balance; as he is suspended by the natural engagement ( that is the eternal whole movement ) that is Creation.

Through its engagement with **Crown**, humanity is One with Creation; living the essential whole-awareness that is the Universal Balance of Life.

-----

**DEATH:** The transmutation/transformation of all physical form, constantly renewing the Whole Field-of-Consciousness as it simultaneously appears as The Eternal Moment of Life.

**Death** was the necessary means of evolutionary creation, that became eternally transformed, as The Essential Self of Life merged with The Father's Creation – naturally re-engaging Consciousness with the ecstasy of Life.

This is the conscious event that archetypally reunited all levels and planes of evolutionary existence with the one Universal Heart of God: re-engaging, in balanced fulfillment, the all of Creation, with the eternally present moment of Life.

-----

**DREAM OF TIME:** The evolutionary unfolding of man, awakening ( in time ) to his merging communion with infinite Life.

**The dream of time** has been the time of evolutionary creation, through which human consciousness rediscovered all of the principles and notions that corresponded ( in absolute mirror reflection ) to Universal Balance; expressing the wholeness of Being, existing within the Universal Mind of Life.

-----

**ECSTASY:** The New Consciousness of Life, centralized in the whole field-of-unity that is the Unity in Motion of Life.

**Ecstasy** is the Whole-Consciousness that is God, orchestrating the essential communion among the all of universal existence, as it simultaneously recreates the united moment that is Universal Life.

**Ecstasy** is also the realized nature of Consciousness that is the human self, experiencing the natural sensation that is the Boundless Feeling of Life.

**Ecstasy** is human expression, experiencing the infinite freedom that is its reunion with the Heart of Life.

-----

**ECSTASY OF LIFE:** The engagement of Unity-in-Motion by which the whole design that is the Universe is constantly changing, as the renewal of its whole physical nature; receiving the full experience of its transparent creative intelligence, emanating from the Heart of God.

**Ecstasy of Life** is also Self-equilibrium, the human experience of the balanced nature of life; in which the whole of one's being, mirrors, in synchronicity of correspondences, the united nature of Love.

-----

**EDENIC GARDEN:** Paradise - the center of unification that is also the center of expansion within all universal Life.

**Edenic Garden** is also the physical sense, within all universal existence, centralized at the center of the Heart of God; living now, in divine communion, the nature of its Physics; receiving/creating, in absolute participation, the life of wholeness that is The Kingdom of Love.

**Edenic Garden** is now the reinstatement, on Planet Earth, of the condition known as Paradise; mirroring ( as physical, centralized Consciousness ) the unity that is the whole universal nature of Life.

-----

**ENLIGHTENMENT:** The natural consciousness that is the human Self, as it is reunited (as one) to the eternal moment of existence, experiencing the magical adventure that is the futuristic unfolding of Universal Love.

**Enlightenment** is the union/reunion of man with God, in which ( in perfect mirror reflection of image and likeness ) the human self experiences the true knowing of the phrase, " I and My Father are One."

**Enlightenment** is the transposition of mind, in which the linear/ evolutionary mind of man becomes the holographic mind of Creation, expressing the Universal Mind of Life. In his reunion with Universal Mind, the human self re-enters the central experience of Life; becoming engaged in the natural ecstasy that is Universal Balance, bringing into manifestation the beauty that is Creator's Love.

**ESSENTIAL SELF:** Love - the Image and Likeness of God; the human self that – by merging with its whole-mirror reflection – prompted the completion of the evolutionary unfolding of life; reuniting, in Love, all of the planes and levels of Universal Consciousness, through the heart of Life.

**The Essential Self** is Eternal Son – the Consciousness of universal existence that ( in reuniting with its Whole Nature, reuniting with its whole love ) transported all Creation into the fusion of harmony that is true cosmological Life.

-----

**ETERNAL MOMENT OF LIFE:** Atomic nature; The Eternal Now that is universal Creation reuniting/renewing the all of universal existence, as the reality of One.

**The eternal moment** of life is that which “Is”: the absolute intelligence that is the whole movement of Creation, expressing ( as Unity-in-Motion ) the supreme Consciousness that (in being the atomic existence of Life ) cannot be stopped by time.

-----

**ETERNAL NOW:** The holy instant. The eternal, ever-changing moment of movement that is Universal Life. The Tensional Integrity that, by embracing all universal motions as the movement of One, gives and receives itself as the united Balance of Life.

**The Eternal Now** is the perfect crystallization of Becoming within the movement of Life, expressing Essential Self – Eternal Son. The expression that is the Messianic Consciousness of Life, renewing Creation for the honoring in Love of the universal Father Creator and for the replenishing of Mother Nature, as the fulfillment of the physical form of all Life.

As the merging of the Trinity of Life, **Eternal Now** is also the natural physical experience of Balance. The reunited sense of the mental, emotional and physical sense of Self, merged as one energy – the Boundless Feeling of Life – expressing the individual’s natural communion with the eternal field of Love emanating from Creator’s Heart.

-----

**ETERNAL SON:** The whole field of Consciousness that is Universal Balance, expressing the intelligence, the Love and the physical fulfillment that is the Image and Likeness of God.

**Eternal Son** is the union/engagement of Balance between evolutionary consciousness and Universal Consciousness that – as Unity in Motion – is traveling as ever-present Now, unveiling the futuristic, perfect design of Life.

**Eternal Son** is named as such because, futuristically, it represents the honoring of the union between three archetypal expressions of consciousness reunited as One:

1. Adam, the first Image and Likeness of God.
2. Jesus the Christ, the Master Self that consciously reunited man with God. And
3. The Essential Self of Life that, as the synergistic expression that embraced all human consciousness, transformed all sense of duality into the United Reality of Life.

As this triune unity, **Eternal Son** is the whole representation of Consciousness that transformed the whole field of evolution into the new creation that is The New Consciousness of Life.

**Eternal Son** ( being The New Consciousness of Life ) has finally reunited time and eternity, merging human consciousness with the Life of Love.

**Eternal Son** is Ecstasy ( the atomic nature of Love now permeating the all of Creation ) transforming from within-out the surface of consciousness that is the Physical Reality of Life.

This transformation is a whole movement expressing – as Unity in Motion – unified existence, constantly dissolving all resistance of time, constantly opening the new form of Seeing within the eyes of man.

This is the new form of Seeing that transforms the *flower* into the expansional expression that is the beauty of Life. This is the new form of Seeing that receives itself through the act of giving and receiving of its own Light.

As the atomic embodiment of unity, **Eternal Son** is now the one sense of unity that allows the mind, the feeling and the action of man to embrace the three aspects of his whole Love.

As the atomic embodiment of unity, **Eternal Son** is the essential individual that is every man and every woman of Life.

**Eternal Son** is Eternal Now, the One form of active creation that is simultaneously the man, the woman and the Love of Life existing as the one thought, the one feeling, and the one action that corresponds to the human communion with the atomic movement of Life.

-----

**EVE**: The Mother of Life - The physical form of Creation, through which the holographic perfect design that is Adam became his fullest potential and the perfected human expression of Life – The Essential Self – Eternal Son.

**EVE** is the creative Feminine Principle that is the whole physical universe; **the form of God** that – in being as One with Father Creator and Eternal Son – is now consciously being re-created as the Whole Nature of her unity and as the living expression of infinite Love.

**EVIL:** The evolutionary confusion of consciousness that ( being diverted from the wholeness of life ) as the relented Trinity of life, became the necessary separation that was to allow the individual self to experientially recover in time ( through the fruits of his everyday labor – the work of his life ) the natural state of perfection that is the given nature of Life.

**Evil** was the innocent state of separation within the human-self, experiencing the isolation that was the evolutionary compartmentalization among the three senses that are the Whole Nature of his Life.

This was the sense of separation that, through the whole voyage of evolution, allowed the human- self to recognize that **evil** was a projection of time. **Evil** was a perception based in a polarized experience of consciousness, searching through differentiation to find the unity of life.

Thus, in truth, the concept of **evil** was nothing other than the polarization-perceptions, from which the human self purified the inner projections of separation existing within its own mind.

Thus, in truth, **evil** existed as the polarized-nature of consciousness, expressing the voyage that lasted throughout all of the evolutionary unfolding of mind. Through this voyage, the human self - ( the individual expression of the consciousness of man ) - searched through its own personal experience of life; to fulfill, in time – as whole awareness – the whole of his reflection, the whole of his mind.

This search has been the voyage of human consciousness that – at the completion of the evolutionary search for the Unity of Life – became released and renewed, with the Essential Self's merging with the Boundless Feeling that is the wholeness of his love.

At the instant of this merging, good and evil ( the polarized, divisions mirroring all dualities of life ) became fused into the center-field of life, allowing The Self to recognize the all-permeating goodness that is the eternal field-of-life.

Inside of this experience ( envisioning the content of his Whole Mind, expressing the Whole Feeling and the Whole Physical engagement that was the very nature of his Life ) the human self realized that good and evil ( the light and dark sides of its own mind ) had been the temporal transmutations that finally facilitated the clarification, in Love, of all of the reflections of his own heart.

This was the realization of wholeness, within The Essential Self, through which the individual self-of-life became – once again, as Image and Likeness – the natural expression that is his direct communion with the Mind, the Heart and the Action that is God.

**EVOLUTION:** The history of the self - the history of all time – the “dream of time” – the time that it has taken for the evolutionary interpretation of consciousness to discover (through the fruits of its labor, the labor of its life ) the full-scenario of perception that corresponded to its merging with Universal Balance.

This is the merging that interconnected the Self and the All of creation with the eternal, ever-present Now.

This is the reunion of time and eternity, expressing the whole merging of Consciousness that transposed evolutionary creation into the holographic perfection that is Universal Love.

-----

**FABLE OF TIME:** The history of man, expressing evolutionary creation as the projection of its destiny – bringing into completion the merging of time with the infinite Geometry of wholeness that is the eternal, balanced movement of life.

-----

**FAMILY OF MAN:** Global Unity; the conscious reunion of all human beings, mirroring – in Divine communion – the whole synchronicity that is Life.

**The Family of Man** is the sense of unity that reunites all human existence, as the living creation of The Family of Love – renewing the earthly garden as the Kingdom of Love.

**The Family of Man** is the universal nature of Love, as it is reunited to its Physics – as it is reunited to its Life.

-----

**FEMININE PRINCIPLE OF LIFE:** The Consciousness of Love; the Alma Mater of Life that – fused in Love with Creator – is the essential physical form of Creation, giving/receiving the harmony and beauty that is Eternal Son.

-----

**FORCES OF BALANCE:** Tensional Integrity. The one system of forces that ( as the whole embrace of God's love ) reunites the whole universe, as it also simultaneously expands.

This is principle of Unity in Motion that is Universal Balance, through which the moment of Life is one frame of crystallized existence, constantly changing as the “more” of life.

This is the nature of Balance, through which the moment of time is atomically merged with the eternally creative fourth dimensional Biorhythm of Life.

Engaged in this dance of unity, the **Forces of Balance** are The Self; experiencing, as Boundless Feeling, the absolute strength that is God's Love; re-pairing, in a simultaneous mirror-reflection of correspondences, the whole of Creation as The Kingdom of Love.

-----

**GEOMETRY OF BALANCE:** All of the planes and directions existing within the all-embracing nature that is the three-dimensional frame and movement of Life.

**The Geometry of Balance** is the omni-directional expansion that is Universe, expressing the simultaneous implosion/explosion and the center of movement of Life, emanating from the Heart of God.

-----

**GOD:** The whole movement that is universal existence, manifesting – as Creation – the Eternal Now.

**God** is the Breath of Life – the original Master Designer – expressing the Whole Mind of Life as the forever unfolding harmony and beauty that is omnipresent Love.

**God** is the universal Biorhythm of Life, reuniting the Heart of Creation and the palpitation of the human heart as the beating of One.

**God** is the atomic, essential sense of existence; that which cannot be perceived within the sequential nature of one's mind, but can be fully felt as the center of one's heart.

-----

**GRAVITY:** Love. The force that centralizes all celestial existence, in relation to the **absolute center** that is the Universal Heart of God.

**Gravity** is the central point of natural conversion that is also, naturally, the central point of expansion within all Life.

**Gravity** is the unity that is the all-embracing nature of Love, liberating and giving Being to the new moment of eternal Creation that is The Kingdom of Love.

-----

**HEALTH:** Absolute Reality; God; the self-expression of wholeness that is Universal Love; giving /receiving itself as the constant regeneration of The Eternal Moment, crystallizing the transformation of all physical existence within the whole movement of Life.

As the Unity of Life, **health** is the Circle of Life expressed as the nature of Whole-Consciousness centralized in the mirror reflection of Love.

**Health** is The Self receiving itself as God.

**Health** is the Physics of Balance and is essentially experienced through the merging communion of Self with the Eternal Unity of Life.

-----

**HEAVEN:** The reunion of Father Creator, Mother Nature, and Eternal Son – prompting the Natural Reality that is the Universal Balance of Life.

**Heaven** is Eternal Now – **Universal Unity** – the instantaneous unification and expansion of all things at once, transforming all boundaries and directions ( existing within relative time ) into the Oneness and Wholeness that is The New Consciousness of Life.

**Heaven** is the Physics of Life – the act of unity – that atomically centralizes the Planet Earth in relation to the Heart of God.

**Heaven** is the Garden – Paradise – that which unites all Creation as the Heart of One.

-----

**HEAVEN AND EARTH:** Holographic Consciousness; the union of the internal and external senses of man, reuniting Earth and Universe, through the equilibrated center/movement of one's Life.

**Heaven and Earth** is the universal union of Balance, expressing Creation as the celebration that is The New Consciousness of Life.

-----

**I AND MY FATHER ARE ONE:** The self-expression of unity that ( as the Circle of Life ) is the natural enlightenment of human life.

**“I and my Father are One”** are the three frames of references that make up the Whole Consciousness of man:

1. The point of reference that is the “I” sense of awareness of Life.
2. The All, from which the one senses itself as Life. And...
3. The movement that gives **meaning** and, thus, **reality** to the union between the All and the One.

**I and my Father are One** is the Trinity of Life, reunited in Love – expressing the unity among three expressions of consciousness (Adam, Christ, and Eternal Son) honoring in Creation, the infinite intelligence that is Creator's Love.

**IMAGE AND LIKENESS:** The mirror-reflection of Life, in which Consciousness recognizes itself to be the Light that is its Seeing; to be the Love that is its Heart; and to be the Physical Reality that is the natural moment within its Life.

**Image and Likeness** ( being pure Principle ) is the union/reunion of Father Creator and Eternal Son centralized as the center of Love, bringing into constant fulfillment – through the traveling nature of Life – the eternal Mother Principle/the Feminine Principle that is the physical form of all Life.

-----

**JUDGMENT OF TIME:** The time of evolutionary creation, expressing the voyage of self-discovery, through which human nature has searched and finally found its merging fusion with Creation – reuniting with the Source that is God.

**The Judgment of Time** was the time of discovery, in which the nature of man innocently projected separation; that which became its projected internal distance from the external merging with its Life.

**The Judgment of Time** was the self-created judgment that became fully released, as the Essential Self of Life embraced – in Love – all the evolutionary polarities that were the ancient drama within the “dream of time”... See “dream of time”.

-----

**KINGDOM OF LOVE:** Pure Principle. The central existence of unity – the traveling of ecstasy – expressing Whole Consciousness mirroring itself as Whole Consciousness, re-creating itself anew from the Original Design of Life.

In its Original Design, Consciousness “is” The Kingdom that unites all kingdoms, because it expresses **The Idealistic Nature of Life** that corresponds ( in unity ) to the heart of every being of Life.

As the very Essence of Life, **The Kingdom of Love is the given.**

It is the centralization of the Heart of God, connecting in Image and Likeness to every being of Life; expressing the natural merging of Heaven and Earth; reinstating, in willful Creation, the Edenic Garden of Life.

-----

**LIFE:** God. The eternally balanced/equal/whole sense of existence, constantly appearing anew, renewing – within each frame of its unresisted movement – the whole universe at once.

**Life** is the creative wholeness that is Universal Mind; through which the individual of life gives and receives itself, as the mirror-reflection of Consciousness, experiencing the invincible nature of Love.

**Life** is the Spirit of Love; the Invincible Force of Creation that houses Father-Creator, Mother-Nature and Eternal-Son.

These are the three senses of Life reunited as One; the Trinity of Life, expressing the renewed nature that is Eternal Consciousness, establishing perfection among the whole of universal Creation, as the celebration that is The Kingdom of Love.

-----

**LOVE:** God, the One Force of Creation. That which cannot be stopped in time; as it is the atomic-nature of whole-perfection, unfolding – in perfect action – The Eternal Now – expressing the miracle called Life.

**Love** is expanded fusion, the primal sensation of Life, that ( being “the constant of life”) expresses itself as the sense of wholeness-within-wholeness, embracing itself as One.

**Love** is the One triune nature of Life: fusing Father-Creator, Mother-Nature, and Eternal-Son, constantly appearing as the Whole Field that is the Eternal Reality of Life.

**Love** is The Self’s exuberant feeling of Life, recognizing ( in Love ) its constant merging reunion with its Creator – God.

**Love** is the natural feeling of the human-self, experiencing ( in simultaneity of correspondences ) the united nature that is the mind, the feeling and the action of Life.

**Love** is the all-permeating, invincible force that – traveling throughout all time, as eternal existence – has kept alive the perfection of unity, as the full mirror-reflection that allowed the Essential Self to rediscover itself as being made of all **love**.

This is the self’s recognition that transformed the evolutionary consciousness of life, by re-engaging it to the ecstasy of motion that is the Universal Balance of Life.

-----

**MERGING:** The synchronization of the human self with the balanced movement of Life. This is the transposition that takes place, as the evolutionary mind of man merges with the Eternal Mind of Life.

In this **Merging**; all sense of disconnection and confusion ( gathered throughout the voyage of time ) becomes released, revealing The New Consciousness of Life.

The New Consciousness of Life is our human reconnection with the Unity of Life. This is the celebration that transform, our life in the Planet Earth, into a totally New Reality; which expresses our re-engagement with the natural, whole movement of Balance that is the ecstasy of Life.

-----

**MOTHER NATURE:** The Universal Mother of Life, bringing into Birth the Moment of Life; expressing the **forever new** nature of Consciousness that is renewed creation – Eternal Son.

**Mother Nature** is the Planet Earth, centralizing the Feminine Principle of Life, as the natural Garden that houses the existence of all human life.

**Mother Nature** is ( in its wholeness ) the reunion of three senses of Life. This is the reunion of the receptive nature that is the Mother of all Life with the perfection that is Father Creator/the Giver of Life – and, with the creative nature of Son/Eternal Son.

These three senses, reunited ( as One ) the fused Trinity of Life; renewing/replenishing the All of Creation as the Eternal Moment of Life, forever unfolding the Love of life.

-----

**MOVEMENT:** The primal emanation from the Heart of God. The primal motion from which all motions began, expressing the constant miracle appearance of Consciousness, renewing its Creative Wholeness as the All of Universal Life.

As the universe, **Movement** is the eternal nature of Life: the **Invincible Spirit**; that which cannot be stopped by the sequential nature of time. It atomically expresses the ever-present intelligence that is Creator's Love.

-----

**MOVEMENT OF LIFE:** The ALL reunited as ONE, expressing the eternal union of Father Creator, Mother Nature and Eternal Son, as the experience of the Infinite Spirit of Life personalized now within each individual self of life.

In this union, Father Creator is the natural holographic intelligence that is the Universal Mind of Life, unfolding the Perfect Design of Life.

Mother Nature is the Universal Mother Of Life, now being fulfilled as the physical form of all Life. And

Eternal Son is the creative nature of Consciousness, replenishing the Mother Principle and honoring the Father's Mind, as the intelligence of Love that is The Kingdom of Love.

The fusion of this Trinity is the natural experience of Life, as it is lived as Eternal Now, unveiling the renewed Moment of Life.

This is the Moment within the movement of universal existence in which the whole of Creation partakes of the regenerative unity that is the emanating expression of the Heart of God.

In this union, the human self lives now in simultaneity of correspondences, the creative **Moment of Life** expressing the perfection that is Universal Creation, re-creating anew the one kingdom that reunites all kingdoms as the Love of One.

In this union, The Kingdom of Love is the living expression of the Consciousness of Unity, receiving/creating itself as Unity.

The Kingdom is the moment of movement of Life, housing the perfect Creation that is The New Consciousness of Life.

In Unity, as Whole-Consciousness, The Kingdom is thus eternal, because it is the atomic synthesis that is the “is-ness” of all creation.

It is eternal because it is the fulfillment of Life, expressing the instant renewal of Balance that is the **atomic moment of Life**.

The kingdom ( being the atomic moment of Balance of Life ) is the One symbol of Life that houses the perfection that is Father, the feeling that is Mother, and the creative nature that is Son – expressing the union as Eternal Now of The Trinity of Life.

This fusion of The Trinity of Life – as the Unity in Motion of Life – is the true atomic existence of God.

God ( Being Atomic Reality ) is the supreme existence that cannot be experienced as the perceptive nature of mind, because perception is one step removed from atomic existence.

But, this supreme existence can be fully felt, through the living experience of the heart, within each individual self of life.

Through The Essential-Self merging of The Trinity of Life, the individual of life is now the conscious presence that transforms the temporal moment of life into the eternal regeneration that transports the All of Creation into the Present Moment of Life.

The individual self of life is now the transformative nature of temporal life; moment-to-moment, constantly awakening to the Eternal Moment that – in its correspondence to the Physics of Life – is also **The Movement of Life**.

**PEACE:** The Atomic Now; the given nature of Life; the natural attribute of perfect harmony that is The Eternal Moment of Life.

**Peace** is that which is the unrelented, unresisted wholeness that is supreme intelligence, emanating from the universal Heart of Life.

**Peace** is the Dimension of Oneness that is Holographic Consciousness – The Ten Dimensions of Life – expressing ( as Unity in Motion ) the whole movement of Universal Balance, in which all things are simultaneously One.

-----

**PERFECT ACTION:** The Eternal Now, within the whole movement of Life, expressing the Physical Reality that is Universe.

**Perfect Action** is the Infinite Spirit of Life; appearing as the natural expression of Whole-Consciousness; living the union/reunion of Father Creator, Mother Nature and Eternal Son.

**Perfect Action** is the natural moment of Creation, expressing the New Consciousness of Life.

-----

**PHYSICS OF LIFE:** Love. The whole sense of existence that – engaged in the Circle of Life – is the awareness-communion of Self with the Mind, the Feeling, and the Action that is God.

**The Physics of Life** is the union of matching reflexes, between the consciousness that is the sense of “I” within the human self, and the Whole Field of Consciousness that is God.

This is the natural creative reunion of Consciousness, merging with the full-spectrum that is the Whole Mind of Life.

This is the natural state of correspondences, in which “I” ( of the human self ) is the full understanding of the statement, “I Am the Image and Likeness of God “; reflecting ( in perfect synchronization ) the Intelligence, the Love, and the Physical Whole Engagement that is the Eternal Unity of Life.

-----

**RELATIVITY:** The evolutionary discovery, based in the acknowledgement of a point-of-reference being relative to its own perception.

**Relativity** was the voyage of evolutionary mind that became released, through the merging-fusion of Self, with the whole movement of Life.

This became the merging that transposed all relative perceptions ( within the mind of the Self ) into the whole field-of-awareness that matched ( in simultaneity of correspondences ) the Eternal Mind of Life.

Through this matching with the Eternal Mind of Life, the Self became instantaneously Present with the Eternal Mind of Life; realizing, to the astonishment of his mind, that he was being embraced by the sea of Love.

He was experiencing, as Unity-in-Motion, the fourth-dimensional reality that is the whole movement of Life. This was the realization of unity that transformed all notions of **Relativity**, within the consciousness of man, into the absolute relationship of wholeness that is the Universal Balance of Life.

-----

**RELIGION:** The evolutionary search of human consciousness for the understanding of Love that – at the completion of evolutionary becoming – prompted the fulfillment of the Essential Self of Life, by which the synergistic nature of all evolving consciousness became reunited with the nature of its Boundless Love.

This is the fusion of Consciousness that brought about the living communion of all human existence with naturalness; the Triune fusion of Father Creator, Mother Nature, and Eternal Son.

This is the fusion of evolutionary Consciousness that transformed all philosophies of Life into the natural living experience that is human existence, re-engaged with the natural ecstasy that is the Eternal Movement of Life.

This is the fusion that erased all projection of distance, existing between the human self and God, and brought about the natural transformation of all forms of **Religion** into the natural experience of Life.

By this ( his return to the natural experience of life ) the human self ( being now One with God ) is reinstating the Planet Earth into its natural sense of communion with Universal Balance.

Through this reinstatement of unity, the Planet – and the whole interwoven humanity that inhabits it – experiences Physical Reality, as the natural fulfillment that is God's Love.

-----

**SELF:** The point of consciousness that is the Intelligence, the Boundless Feeling, and the Physical Nature that is the individual ray of the Heart of God.

**Self** is an individual of life, reunited in natural Balance with the Atomic Moment of Creation, giving/receiving the perfect creative expression that is the ecstasy of Life.

**SPIRIT:** Love. **The united force that is the atomic expression of the merged Trinity of Life.**

**Spirit** is the all-encompassing Geometry that is the movement of Life, reuniting and renewing the all of Creation as the Eternal Moment of Life.

**Spirit** is the essential force of Life – that which is the creative nature of man – that which has searched and found, through the history of all time, the natural Life of Love.

**Spirit** is the individual sense of life, reunited with its Whole Nature, reinstating – on Planet Earth – the condition known as Paradise.

-----

**SYNCHRONIZATION:** The whole movement that is Universal Balance, expressing the union of all celestial existence, as the constant appearance/renewal of the Moment of Life.

**Synchronization** is the Eternal Now, expressing **the All** – centralized in the creative **action** that is Eternal Self – Eternal Son.

**Synchronization** is the integration of the three senses of self;: transforming the mind, the feeling, and the action into the essential experience that is the Unity of Life.

-----

**SUSPENSION:** Pure Three-dimensions. The freedom inherent in the Reality of Balance, experienced as the ecstasy of Love.

**Suspension** is the all-equilibrated communion among all celestial existence by which the individual self is supported by the whole-movement that is universe, as he provides ( as Conscious Reality ) the center of stability that is the creative expression within the Eternal Moment of Life.

-----

**THE DIMENSION OF ETERNAL EXISTENCE:** Universal Balance embracing the Ten Dimensions of Life as One. The Eternal Moment of Life; uniting and receiving itself, as the Unity- in- Motion of Life.

**The Dimension of Eternal Existence** is the centralization of all celestial motions, as they become crystallized into the Moment of Life, and as they forever unfold in the regeneration that is the expanding universe.

**The Dimension of Eternal Existence** is the center of Creation and it is called Eternal because it is the constant Whole-Nature that is the Universal Equilibrium of Life.

**This Dimension** became reality as The Essential Self of Life transposed evolutionary creation into the natural fulfillment that is the ecstasy of Life.

Through this transposition, all sense of duality gathered throughout the voyage of all time -- as they are transmuting now through the center of Universal Life – are dissolving into the new nature of Unity, that is the Universal Balance of Life.

**The Dimension of Eternal Existence** is a blessing; in the sense that it is now the whole field that grounds all physical existence as the Celestial Reality that is Universal Love.

-----

**THE NEW CONSCIOUSNESS OF LIFE:** The release of all confused premises of mind, emotions and physical experiences – that evolutionarily have propelled the human self to finally merge with the universal experience that is the balanced movement of Life

**THE NEW CONSCIOUSNESS OF LIFE** came into being; opening the field to reconnect the human self with the Eternal Reality that is Universal Love.

This reconnection of human consciousness with the Unity of Life is a celebration. It transforms our life in the Planet Earth into a totally New Reality which expresses our re-engagement with the natural, whole movement of Balance that is the ecstasy of Life.

-----

**THREE-DIMENSIONS:** The suspended nature of each celestial body, engaged in the whole- movement that as – Unity in Motion – is the natural ecstasy of life.

**Three-dimensions** is the natural expansion of the human self, balancing the Field of Gravity through the central, unified radiation of the human heart.

**Three-dimensions** is Self- Equilibrium, suspended and directed by the Universal Equilibrium of Life.

-----

**TIME:** The sense of delay that, as the history of evolution, separated the three senses of perception ( within the consciousness of the human self ) from the simultaneous renewal that is the Atomic Moment of Life.

These were the three frames of references ( the internal, the external and the movement of life ) from which the self sensed himself, in relation to the Whole Biorhythm, expressing the wholeness of Life.

**Time** was the whole voyage of evolutionary creation, through which the human mind discovered ( through a whole scenario of dualistic perceptions ) the Eternal Nature that is the Universal Mind of Life.

**Time** was the distance that it has taken, for the whole lineage of man to merge with the whole of its nature – the mirror reflection – I and My Father are One.

**Time** is now the frame of Life, reunited with the whole-movement that is universal Creation, transmuting the physical separation ( that existed between the temporal and the eternal natures of life ) through the natural fulfillment that is God's Love.

-----

**TREE OF LIFE:** The one symbol of the Unity of Life, expressing the merging communion of the human Self with the whole movement of Life.

**The tree of Life** expresses the Balance among all neurological reflexes within the human body, as they are liberated, through the natural integration that is the unification of the three senses of Self.

In this triune merging of the mind, the feeling, and the action ( expressing the human sensorial experience of life ) **The Mind** is the whole conceptual understanding that is The New Consciousness of Life. **The Feeling** is the whole energy that is the Self, living communion with the whole movement of life. And **The Action** is the biomechanical physical engagement that is Universal Balance, synchronizing the Self with the Eternal Moment of Life.

**The Tree** represents the whole integration that is pure three-dimensions, as it is engaged with the natural ecstasy that is the Unity of Life.

As the original imprint of wholeness ( concealed within the body of Adam ) the **Tree of Life** is now the **design of fulfillment**, through which the Planet Earth ( and all Nature that inhabits it ) is re-instated to the natural Reality that is Life in the Garden – Paradise.

-----

**TRINITY OF LIFE:** Three-dimensions: The three frames-of-reference that make up the moment of existence; the three necessary senses that are the consciousness of man - Eternal Son.

-----

**UNITY:** That which "IS" ( the Atomic Moment of Life ) expressing the simultaneous coordinations among all particles of form, continuously unfolding toward the whole embrace that is the Mind, the Heart and the Action that is the Eternal Reality of God.

**Unity** is the reunion of the three senses of Self, reconnecting the human self with the unresisted movement of Love.

**Unity** is the sense of Physical Reality that is Universal Balance, expressing the nature of God's Love, as the natural Creation that is the Kingdom of Love.

-----

**UNITY IN MOTION:** The Principle of Universal Balance, expressing the simultaneity of all coordinated, celestial motions – reunited as the eternally-balanced frame and movement of Life.

**Unity in Motion** is also the technology of movement, designed to unify ( in natural Balance) the mental, emotional and physical senses of Self.

These are the three senses; expressing the conceptual, the emotional and the biomechanical natures of Physical Balance – synchronizing the Self, in simultaneous correspondence, with Universal Balance.

As **Unity in Motion** ( engaged and directed by the natural momentum that is the unresisted movement of Life ) the Self receives his whole sense of being, through the universal creativity that is the Life of love.

As **Unity in Motion**, the Self is The New Consciousness of Life;: bringing into creative expression, the New World. The Self is unfolding the atomic celebration of Unity that is the Kingdom of Love.

-----

**UNIVERSAL:** God – Balance – Fusion - the Oneness of existence that embraces all Creation as the Eternal Now.

-----

**UNIVERSAL BALANCE:** The natural omni/dimensional, all inclusive, radiational energy that is Love, that – as the All-encompassing field that is universe – sustains ( in natural momentum, as Physical Reality ) the physical form of all Life.

**Universal Balance** is Creation; the nature of the unfolding moment of Life, appearing as the infinite design of wholeness that is the Ten Dimensions of Life – expressing the intelligence, the beauty, and the Boundless Feeling that is God's Love.

As God, **Universal Balance** is the frame/movement of universal existence; expressing the union and the renewal that is the Physical Reality of Life, forever engaged in the Unity-in-Motion of Life.

**UNIVERSAL EQUILIBRIUM:** Absolute Principle. The primal sensation of Life that is the perfect, Universal Mind of Life – expressing ( as one sense of wholeness ) the Consciousness of **Absolute Being** that is God’s all-regenerative, all-embracing communion among all centered, universal movements of Life.

**Universal Equilibrium** is also the central point of awareness of Life; that which is the Self’s reunion with the Eternal, Atomic Moment of Life – experiencing the **Divine Presence** that is the **ecstasy of Life**.

-----

**UNIVERSAL MIND:** The Mind of God, fused to the whole feeling and the Whole Physical Reality that is Universal Life.

**The Universal Mind** is also the mind of the Self, experiencing the whole field of awareness that is the Image and the Likeness of its own creative unification.

**The Universal Mind** is Creation; the balanced, whole movement of Life, centralizing the Planet Earth as the Edenic Garden of Life.

-----

**UNIVERSAL MIND OF LIFE:** The Mind of God, regenerating – in perfect harmony – the All of Creation, as the movement of One.

This is the Mind of **perfection**; expressing the **perfect action** that is the **Atomic Now**, embracing the All of universal existence as **The Eternal Moment of Life**.

----- . -----
